Urban Living Labs Simon Marvin,Harriet Bulkeley,Lindsay Mai,Kes McCormick,Yuliya Voytenko Palgan,2018-05-03 All cities face a pressing challenge – how can they provide economic prosperity and social cohesion while achieving environmental sustainability? In response, new collaborations are emerging in the form of urban living labs – sites devised to design, test and learn from social and technical innovation in real time. The aim of this volume is to examine, inform and advance the governance of sustainability transitions through urban living labs. Notably, urban living labs are proliferating rapidly across the globe as a means through which public and private actors are testing innovations in buildings, transport and energy systems. Yet despite the experimentation taking place on the ground, we lack systematic learning and international comparison across urban and national contexts about their impacts and effectiveness. We have limited knowledge on how good practice can be scaled up to achieve the transformative change required. This book brings together leading international researchers within a systematic comparative framework for evaluating the design, practices and processes of urban living labs to enable the comparative analysis of their

potential and limits. It provides new insights into the governance of urban sustainability and how to improve the design and implementation of urban living labs in order to realise their potential.

Unlocking Orthodoxies for Inclusive Theologies Robert E. Shore-Goss, Joseph N. Goh, 2019-11-28 This book enters a new liminal space between the LGBTQ and denominational Christian communities. It simultaneously explores how those who identify as queer can find a home in church and how those leading welcoming, or indeed unwelcoming, congregations can better serve both communities. The primary argument is that queer inclusion must not merely mean an assimilation into existing heteronormative respectability and approval. Chapters are written by a diverse collection of Asian, Latin American, and U.S. theologians, religious studies scholars and activists. Each of them writes from their own social context to address the notion of LGBTQ alternative orthodoxies and praxes pertaining to God, the saints, failure of the church, queer eschatologies, and erotic economies. Engaging with issues that are not only faced by those in the theological academy, but also by clergy and congregants, the book addresses those impacted by a history of Christian hostility and violence who have become suspicious of attempts at acceptance. It also sets out an encouragement for queer theologians and clergy think deeply about how they form communities where queer perspectives are proactively included. This is a forward-looking and

positive vision of a more inclusive theology and ecclesiology. It will, therefore, appeal to scholars of Queer Theology and Religious Studies as well as practitioners seeking a fresh perspective on church and the LGBTQ community.

Social Influences on Eating C. Peter Herman, Janet Polivy, Patricia Pliner, Lenny R. Vartanian, 2019-09-05 This book examines how the social environment affects food choices and intake, and documents the extent to which people are unaware of the significant impact of social factors on their eating. The authors take a unique approach to studying eating behaviors in ordinary circumstances, presenting a theory of normal eating that highlights social influences independent of physiological and taste factors. Among the topics discussed: Modeling of food intake and food choice Consumption stereotypes and impression management Research design, methodology, and ethics of studying eating behaviors What happens when we overeat? Effects of social eating Social Influences on Eating is a useful reference for psychologists and researchers studying food and nutritional psychology, challenging commonly held assumptions about the dynamics of food choice and intake in order to promote a better understanding of the power of social influence on all forms of behavior.

The Sponsored Life Leslie Savan, 2010-06-17 How does a blatant lying in TV commercials—like Joe Isuzu's manic claims—create public trust in a product or a company? How does a company associated with a disaster, Exxon or Du Pont for example, restore its reputation? What is the real story behind the rendering of the now infamous Joe Camel? And what is the deeper meaning of living in an ad, ad, ad world? For a decade, journalist Leslie Savan has been exposing the techniques used by advertisers to push products and pump up corporate images. In the lively essays in this collection, Savan penetrates beneath the slick surfaces of specific ads and marketing campaigns to show how they reflect and shape consumer desires. Savan's interviews with ad agencies and corporate clients—along with her insightful analyses of influential TV spots—reveal how successful advertising works. Ads do more than command attention. They are signposts to the political, cultural, and social trends that infiltrate the individual consumer's psyche. Think of the products associated with corporate mascots—the drum-beating bunny, the cereal-pushing tiger, the doughboy—that have become pop culture icons. Think cool. Think of the clothing manufacturer that uses multiracial imagery. Think progressive. Buy their worldview, buy their product. When virtually every product can be associate with some positive self-image, we are subtly refashioned into the advertiser's concept of a good citizen. Like it or not,

we lead the sponsored life.
