*Sia Martinez and the Moonlit Beginning of Everything* Raquel Vasquez Gilliland,2020-08-11 “In a world where we are so often dividing ourselves into us and them, this book feels like a kind of magic, celebrating all beliefs, ethnicities, and unknowns.” —The New York Times Book Review Aristotle & Dante Discover the Secrets of the Universe meets Roswell by way of Laurie Halse Anderson in this astonishing, genre-bending novel about a Mexican American teen who discovers profound connections between immigration, folklore, and alien life. It’s been three years since ICE raids and phone calls from Mexico and an ill-fated walk across the Sonoran. Three years since Sia Martinez’s mom disappeared. Sia wants to move on, but it’s hard in her tiny Arizona town where people refer to her mom’s deportation as “an unfortunate incident.” Sia knows that her mom must be dead, but every new moon Sia drives into the desert and lights San Anthony and la Guadalupe candles to guide her mom home. Then one night, under a million stars, Sia’s life and the world as we know it cracks wide open. Because a blue-lit spacecraft crashes in front of Sia’s car...and it’s carrying her mom, who’s very much alive. As Sia races to save her mom from armed-quite-possibly-alien soldiers, she uncovers secrets as profound as they are dangerous in this stunning and inventive exploration of first love, family, immigration, and our vast, limitless universe.

**Mr SIA** Ken Hickson,2014-10-28 Introducing the life and times of a legend in international aviation — Lim Chin Beng — the man they called Mr SIA. Absorbing the life and work of Lim Chin Beng is like watching a fly past of airlines and aircraft old and new. In this book, his past comes to meet you in many forms — designs, shapes, figures, photographs, episodes, places, people and you discover the connections with business, society and international aviation today and into the future. Here's a man who was instrumental in taking the very basic components of a business — like a potter taking the clay — and creating what has become one of the world's leading brands, Singapore Airlines. But this airline specialist, trained as an economist, had more jobs to do. His broad range of interests — arts and sports, property and tourism — led to him being called on to do his national service for Singapore. He was Ambassador to Japan for two terms and trade negotiator, chairman of the Singapore Tourism Board, Changi Airport International, Singapore Airshow, Singapore Press Holdings, Ascott Group, and ST Aerospace. Described as a quiet achiever and a visionary, this modest gentleman was not afraid to make bold decisions and take risks, even to the extent of setting up a budget airline, Valuair. Here was one man, who in his time, played many parts, on the world's stage and at home. Commanding Sia Zoe Dawson,2020-03-11 Separated by loss. . .reunited by duty... When Lieutenant Ambrosia “Sia” Soto returns from an investigation into a “pilot error” case aboard the aircraft carrier U.S.S. James McCloud, she comes face to face with NCIS Special Agent and former lover, Christophe Vargas, the man who was involved in an F-18 Fighter Jet accident that took her brother’s life six years ago. But when another incident aboard the carrier involves the death of a senator’s son whose plane crashed into the deck on a routine training mission, she’s now required to return to the carrier with Chris in tow to face a cunning and dangerous foe. Bombarded both personally and professionally, Sia must trust her instincts and suppress the feelings that surface for her enigmatic and sexy partner.

medi@sia T.J.M. Holden,Timothy J. Scrase,2006-09-27 This new inter-disciplinary book is the first comparative, case-based analysis of media panoply in (and out of) Asia today. Examining what the authors call the media/tion equation, the contributors demonstrate the multiple links between media, society and culture, and advance the claim that media is the key means through which Asians experience, understand, effect and are affected by the worlds containing them. Exploring a relatively neglected principle in cultural studies - that context counts - medi@sia highlights how the experiences of those encountering media messages differ depending on social, economic, political and ideational conditions. Balancing social, cultural and media theory with empirical research, the essays in this collection provide a better understanding of the complex relationship between media and people’s practices, values and behaviour in contemporary Asia.

**Handbook of Functionalized Nanomaterials** Chaudhery Mustansar Hussain,Vineet Kumar,2021-08-23 Handbook of Functionalized Nanomaterials: Environmental Health and Safety discusses the reactive properties of FNMs used in a range of applications, and their toxic impact on the environment. Nanomaterials have unique properties that can make them highly reactive. This reactivity can cause unwanted interactions with living cells, an increase in oxidative stress or damage to genetic material - resulting in damage to the environment and local wildlife. This negative impact is often further increased after surface functionalization of nanomaterials with other materials which offer unique properties of their own. To ensure environmental safety and ecological balance, rigorous toxicity testing of functionalized nanomaterials (FNMs) is necessary. This book discusses the toxicological uncertainties of FNMs and the limitations of FNMs in a range of applications. Later chapters propose methods to reliably assess the harm that functionalized nanomaterials can cause to the environment and wildlife, as well covering recent developments in the field of environmental health safety. The book concludes with a discussion on the future prospects of safe functionalized nanomaterials. Offers a novel, integrated approach, bridging the gap between FNMs and environmental health and safety Analyses the reactive properties of FNMs and their toxicological potential Provides an in-depth look at the impact of functionalized nanomaterials on the environment
