Doing Q Methodological Research Simon Watts,Paul Stenner,2012-03-19 This book is a simple yet thorough introduction to Q methodology, a research technique designed to capture the subjective or first-person viewpoints of its participants. Watts and Stenner outline the key theoretical concepts developed by William Stephenson, the founder of Q methodology, including subjectivity, concurrence theory and abduction. They then turn to the practicalities of delivering high quality Q methodological research. Using worked examples throughout, the reader is guided through: • important design issues • the conduct of fieldwork • all the analytic processes of Q methodology, including factor extraction, factor rotation and factor interpretation. Drawing on helpful conceptual introductions to potentially difficult statistical concepts and a step-by-step guide to running Q methodological analyses using dedicated software, this book enables interested readers to design, manage, analyse, interpret and publish their own Q methodological research.

The Chinese Space Programme in the Public Conversation about Space Andrew Thomas,2020-08-01
This study is the product of a long view of space exploration and the conversations about space in China. It locates the multiple conversations about space exploration and utilisation as they are in the Peoples' Republic of China (PRC), within other conversations about space culture in the world. China is viewed by Western researchers through many lenses which are examined here critically. In previous studies, writers explain away China's space programme with the easy answers of a Space Race and a China Threat, in which the space programme is seen as merely an example of global competition, or threat, but this thesis challenges those barriers to Western understanding of the Chinese public conversation of space culture. In this study, critical theory and an underlying epistemology within a post-Enlightenment cultural frame are applied to official, archival and ephemeral texts and images. The manner of the critical application is distinguished from

derivate techniques operationalised as Open Source Intelligence. The concept of Place, and within that, Foucault's linguistic concept of "Heterotopia", is significant both in understanding the Chinese overseas space bases on Earth and the temporal and spatial dislocations experienced in space missions. In acknowledging the interpretative approach, an empirical study, a Q-sort has been carried out, which demonstrates that the key factor in the Chinese conversation is Science, within the context of modernisation, tempered by Chinese cultural affirmation and international co-operation. The thesis concludes by providing general principles in future work for successful research into the popular culture of space exploration.

The Bread of the Servant Elizabeth G.

Honaker, 2011-02-23 This script was written to serve a small church drama group with a big heart for witnessing. There are speaking roles for 27 actors, and several non-speaking parts, but it can be performed with fewer actors if need be. Scenery does not have to be elaborate, but two defined performance areas are needed. Stage lighting is also an important element, but it can be fixed or portable. The play centers around the Apostle John in his old age, attempting to explain to Diana, a bitter, jaded slave woman, the life-changing impact Jesus can have on an open heart. John recalls for Diana the events of the Lord's earthly ministry, explaining his own transformation from a headstrong young fisherman into a more spiritually mature man longing to serve his Beloved Master.
