Memory in a Mediated World Andrea Hajek, Christine Lohmeier, Christian Pentzold, 2016-02-10 Considering both retrospective memories and the prospective employment of memories, *Memory in a Mediated World* examines troubled times that demand resolution, recovery and restoration. Its contributions provide empirically grounded analyses of how media are employed by individuals and social groups to connect the past, the present and the future.

Death and Digital Media Michael Arnold, Martin Gibbs, Tamara Kohn, James Meese, Bjorn Nansen, 2017-11-22 *Death and Digital Media* provides a critical overview of how people mourn, commemorate and interact with the dead through digital media. It maps the historical and shifting landscape of digital death, considering a wide range of social, commercial and institutional responses to technological innovations. The authors examine multiple digital platforms and offer a series of case studies drawn from North America, Europe and Australia. The book delivers fresh insight and analysis from an interdisciplinary perspective, drawing on anthropology, sociology, science and technology studies, human-computer interaction, and media studies. It is key reading for students and scholars in these disciplines, as well as for professionals working in bereavement support capacities.

The Routledge Companion to Digital Ethnography Larissa Hjorth, Heather Horst, Anne Galloway, Genevieve Bell, 2017-01-20 With the increase of digital

and networked media in everyday life, researchers have increasingly turned their gaze to the symbolic and cultural elements of technologies. From studying online game communities, locative and social media to YouTube and mobile media, ethnographic approaches to digital and networked media have helped to elucidate the dynamic cultural and social dimensions of media practice. The Routledge Companion to Digital Ethnography provides an authoritative, up-to-date, intellectually broad, and conceptually cutting-edge guide to this emergent and diverse area. Features include: a comprehensive history of computers and digitization in anthropology; exploration of various ethnographic methods in the context of digital tools and network relations; consideration of social networking and communication technologies on a local and global scale; in-depth analyses of different interfaces in ethnography, from mobile technologies to digital archives.

Online Doping Jesper Andreasson, April Henning, 2023-06-29 This book examines the bodies, communities, and cultures that evolve in different online doping spaces. By engaging in critical analysis of the interrelatedness of online and offline doped realities, the book provides a comprehensive analysis influenced by digital sociology and feminist theory. It focuses on the intersection of doping, bodies, and technology, and is structured around three interconnected themes prominent in doping research but less acknowledged in online environments: doping spaces and communities; gender and power relationships; and the relationship between online activities and

offline social life. Building on extensive online research with different drug communities and doping spaces, the authors illustrate how the online world of doping has developed into a digital ecosystem, and present an argument for understanding doping as a cyborgified concept. It will be of interest to students and researchers of sport and digital sociology, media studies, social work, drug studies and gender studies

Qualitative Research in Digital Environments Alessandro

Caliandro, Alessandro Gandini, 2016-12-08 This book offers a toolkit of methods and technologies to undertake qualitative research on digital spaces. Unlike commonly used traditional methodological strategies, which are 'retrofitted' to digital spaces, *Qualitative Research in Digital Environments* offers researchers a set of 'digitally native' tools that are designed for online social environments. Thanks to a broad range of cases including Louis Vuitton, YouTube and the concept of 'hipsterism', this text illustrates the practical applications of techniques and tools over the most popular social media environments. This book will be a valuable guide to qualitative research for marketing students, researchers and practitioners, as well as a central reference point for tutors in the growing field of Digital Sociology.

With over fifty recipes ranging from comfortably traditional to cutting-edge modern, Rick Rodgers expands the role of the beloved meatball inside *I Love Meatballs!* Dishes inspired by a variety of ethnicities including Italian, Thai, Chinese, Greek, Vietnamese, Swedish, Moroccan, and Indian are made from a full range of meats including beef and veal, pork, lamb, poultry, and even seafood. Divided into six

hunger-inducing categories, *I Love Meatballs!* shows meatballs as appetizers and dinner entrees, inside soups and breads, and (of course) with pasta, as well as meatballs sizzling off the grill. Praise for *I Love Meatballs!* “Each recipe is carefully written and easy to follow. . . . Rick’s Lamb Meatballs in Green Curry Sauce is so tasty, I want to make it over and over.” –Bruce Aidells, co-author of *The Complete Meat Cookbook* “[Rick Rodgers] has produced the last word on meatballs: which tools to use; how to grind your own meat, if you’d like; how to prepare them ahead of time; and even how to cheat using store-bought meatballs. The Complex Lives of Star Clusters David Stevenson, 2015-05-09 As with the author’s recent books *Extreme Explosions* and *Under a Crimson Sun*, the complex topic of star clusters is broken down and made accessible with clear links to other areas of astronomy in a language which the non-specialist can easily read and enjoy. The full range of topics are addressed regarding how star clusters are formed. Why is it some are dense conglomerates of stars while

others are looser associations? Are the young, brilliant clusters seen in neighboring galaxies such as the Large Magellanic Cloud, M33 or M82 analogous to the ancient globulars seen in the Milky Way? How will these clusters change as their stars wane and die? More interestingly, how does living in a dense star cluster affect the fates of the stars and any attendant planets that accompany them? Star clusters form many of the most dazzling objects in the astronomers' catalogs. Many amateur astronomers are interested in exploring how these objects are created and what it would be like to live among these objects. From the historical views of how star clusters came about to the most recent assumptions about how stars within these clusters evolve, different strands of science, from observation to theory, are woven together into a compelling investigation specifically targeted at amateur astronomers.
