Hirohito's War Francis Pike,2016-09-08 Named one of Foreign Affairs' Best Books of 2016 In his magisterial 1,208 page narrative of the Pacific War, Francis Pike's Hirohito's War offers an original interpretation, balancing the existing Western-centric view with attention to the Japanese perspective on the conflict. As well as giving a 'blow-by-blow' account of campaigns and battles, Francis Pike offers many challenges to the standard interpretations with regards to the causes of the war; Emperor Hirohito's war guilt; the inevitability of US Victory; the abilities of General MacArthur and Admiral Yamamoto; the role of China, Great Britain and Australia; military and naval technology; and the need for the fire-bombing of Japan and the eventual use of the atom bomb on Hiroshima and Nagasaki. Hirohito's War is accompanied by additional online resources, including more details on logistics, economics, POWs, submarines and kamikaze, as well as a 1930-1945 timeline and over 200 maps.

Flying Tigers Daniel Ford,2023-05-01 During World War II, in the skies over Burma and China, a handful of American pilots met and bloodied the Imperial Wild Eagles of Japan and won immortality as the Flying Tigers. One of America's most famous combat forces, the Tigers were recruited to defend beleaguered China for \$600 a month and a bounty of \$500 for each Japanese plane they shot down--fantastic money in an era when a Manhattan hotel room cost three dollars a night.This May 2023 revision has never-before-published information about Chennault's early years. Admirable, wrote Chennault biographer Martha Byrd of Ford's original text. A readable book based on sound sources. Expect some surprises. Flying Tigers won the Aviation/Space Writers Association Award of Excellence in the year of its first publication.

Marvel Comics into Film Matthew J. McEniry, Robert Moses Peaslee, Robert G. Weiner, 2016-03-30 Marvel Studios' approach to its Cinematic Universe--beginning with the release of *Iron Man* (2008)--has become the template for successful management of blockbuster film properties. Yet films featuring Marvel characters can be traced back to the 1940s, when the Captain America serial first appeared on the screen. This collection of new essays is the first to explore the historical, textual and cultural context of the larger cinematic Marvel universe, including serials, animated films, television movies, non-U.S. versions of Marvel characters, films that feature characters licensed by Marvel, and the contemporary Cinematic Universe as conceived by Kevin Feige and Marvel Studios. Films analyzed include *Transformers* (1986), *Howard the Duck* (1986), *Blade* (1998), *Planet Hulk* (2010), *Iron Man: Rise of Technovore* (2013), *Elektra* (2005), the Conan the Barbarian franchise (1982-1990), *Ultimate Avengers* (2006) and *Ghost Rider* (2007).

Bold Venture Steven K. Bailey, 2019-03-01 *Bold Venture* tells the nearly forgotten story of the American airmen who flew perilous combat missions over Hong Kong during the Second World War. Steven K. Bailey sheds new light on the American military campaign against Japanese forces in occupied China. From the first reconnaissance flights over Hong Kong by lone pilots in 1942 to the massive multi-squadron air strikes of 1945, he describes the complex history of American air operations in the China theater and paints an indelible portrait of the American air raids on Hong Kong and the airmen who were shot down over the city. Today unexploded aircraft bombs are unearthed with frightening regularity by construction crews in Hong Kong. Residents are eager to know where these bombs originated, who dropped them, when, and what the targets were. Bailey's account answers some of these questions and provides a unique historical perspective for Americans seeking to understand the complexities of military involvement.

The Loss of Java P.C. Boer, 2011-01-01 *The Loss of Java* explains in detail the air, sea and land battles between the Allied and Japanese armed forces during the battle for Java that followed the evacuation of southern Sumatra in February 1942. Little has been written about the allied air campaign, or about why Dutch forces fought just one major land battle with the Japanese, the Battle of the Tjiater Pass, in the later stages of the struggle. P.C. Boer considers whether the assessment of Major General Van Oyen that deploying the Allied air forces might prevent Japanese invasion of Java was realistic, and whether reliance on air power limited the capacity of land and naval forces to repel Japan's advances. The generally accepted idea is that the Allies were ineffective in their fight against the Japanese invaders but in fact the Japanese suffered serious losses. Boer's study shows that Dutch

strategy grew out of a carefully-devised plan of defense, and that the battle for Java comprised not one (the Battle of the Java Sea) but four major engagements. However, Japanese commanders at various levels consciously took steps that exposed their forces to great risk but succeeded in putting the Allies under great pressure. In the end the Royal Netherlands East Indies Army (KNIL) and the allied forces capitulated on 8 March 1942. This book is a translation of *Het Verlies Van Java: Een kwestie van Air Power. De eindstrijd om Nederlands-Indië van de geallieerde lucht-, zee- en landstrijdkrachten in de periode van 18 februari t/m 7 maart 1942* (Amsterdam: Bataafsche Leeuw BV for the Koninklijke Militaire Academie, 2006).

