*A Sharpness on the Neck* Fred Saberhagen,2020-08-03 In 1792, Philip Radcliffe, the bastard son of Benjamin Franklin, comes to France to deliver a letter to Thomas Paine--only to get caught up in a conflict far more horrifying than the Revolution. By foiling a powerful vampire's attempt at fratricide, Radcliffe dooms himself and his descendants to suffer the vampire's eternal vengeance. In present day, Philip and June Radcliffe are kidnapped on their honeymoon. Their captor, a mysterious Mr. Graves, swears that he aims to protect them. Yet as the thrilling story unfolds, involving Napoleon, the Marquis de Sade, and the Scarlet Pimpernel, as well as Jerry Cruncher and Detective Dupin, the young couple refuses to believe him--a mistake that is certain to cost them their lives.

### **The Gloucester And Sharpness Canal Through Time**

Hugh Conway-Jones,2013-01-11 *The Gloucester & Sharpness Canal - An Illustrated History* draws on contemporary sources and throws new light on the construction, operation and maintenance of the canal.

*A Survey of Blur Detection and Sharpness Assessment Methods* Juan Andrade,2022-06-01 Blurring is almost an omnipresent effect on natural images. The main causes of blurring in images include: (a) the existence of objects at different depths within the scene which is known as defocus blur; (b) blurring due to motion either of objects in the scene or the imaging device; and (c) blurring due to atmospheric turbulence. Automatic estimation of spatially varying sharpness/blurriness has several applications including depth estimation, image quality assessment, information retrieval, image restoration, among others. There are some cases in which blur is intentionally introduced or enhanced; for example, in artistic photography and cinematography in which blur is intentionally introduced to emphasize a certain image region. Bokeh is a technique that introduces defocus blur with aesthetic purposes. Additionally, in

trending applications like augmented and virtual reality usually, blur is introduced in order to provide/enhance depth perception. Digital images and videos are produced every day in astonishing amounts and the demand for higher quality is constantly rising which creates a need for advanced image quality assessment. Additionally, image quality assessment is important for the performance of image processing algorithms. It has been determined that image noise and artifacts can affect the performance of algorithms such as face detection and recognition, image saliency detection, and video target tracking. Therefore, image quality assessment (IQA) has been a topic of intense research in the fields of image processing and computer vision. Since humans are the end consumers of multimedia signals, subjective quality metrics provide the most reliable results; however, their cost in addition to time requirements makes them unfeasible for practical applications. Thus, objective quality metrics are usually preferred.

**The Partial Regularity Theory of Caffarelli, Kohn, and Nirenberg and its Sharpness** Wojciech S. Ożański, 2019-09-16  
This monograph focuses on the partial regularity theorem, as developed by Caffarelli, Kohn, and Nirenberg (CKN), and offers a proof of the upper bound on the Hausdorff dimension of the singular set of weak solutions of the Navier-Stokes inequality, while also providing a clear and insightful presentation of Scheffer's constructions showing their bound cannot be improved. A short, complete, and self-contained proof of CKN is presented in the second chapter, allowing the remainder of the book to be fully dedicated to a topic of central importance: the sharpness result of Scheffer. Chapters three and four contain a highly readable proof of this result, featuring new improvements as well. Researchers in mathematical fluid mechanics, as well as those working in partial differential equations more generally, will find this monograph invaluable.

**The Better Brain Book** David Perlmutter,Carol Colman,2005-08-02 From the author of the #1 New York Times bestseller Grain Brain and New York Times bestseller Brain Maker... Loss of memory is not a natural part of aging—and this book explains why. Celebrated neurologist David Perlmutter reveals how everyday memory-loss—misplacing car keys, forgetting a name, losing concentration in meetings—is actually a warning sign of a distressed brain. Here he and Carol Colman offer a simple plan for repairing those problems, clarifying misconstrued connections between memory loss and aging, and regaining and maintaining mental clarity by offering the tools for: Building a better brain through nutrition, lifestyle changes, and brain workouts Coping with specific brain disorders such as stroke, vascular dementia, Alzheimer's, Parkinson's, multiple sclerosis, and Lou Gehrig's disease Understanding risk factors and individually tailoring a diet and supplementary program Features a Life Style Audit, quizzes, a brain fitness program with the most effective ways to exercise your brain, and a nutritional program that details the best brain food and supplements.
