The Storm Ilya Ehrenburg,2003-05-01 Ilya Ehrenburg was born in 1891 into the family of a Moscow manufacturer. At the age of fifteen he joined the revolutionary movement. He was expelled from the gymnasium for distributing Bolshevik leaflets, was arrested and served more than a year in prison. From 1909 to 1917 he was a resident of Paris and did much traveling throughout Europe. It was at this time that he took to writing poetry, which he printed in Russia and other countries. In 1917 he returned to his native country. In 1921 he again left for France, and lived in Paris, making frequent trips to the Soviet Union. Ehrenburg's writings show great diversity of theme and genre. Whether the work at hand was a purely literary article or a novel of fantastic cast, a story of adventure or a delicately penned novelette, a book of verse or a political pamphlet, whether he was dispensing humor or the comments of a journalist, he wielded pen with equal mastery and brilliance. The Storm was the Stalin Prize Novel for 1947.

Avian Biology Donald S. Farner, James R. King,2013-09-17 Avian Biology, Volume V is a collection of papers that deals with the biology of birds concerning their mechanics of flight and migration. The first paper describes the mechanics of bird flights such as gliding, soaring, and the energy requirements of this activity. Other papers investigate the control and metabolic physiology of migration, including flight restlessness and fat metabolism. Other topics cover migratory orientation research involving topographical, meteorological, inertial, magnetic, and celestial cues. Upon migration to different environments, birds have to adapt as their circadian and circannual rhythms are affected. One paper discusses the works of Wynne-Edwards, Aschoff and Wever, and Leopold and Eynon regarding their observations of bird migration cues. One author describes the vocal behavior in birds, including the dual sound theory

where two sound sources can occur in each bronchus. Of interest to many in this paper is the description of the different stages in song development. Other papers discuss the incubation behavior of birds as well as the energetics involved. This book is suitable for zoologists, bird enthusiasts, and avian biologists.

The Storm Alexander Nicolaevich Ostrovsky, 2013-01-18 The Storm, by Ostrovsky, is generally regarded as one of the finest plays to have been written in 19th-century Russia. Contemporary critics viewed it either as showing the dark forces of conservatism or as the highest expression of love for the traditional life and character of the Russian middle class. A 19th-century drama in five acts, The Storm (like Ostrovsky's other plays) a work of social criticism directed particularly towards the Russian merchant class. The Storm provoked fierce debate in the Russian press of the time concerning moral issues. While Vasily Botkin was raving about the elemental poetic force emerging from secret depths of a human soul... for Katerina's love is a woman's nature thing exactly in the way that any of climactic cataclysm is a thing of physical nature, critic Nikolai Filippov lambasted the play as an example of vulgar primitivism, calling Katerina shameless and the scene of rendezvous in Act III scabrous. Mikhail Shchepkin was highly skeptical too, especially about those two episodes that take place behind the bushes. Stepan Shevryov wrote about the decline of a Russian comedy and drama, which was sliding down the ranking stairs to the bottom of social hierarchy. When the play was produced in Saint Petersburg, under the personal supervision of its author, Katerina was played by young and elegant Fanny Snetkova who gave lyrical overtones to the character. In Moscow as well as Saint Petersburg the play angered most of the theater critics but appealed to audiences and was a tremendous box office success.

Avian Migration Peter Berthold, Eberhard Gwinner, Edith Sonnenschein, 2013-03-09 P. Berthold and E. Gwinner Bird migration is an intriguing aspect of the living world - so much so that it has been investigated for as long, and as thoroughly, as almost any other natural phenomenon. Aristotle, who can count as the founder of scientific ornithology, paid very close attention to the migrations of the birds he observed, but it was not until the reign of Friedrich II, in the first half of the 13th century, that reliable data began to be obtained. From then on, the data base grew rapidly. Systematic studies of bird migration were introduced when the Vogelwarte Rossitten was founded, as the first ornithological biological observation station in the world (see first chapter In Memory of Vogelwarte Rossitten). This area later received enormous impetus when experimental research on the subject was begun: the large-scale bird-ringing experiment initiated in Rossitten in 1903 by Johannes Thienemann (who was inspired by the pioneering studies of C. C. M. Mortensen), the experiments on photoperiodicity carried out by William Rowan in the 1920s in Canada and retention and release

experiments performed by Thienemann in the 1930s in Rossitten, the first experimental study on the orientation of migratory birds. After the Second World War, migration research, while continuing in the previous areas, also expanded into new directions such as radar ornithology, ecophysiology and hormonal control mechanisms, studies of evolution, genetics, telemetry and others.

The Storm Alexandr Nicolaevich Ostrovsky, 2014-01 These great writers have given us admirable pictures of the people's life as it appeared to them at the angle of the educated Westernized Russian mind; but here in *The Storm* is the atmosphere of the little Russian town, with its primitive inhabitants, merchants, and workpeople, an atmosphere untouched, unadulterated by the ideas of any outside European influence. It is the Russia of Peter the Great and Catherine's time, the Russian patriarchal family life that has existed for hundreds of years through all the towns and villages of Great Russia, that lingers indeed to-day in out-of-the-way corners of the Empire, though now invaded and much broken up by modern influences. It is, in fact, the very Muscovite life that so puzzled our forefathers, and that no doubt will seem strange to many English readers. But the special triumph of *The Storm* is that although it is a realistic picture of old-fashioned Russian patriarchal life, it is one of the deepest and simplest psychological analyses of the Russian soul ever made. It is a very deep though a very narrow analysis. Katerina, the heroine, to the English will seem weak, and crushed through her weakness; but to a Russian she typifies revolt, freedom, a refusal to be bound by the cruelty of life. And her attitude, despairing though it seems to us, is indeed the revolt of the spirit in a land where Tolstoi's doctrine of non-resistance is the logical outcome of centuries of serfdom in a people's history. A Play in Four Acts.
