Computational and Information Science Jun Zhang, Ji-Huan He, Yuxi Fu, 2005-01-18 The 2004 International Symposium on Computational and Information Sciences (CIS 2004) aimed at bringing researchers in the area of computational and - formation sciences together to exchange new ideas and to explore new ground. The goal of the conference was to push the application of modern computing technologies to science, engineering, and information technologies to a new level of sophistication and understanding. The initial idea to organize such a conference with a focus on computation and applications was originated by Dr. Jun Zhang, during his visit to China in August 2003, in consultation with a few friends, including Dr. Jing Liu at the Chinese Academy of Sciences, Dr. Jun-Hai Yong at Tsinghua University, Dr. Geng Yang at Nanjing University of Posts and Communications, and a few others. After several discussions with Dr. Ji-Huan He, it was decided that Donghua University would host CIS 2004. CIS 2004 attempted to distinguish itself from other conferences in its - phasis on participation rather than publication. A submitted paper was only reviewed with the explicit understanding that, if accepted, at least one of the authors would attend and present the paper at the conference. It is our - lief that attending conferences is an important part of one's academic career, through which academic networks can be built that may benefit one's academic life in the long run. We also made every effort to support graduate students in attending CIS 2004. In addition to set reduced registration fees for full-time graduate students, we awarded up to three prizes for the Best Student Papers at CIS 2004. Students whose papers were selected for awards were given cash prizes, plus a waiver of registration fees.

Significance P. Beynon-Davies, 2010-11-30 Signs are critically important in all forms of activity, including business, because they establish what it is to be human. Without signs we could not think, we could not communicate what we think and we could not ensure that we collaborate together in our work, home and leisure. The aim of this book is to explain how and why they are significant.

The M1 Garand Leroy Thompson, 2012-05-20 The M1 Garand gave the US infantryman a marked edge during World War II. It shot faster and further than enemy infantry rifles and hit harder. No less an authority on killing the enemy than General George S. Patton called the Garand, "The greatest battle implement ever devised." At a time when opposing forces were armed with bolt-action rifles, US troops had a highly reliable self-loader. The eight-round clips which were used to load the M1 Garand were, however, viewed with mixed emotions by the troops on the ground. Some Army and Marine Corps troops allegedly felt that the distinctive "twang" as the Garand's clip was ejected when empty alerted the enemy that the soldiers were reloading and resulted in an attack. But the Garand became the defining mankiller of the war, despite its weight and magazine problems, and many US combat veterans consider it one of the key reasons they survived the war.

Life Cycle Assessment (LCA) Walter Klöpffer, Birgit Grahl, 2014-04-21 This first hands-on guide to ISO-compliant Life Cycle Assessment (LCA) makes this powerful tool immediately accessible to both professionals and students. Following a general introduction on the philosophy and purpose of LCA, the reader is taken through all the stages of a complete LCA analysis, with each step exemplified by real-life data from a major LCA project on beverage packaging. Measures as carbon and water footprint, based on the most recent international standards and definitions, are addressed. Written by two pioneers of LCA, this practical volume is targeted at first-time LCA users but equally makes a much-valued reference for more experienced practitioners. From the content: * Goal and Scope Definition * Life Cycle Inventory Analysis * Life Cycle Impact Assessment * Interpretation, Reporting and Critical Review * From LCA to Sustainability Assessment and more.

Library Buildings in a Changing Environment Marie-Françoise Bisbrouck, 2014-02-07 The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems.

A Supply Chain Logistics Program for Warehouse Management David E. Mulcahy, Joachim Sydow, 2008-05-28 A well-planned, well-structured warehouse management system (WMS) offers significant advantages to an organization, particularly in its ability to make warehouse operations more efficient, more cost effective, and more responsive. A Supply Chain Logistics Program for Warehouse Management details the concepts, applications, and practices necessary for the successful management of a WMS program, including the selection and adoption of the right software. Taking a process approach to a generic warehouse and its workings, the authors trace a product's life cycle from its receipt at a warehouse, through its outbound shipment, and to its eventual return. This approach illustrates the logistics of a well-run supply chain and how it works in relation to every phase of a warehouse's operation. The book details each phase and its related process, demonstrating how every component fits into the overall operation. Specific topics include how to reduce product damage, enhance identified product flow and track inventory, increase employee productivity, improve customer service, reduce warehouse operating costs, improve profits, and assure asset protection. The book also presents guidelines, tips and checklists so the reader can view how each component is carried out. Whether a warehouse operation supports a small, medium, or large business, A Supply Chain Logistics Program for Warehouse Management is an important book to have in order to design a system that reduces operating costs, improves products, and maintains timely delivery to customers.
