Fall-Out Shelters for the Human Spirit Michael L. Krenn, 2006-03-08 During the Cold War, culture became another weapon in America's battle against communism. Part of that effort in cultural diplomacy included a program to arrange the exhibition of hundreds of American paintings overseas. Michael L. Krenn studies the successes, failures, contradictions, and controversies that arose when the U.S. government and the American art world sought to work together to make an international art program a reality between the 1940s and the 1970s. The Department of State, then the United States Information Agency, and eventually the Smithsonian Institution directed this effort, relying heavily on the assistance of major American art organizations, museums, curators, and artists. What the government hoped to accomplish and what the art community had in mind, however, were often at odds. Intense domestic controversies resulted, particularly when the effort involved modern or abstract expressionist art. Ultimately, the exhibition of American art overseas was one of the most controversial Cold War initiatives undertaken by the United States. Krenn's investigation deepens our understanding of the cultural dimensions of America's postwar diplomacy and explores how unexpected elements of the Cold War led to a redefinition of what is, and is not, American.

New Trends in Urban Drainage Modelling Giorgio Mannina, 2018-08-31 This book addresses the latest research advances, innovations, and applications in the field of urban drainage and water management as presented by leading researchers, scientists and practitioners from around the world at the 11th International Conference on Urban Drainage Modelling (UDM), held in Palermo, Italy from 23 to 26 September, 2018. The conference was promoted and organized by the University of Palermo, Italy and the International Working Group on Data and Models, with the support of four of the world's leading organizations in the water sector: the International Water Association (IWA), International Association for Hydro-Environment Engineering and Research (IAHR), Environmental & Water Resources Institute (EWRI) - ASCE, and the International Environmental Modelling and Software Society (iEMSs). The topics covered are highly diverse and include drainage and impact mitigation, water quality, rainfall in urban areas, urban hydrologic and hydraulic processes, tools, techniques and analysis in urban drainage modelling, modelling interactions and integrated systems, transport and sewer processes (incl. micropollutants and

pathogens), and water management and climate change. The conference's primary goal is to offer a forum for promoting discussions amongst scientists and professionals on the interrelationships between the entire water cycle, environment and society.

Volume 1: Seabird Biodiversity and Human Activities Jaime A. Ramos, Leonel Pereira, 2022-06-30 Seabirds are global travellers connecting oceans and seas all over the world, and facing multiple threats at local and global scales. Seabirds are long-lived top predators, reflecting changes at lower trophic levels, and are good models to assess ecological changes produced by human societies. Thus, world-wide collaborations are needed to understand seabird ecology and to develop effective conservation measures benefitting both humans and seabird populations. This book provides a modern overview on seabird biodiversity studies: it begins by covering the most up-to-date techniques to study seabirds, and then focus on pragmatic issues related with interactions between seabirds and humans, the use of seabirds as ecological indicators and conservation of seabirds. It gives an updated insight on all these topics and highlights gaps that need further development for a comprehensive understanding of the relationships between seabirds and human actions. This book covers the response of the seabird research community to a biodiversity crisis aiming to contribute towards environmental sustainability. It should provide inspiration to a wide range of professionals and students, including the much needed world-wide collaboration between research groups and practitioners. In this way seabird research and conservation provide an inspiration for the solution of global issues such as climate change.

Environmental Health Narratives Emily Mendenhall, Adam Koon, 2012-08-15 Andrew woke up with a guinea worm coming out of his foot as a result of drinking unsafe water a year previously. Anjali awoke with a cough because smoke from kilns filled her dilapidated home. Tyler stayed home from school because he had a stomachache from eating bad beef. What are the links between the environments in which these young people live and their health problems? The stories, most set in poor communities, draw attention to the effects of air, water, food, climate, urbanization, and other human impacts on health. A comprehensive teaching guide provides a context from which readers can explore problems and solutions in environmental health.

Twisted Gift Jessi Elliott, I killed a fae leader and now I have to face the consequences. Where I used to stress over college classes, I now have to worry about being a leader to fae who despise me, all the while adjusting to my new diet of human emotions. As for Tristan—I'm still drawn to him in ways that steal my breath and leave me wanting more. There's no denying how strong we are together or the passion we once shared. And with a looming threat and fragile alliance between our people forcing us to work together again, it's dangerously easy to slip into old ways. And each other's beds. But I have to remember that we're on different sides now. Forbidden to be together, no matter how much I crave his touch. If only I can get my head and heart on the same page...

Computers in Earth and Environmental Sciences Hamid Reza Pourghasemi,2021-09-22 *Computers in Earth and Environmental Sciences: Artificial Intelligence and Advanced Technologies in Hazards and Risk Management* addresses the need for a comprehensive book that focuses on multi-hazard assessments, natural and manmade hazards, and risk management using new methods and technologies that employ GIS, artificial intelligence, spatial modeling, machine learning tools and meta-heuristic techniques. Southeast Asia (Routledge Revivals) Richard Higgott, Richard Robison, 2013-10-31 The articles in this edited collection, first published in 1985, consider the competing theories of the nature of development and underdevelopment in Southeast Asia. Each chapter challenges the academic orthodoxies and dominant traditions of Southeast Asian studies, particularly in relation to orientalist history, behaviourist political science and development economics. Overall, the contributions offer an alternative framework for analysis, which considers the structural changes to the political economy of Southeast Asia, as well as the relationship between the state, economy and class at a domestic level. This is a fascinating collection, of value to students and academics with an interest in Southeast Asian politics, economics and history.