P-38 Lightning Aces of the Pacific and CBI John Stanaway,1997-04-15 The P-38 was used on virtually every front to which the USAAF were committed, but enjoyed its greatest successes in the Pacific and China-Burma-India (CBI) theatres. The speed, range and firepower of the P-38 made it the favourite of nearly all aircrew fighting in the Solomons, New Guinea and the Philippines, and over 1800 Japanese aircraft fell to its guns. From the first encounters at the end of 1942 until the Lightning scored the final Fifth Air force victories in August 1945, these pilots made the Pacific skies very much their own battleground.

PROJECT Z: AIR WAR JAPAN 1946 Mark Lewis,2010-07-08 Following the disastrous defeat of the Japanese naval forces at the Battle of Midway the head of the Nakajima Aircraft Company drew up a new battle plan. He clearly understood that the enormous industrial capacity of America would soon make the war unwinnable for Japan if the current war strategy did not change. In August 1943 after consultation with his board and design staff Nakajima approached the Japanese military bureaucracy with a series of radical changes to alter what he felt was the current defeatist Japanese war strategy. With these changes in place Nakajima was confident Japan could regain the superiority in the war. Project Z was born from one of these proposals. Project Z was the codename for the long range heavy bomber project designed to strike back at the American mainland and cripple the American economy. This book describes how the Japanese aircraft industry as a whole attempted to stave off defeat by adopting new technologies and the latest aeronautical developments. In a blending of fact and fiction the air combat scenarios over Japan and the Pacific theatre are described.

Nakajima Ki-49 'Helen' Units George Eleftheriou,2023-05-25 A fully illustrated study of the Nakajima Ki49 'Helen', the twin-engined bomber of the Pacific War, from Japanese aviation expert George Eleftheriou. The Nakajima Ki-49 Donryu ('Dragon Eater'), codenamed 'Helen' by the Allies, was a twin-engined Japanese bomber designed to undertake daylight attacks without the protection of escort fighters. Consequently, while it was officially known as the Army Type 100 Heavy Bomber, its formidable defensive armament and armour were so heavy that they restricted the Ki-49 to payloads comparable to those of smaller medium bombers. While only five heavy bomber sentai (regiments) were equipped with the 'Helen', the over 800 Ki-49s built between 1941 and 1944 saw extensive action in Burma, Papua New Guinea, the Philippines, northern India and north Australia. In an act of desperation, a small number of 'Helens' were even employed, unsuccessfully, as kamikaze aircraft against US Navy warships operating off the Philippines and Okinawa. In this fascinating book, George Eleftheriou provides a comprehensive account of the units that saw action flying the 'Helen', based on original Japanese sources. Also featuring high-quality photographs never published before, specially commissioned colour profile artwork, official unit histories and veteran accounts, this title is a must-have for Japanese aircraft enthusiasts.

Hurricanes Over Singapore Brian Cull,Paul Sortehaug,2004 Hurricanes over Singapore is the companion volume to the successful Buffaloes over Singapore published in 2003. It continues the story of the RAF's gallant but futile attempt to stop the might of the Japanese invasion force in its quest to conquer not only Singapore, but also Sumatra and Java and all the other islands that constituted the Netherlands East Indies. The Hurricanes went

into action over Singapore on 20 January 1942 and the last two aircraft made the final flight at Java on 8 March that year. During the intervening time the Hurricane pilots and ground crew - British, New Zealanders, Australians, Canadians, Dutch and Americans - gave their all, with many making the supreme sacrifice. The majority of survivors would spend the next 3 1/2 years as prisoners of the Japanese - and some of their heart-rending stories are detailed here. This expertly researched account, the most comprehensive to date, and accompanied by rare photographs, is told wherever possible by the pilots themselves, the majority of whom were young and inexperienced. Their efforts should not be forgotten and this book is a dispassionate tribute to those who fell in battle, those who died as prisoners and those who survived the trials and tribulations of imprisonment.
