Science-Fiction Rebels: the Story of the Science-Fiction Magazines from 1981

To 1990 Mike Ashley, 2020-02-29 Mike Ashley's acclaimed history of science-fiction magazines comes to the 1980s with *Science-Fiction Rebels: The Story of the Science Fiction Magazines from 1981 to 1990*. This volume charts a significant revolution throughout science fiction, much of which was driven by the alternative press, and by new editors at the leading magazines. The period saw the emergence of the cyberpunk movement, and the drive for, what David Hartwell called, 'The Hard SF Renaissance', which was driven from within Britain. Ashley plots the rise of many new authors in both strands: William Gibson, John Shirley, Bruce Sterling, John Kessel, Pat Cadigan, Rudy Rucker in cyberpunk, and Stephen Baxter, Alistair Reynolds, Peter Hamilton, Neal Asher, Robert Reed, in hard sf. He also shows how the alternative magazines looked to support each other through alliances, which allowed them to share and develop ideas as science-fiction evolved.

Between History and Personal Narrative Maria-Sabina Draga Alexandru, Madalina Nicolaescu, Helen Smith, 2014 This collection focuses on a variety of fictional and non-fictional East European women's migration narratives, multimodal narratives by migrant artists, and cyber narratives (blogs and personal stories posted on forums). The book negotiates the concept of narrative between conventional literary forms, digital discourses, and the social sciences. It brings together new perspectives on strategies of representation, trauma, dislocation, and gender roles. It also claims a place for Eastern Europe on the map of transnational feminism. (Series: Contributions to Transnational

Feminism - Vol. 4) [Subject: Sociology, European Studies, Women's Studies, Feminist Studies, Gender Studies, Migration Studies]

Dying and Death in 18th-21st Century Europe Corina Rotar, Marius

Rotar, 2014-03-17 This book features the second selection of the most representative papers presented at the international conference “Dying and Death in 18th-21st Century Europe” (ABDD), a traditional scientific event organized every year in Alba Iulia, Romania. The book invites the reader on a fascinating journey across the last three centuries of Europe, using the concept of death as a guide. The past and present realities of the complex phenomena of death and dying in Romania, the United Kingdom, Lithuania, Serbia, Macedonia, Poland, USA, Germany, Sweden, Finland, and Italy are dealt with by authors from varying backgrounds, including historians, sociologists, psychologists, priests, humanists, anthropologists, and doctors. This is proof that death as a topic cannot be confined to one science; the deciphering of its meanings and of the shifts it effects requires a joint, interdisciplinary effort.

Design Secrets: Furniture Laurel Saville, Brooke Stoddard, 2008-05-01 New in

Paperback! Furniture design is a complex art. Traditionally, techniques of the craft have been passed down from master to apprentice, but these days that is less and less the case in contemporary design. Students are now required to take courses and figure out much of it themselves. This book, as with others in the Design Secrets series, takes readers into the studio and reveals tips and techniques as well as the inspiration that brought the concept to life. Many graphic and product designers are crossing into furniture design, including Karim Rashid, a designer of product, space, light, and fashion, and Todd

Oldham, a photographer, graphic designer, product designer, interior designer, and influence in film/video and TV. Oldham is now the star designer at Lazy Boy-a company that has experienced a remarkable rebirth and revamp. Design Secrets: Furniture shadows similar success stories by showcasing award-winning furniture designs from around the world. Each profile is complete with sketches, notes, and interim iterations revealing how the final piece came to be.

The Complete Book of Spaceflight David Darling, 2008-04-21 A commanding encyclopedia of the history and principles of spaceflight-from earliest conceptions to faster-than-light galaxy-hopping Here is the first truly comprehensive guide to space exploration and propulsion, from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes. Space buffs will delight in its in-depth coverage of all key manned and unmanned missions and space vehicles-past, present, and projected-and its clear explanations of the technologies involved. Over the course of more than 2,000 extensively cross-referenced entries, astronomer David Darling also provides fascinating insights into the cultural development of spaceflight. In vivid accounts of the major characters and historical events involved, he provides fascinating tales of early innovators, the cross-pollination that has long existed between science fiction and science fact, and the sometimes obscure links between geopolitics, warfare, and advances in rocketry.

Brücke, 2004

The History of the Science-fiction Magazine Michael Ashley, 2000 This third volume in Mike Ashley's four-volume study of the science-fiction magazines focuses on the turbulent years of the 1970s, when the United States emerged from the Vietnam War into an

economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science-fiction magazines. Not only were they struggling to survive within the economic climate, they also had to cope with the death of the father of modern science fiction, John W. Campbell, Jr., while facing new and potentially threatening opposition. The market for science fiction diversified as never before, with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science fiction in college, the start of role-playing gaming magazines, underground and adult comics and, with the success of Star Wars, media magazines. This volume explores how the traditional science-fiction magazines coped with this, from the

Sphere Michael Crichton, 2012-05-14 From the author of Jurassic Park, Timeline, and Congo comes a psychological thriller about a group of scientists who investigate a spaceship discovered on the ocean floor. In the middle of the South Pacific, a thousand feet below the surface, a huge vessel is unearthed. Rushed to the scene is a team of American scientists who descend together into the depths to investigate the astonishing discovery. What they find defies their imaginations and mocks their attempts at logical explanation. It is a spaceship, but apparently it is undamaged by its fall from the sky. And, most startling, it appears to be at least three hundred years old, containing a terrifying and destructive force that must be controlled at all costs.

Justice, Memory and Redress in Romania Lavinia Stan, Lucian

Turcescu, 2017-01-06 Are there any lessons Romania can teach transitional justice scholars and practitioners? This book argues that important insights emerge when analyzing a country with a moderate record of coming to terms with its communist past. Taking a broad definition of transitional justice as their starting point, contributors provide fresh assessments of the history commission, court trials, public identifications of former communist perpetrators, commemorations, and unofficial artistic projects that seek to

address and redress the legacies of communist human rights violations. Theoretical and practical questions regarding the continuity of state agencies, the sequencing of initiatives, their advantages and limitations, the reasons why some reckoning programs are enacted and others are not, and these measures' efficacy in promoting truth and justice are answered throughout the volume. Contributors include seasoned scholars from Romania, Canada, the United States, and the United Kingdom, and current and former leaders of key Romanian transitional justice institutions.

CDF Communiqué California. Department of Forestry and Fire Protection,1987

Romania under Communism Dennis Deletant,2018-10-11 Communism has cast a long shadow over Romania. The passage of little over a quarter of a century since the overthrow in December 1989 of Romania's last Communist leader, Nicolae Ceaușescu, offers a symbolic standpoint from which to penetrate that shadow and to throw light upon the entire period of Communist rule in the country. An appropriate point of departure is the observation that Romania's trajectory as a Communist state within the Soviet bloc was unlike that of any other. That trajectory has its origins in the social structures, attitudes and policies in the pre-Communist period. The course of that trajectory is the subject of this inquiry.
