Teaching and Learning Online Franklin S. Allaire,Jennifer E. Killham,2022-04-01 Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we, as science teachers, deliver high-quality experiences in an online environment that leads to age/grade-level appropriate science content knowledge and literacy, but also collaborative experiences in the

inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al., 2014; Wong et al., 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al., 2021; Seaman et al., 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, & Mellado, 2013; Gunning & Mensah, 2011). *Teaching and Learning Online: Science for Elementary Grade Levels* comprises three distinct sections: Frameworks, Teacher's Journeys, and Lesson Plans. Each section explores the current trends and the unique challenges facing elementary teachers and students when teaching and learning science in online environments. All three sections include alignment with Next Generation Science Standards, tips and advice from the authors, online resources, and discussion questions to foster individual reflection as well as small group/classwide discussion. Teacher's Journeys and Lesson Plan sections use the 5E model (Bybee et al., 2006; Duran & Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Dodeka: Book of the Prophets Scriptural Research Institute, 1901 In the mid-3rd century BC, King Ptolemy II Philadelphus of Egypt ordered a translation of the ancient Hebrew scriptures for the Library of Alexandria, which resulted in the creation of the Septuagint, as well as several other books of Jewish and Samaritan scriptures, including the Book of Enoch, Book of Job, Testaments of Abraham, Isaac, and Jacob, and the Dodeka. The Dodeka was not part of the collection of texts the Jews fleeing Egypt carried with them from the Jewish Temple in Elephantine, and is therefore believed to have been translated into Greek later, circa 180 BC. It would eventually be added to the Septuagint as the Book of Dodeka circa 140 BC, and then much later be divided into its twelve constituent books by the early Christians in the 3rd-century AD, subsequently called the twelve minor prophets. The books comprising the Dodeka all date from between 900 and 500 BC, and represent the works of twelve ancient prophets, which in the original Greek translation, represented several different gods. These were not Jewish prophets, but Israelite prophets, mostly living the age before King Josiah banned the old gods, in approximately 625 BC. Most of the books in the Dodeka were written before King Josiah's reforms. The books of Hosea, Amos, and Micah are set during the 8th-century BC, when the kingdom of Samaria fought a series of wars against its more powerful northern neighbor Assyria, ultimately being conquered by the Neo-Assyrian Empire circa 722 BC. The books of Joel, Obadiah, and Jonah follow, although their exact settings are not clear. The books of Nahum, Habakkuk, and Zephaniah follow, set in the 7th-century BC, as the Kingdom of Judea struggled for its survival between the powers of the time, Assyria to the north, Egypt to the south, and Babylon to the east, ultimately falling to the Neo-Babylonian Empire circa 586 BC. There is a gap in the prophets during the era when Babylon ruled Judea, and they continue with the books of Haggai, and the first half of Zachariah, set in the late-6th-century, after the Persians have conquered the Babylonian Empire. Combining the various Elohim that are appear to have been the text the Greeks translated, including Shaddai (Shaddayin), On (Aven), Dagon, Tirath (Tirosh), Yitzhar, Reshef (Blight), Mot, Hades (Sheol), and Abaddon (Destruction), Ba'al Hadad, Ba'al Hammon, Qetesh Asherah, Sydyk, and Shemesh, it strongly suggests that the text was heavily edited in the Hasmonean era when Yahweh Sabaoth replaced Lord El. Unfortunately, the existing Dead Sea Scrolls shed little light on the situation as they date to the era the edits would have taken place, but are in the script that should only show the edited version. Nevertheless, they are so damaged almost none of the questions about the differences between the Dodeka and Masoretic Texts could be resolved, even if they were in the Canaanite script.

Visual Hydrology Peter A. Mantz, 2004-05-31 One approach to the introduction of computational material to the classroom is to supplement a textbook with modern computer codes. Unfortunately most codes are expensive, designed for commercial use, without source code and may require special software. Visual Hydrology provides a cheaper and simpler alternative, supplying computational exercises that can be fully assimilated by students, and allowing them to activate, understand and reproduce modern computer code. Visual Hydrology aims to: explain the structure of modern object-oriented computer code provide the source code for worked examples numerically check the worked examples used in text show how worked examples can be used with alternative data describe and reference the underlying theory provide additional exercises with each worked example use Microsoft Excel software alone Requiring only a basic knowledge of Microsoft Excel, this Primer teaches the use of modern and readily-available computer code for engineering computation. Visual Hydrology demonstrates codes for common and practical examples used in hydrological engineering, and will be a valuable resource to students, research workers and consulting engineers in the water-related

sector. Examples of source code to accompany this publication can be downloaded by clicking [here](#).

Exploring the Dead Sea Scrolls Hanan Eshel, 2015-09-16 Among the most prominent hallmarks of the late Prof. Hanan Eshel (1958–2010) were his generosity, passion, and integrative approach. The eighteen essays in this volume were selected by Prof. Eshel shortly before his untimely death, to be printed as a collection aimed at contextualizing the textual finds of the Dead Sea Scrolls within their archaeological settings and within the contours of contemporary scholarship. The Qumran texts that stand at the center of these articles are correlated with archaeological and geographic information and with a variety of textual sources including epigraphic evidence and, especially, the Hebrew Bible, Josephus, and rabbinic texts. The essays are organized according to the provenance of the discovered material, with sections devoted to the Damascus Document and the scrolls from Caves 1, 3, 4, and 11, as well as a final more general chapter. Half of the essays have been previously published in English, while the other half have been translated from Hebrew here for the first time. The book includes essays that have been co-authored with Esther Eshel, Shlomit Kendi-Harel, Zeev Safrai, and John Strugnell.

