Out of Sorts Sarah Bessey, 2015-11-03 From the popular blogger and provocative author of *Jesus Feminist* comes a riveting new study of Christianity that helps you wrestle with—and sort out—your faith. In *Out of Sorts*, Sarah Bessey—award-winning blogger and author of *Jesus Feminist*, which was hailed as “lucid, compelling, and beautifully written” (Frank Viola, author of *God’s Favorite Place on Earth*)—helps us grapple with core Christian issues using a mixture of beautiful storytelling and biblical teaching, a style well described as “narrative theology.” As she candidly shares her wrestlings with core issues—such as who Jesus is, what place the Church has in our lives, how to disagree yet remain within a community, and how to love the Bible for what it is rather than what we want it to be—she teaches us how to walk courageously through our own tough questions. In the process of gently helping us sort things out, Bessey teaches us how to be as comfortable with uncertainty as we are with solid answers. And as we learn to hold questions in one hand and answers in the other, we discover new depths of faith that will remain secure even through the storms of life.

This book provides an overview of the security that is provided by z/VSE and the processes for the implementation and configuration of z/VSE security components, Basic Security Manager (BSM), IBM CICS® security, TCP/IP security, single sign-on using LDAP, and connector security.

National Security and International Relations (Routledge Revivals) Peter Mangold, 2013-10-14 First published in 1990, National Security and International Relations provides a concise analysis of the problem of national security in the twentieth century. It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world, and why some states tend to underinsure, while obsessively insecure states overinsure, frequently making others more insecure in the process. In the wake of two world wars and the threat of nuclear destruction, Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states. It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma. These range from international regimes, to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict, and U.S. and Soviet attempts to render nuclear competition safer through arms control and confidence building measures. Of special value to students of International Relations and Strategic Studies, this book will also interest those keen to understand the challenges embodied in Gorbachev's 'new thinking' in foreign policy.