Victorian Subjects Joseph Hillis Miller, 1991 Written over a thirty-five year period, these essays reflect the changes in J. Hillis Miller's thinking on Victorian topics, from an early concern with questions of consciousness, form, and intellectual history, to a more recent focus on parable and the development of a deconstructive ethics of reading. Miller defines the term Victorian subjects in more than one sense. The phrase identifies an historical time but also names a concern throughout with subjectivity, consciousness, and selfhood in Victorian literature. The essays show various Victorian subjectivities seeking to ground themselves in their own underlying substance or in some self beneath or beyond the self. But Victorian subjects also discusses those who were subject to Queen Victoria, to the reigning ideologies of the time, to historical, social, and material conditions, including the conditions under which literature was written, published, distributed, and consumed. These essays, taken together, sketch the outlines of ideological assumptions within the period about the self, interpersonal relations, nature, literary form, the social function of literature, and other Victorian subjects.

Septuagint: Ezekiel Scriptural Research Institute, Ezekiel ben Buzi, The Book of Ezekiel is certainly one of the strangest books to survive from antiquity and has been the source of much speculation throughout centuries, by Jews, Christians, and atheists alike. Ezekiel's opening vision, of the flying machine, was the source of an entire branch of Jewish literature, Merkabah mysticism. Merkabah, which translates as 'chariot,' developed during the Second Temple era, and had a major impact on early Christian literature, although was ultimately abandoned by both Jews and Christians. The Christians abandoned the 'cloud literature' during the creation of orthodoxy, and the Talmud includes many interdictions concerning Merkabah speculation. Merkabah, and the Heikhalot literature that developed from it, ultimately fell out of favor in the 11th century AD. The Book of Ezekiel recounts a series of visions that Ezekiel had over the course of his life, in the late-600s and early-500s BC. Most of Ezekiel's prophecies were set during the rise of the Neo-Babylonian Empire, and his view of who the Israelites were, is fundamentally different than the view generally expressed. According to Ezekiel, the Israelites were Canaanites, the descendants of Amorites and Minoans (or Hittites in an alternate interpretation). This is clearly not the view that was popular in Judah, either when it was independent, or later under Babylonian or Persian rule. Several contradictions exist between the writings of Ezekiel and the Torah, which suggests that the Torah was not fully composed at the time, or if it was composed, not in circulation where Ezekiel lived. It is also a fact that Ezekiel did not mention Moses or Aaron, yet did refer to the Israelites leaving Egypt, which Moses and Aaron were central to. He mentioned Job and Noah, as well as the ancient Canaanite hero Danel, and Abraham, but under his older name Abram, suggesting that he had not read Genesis, in which Abram's name was changed to Abraham. The description of Ezekiel's thunder god, or his flying chariot, or his flying wheels, depending on the interpreter, is by far the strangest part of the book. It contains many references to electricity, which were generally omitted from early translations due to the belief that electricity was magical nonsense. The rediscovery of electricity in the early-modern era was largely based on the Classical Greek records of their experiments with amber, which is where William Gilbert derived the English term electricity from, *électrou*, meaning amber. The earliest surviving record of experimentation with electrostatic fields was by Thales of Miletus, who lived between approximately 624 and 548 BC, which is the same time as the life of Ezekiel, circa 630 to 545 BC. Ezekiel mentions the Greek city of Miletus in his books but does not mention visiting the place, nevertheless, there is no reason to assume Thales's experiments into static charges were the first, or unique at the time.

The Origins of the Lost Fleet of the Mongol Empire Randall James Sasaki, 2015-02-03 In *The Origins of the Lost Fleet of the Mongol Empire*, Randall Sasaki provides a starting point for understanding the technology of the failed Mongol invasion of Japan in 1281 CE, as well as the history of shipbuilding in East Asia. He has created a timber category database, analyzed methods of joinery, and studied contemporary approaches to shipbuilding in order to ascertain the origins and types of vessels that composed the Mongol fleet. Although no conclusive statements can be made regarding the origins of the vessels, it appears that historical documents and archaeological evidence correspond well to each other, and that many of the remains analyzed were from smaller vessels built in China's Yangtze River Valley. Large, V-shaped cargo ships and the Korean vessels probably represent a small portion of the timbers raised at the Takashima shipwreck site.

Teotihuacan Matthew Robb, 2017-09-26 Founded in the first century BCE near a set of natural springs in an otherwise dry northeastern corner of the Valley of Mexico, the ancient metropolis of Teotihuacan was on a symbolic level a city of elements. With a multiethnic population of perhaps one hundred thousand, at its peak in 400 CE, it was the cultural, political, economic, and religious center of ancient Mesoamerica. A devastating fire in the city center led to a rapid decline after the middle of

the sixth century, but Teotihuacan was never completely abandoned or forgotten; the Aztecs revered the city and its monuments, giving many of them the names we still use today. Teotihuacan: City of Water, City of Fire examines new discoveries from the three main pyramids at the site—the Sun Pyramid, the Moon Pyramid, and, at the center of the Ciudadela complex, the Feathered Serpent Pyramid—which have fundamentally changed our understanding of the city’s history. With illustrations of the major objects from Mexico City’s Museo Nacional de Antropología and from the museums and storage facilities of the Zona de Monumentos Arqueológicos de Teotihuacan, along with selected works from US and European collections, the catalogue examines these cultural artifacts to understand the roles that offerings of objects and programs of monumental sculpture and murals throughout the city played in the lives of Teotihuacan’s citizens. Published in association with the Fine Arts Museums of San Francisco. Exhibition dates: de Young, San Francisco, September 30, 2017–February 11, 2018 Los Angeles County Museum of Art (LACMA), March–June 2018
