Skeleton Keys Riley Black (Brian Switek), 2019-03-05 “A provocative and entertaining magical mineral tour through the life and afterlife of bone.” —Wall Street Journal Our bones have many stories to tell, if you know how to listen. Bone is a marvel, an adaptable and resilient building material developed over more than four hundred million years of evolutionary history. It gives your body its shape and the ability to move. It grows and changes with you, an undeniable document of who you are and how you lived. Arguably, no other part of the human anatomy has such rich scientific and cultural significance, both brimming with life and a potent symbol of death. In this delightful natural and cultural history of bone, Brian Switek explains where our skeletons came from, what they do inside us, and what others can learn about us when these artifacts of mineral and protein are all we've left behind. Bone is as embedded in our culture as it is in our bodies. Our species has made instruments and jewelry from bone, treated the dead like collectors' items, put our faith in skull bumps as guides to human behavior, and arranged skeletons into macabre tributes to the afterlife. Switek makes a compelling case for getting better acquainted with our skeletons, in all their surprising roles. Bridging the worlds of paleontology, anthropology, medicine, and forensics, *Skeleton Keys* illuminates the complex life of bones inside our bodies and out.

So she settled in and began reconnecting with old friends. Including Sid. Sid is the Thackery family's skeleton. He's lived in the house as long as Georgia can remember, although no one, including Sid, knows exactly where he came from and how he came to be a skeleton. Sid walks, he talks, he makes bad jokes, he tries to keep Georgia's dog from considering him a snack. And he manages to persuade Georgia to let him leave the house. But when she takes him to an anime convention—disguised as a skeleton, of course—he sees a woman who triggers

memories of his past. Now he is determined to find out how he died—with Georgia's help. But their investigation may uncover a killer who's still alive and well and bad to the bone...

Well, not so much starring in as being a prop. At least part of him has a part—he's using his head to play Yorick of "Alas, poor Yorick" fame. Every day, Georgia Thackery's daughter, Madison, who's also in the play, brings in his skull, and every night, she takes him home... Until one night when he's accidentally left at school—and hears the sounds of someone being murdered. But the next day, there's no body and no one seems to be missing. Sid is not a numbskull—he knows what he heard. Georgia thinks he imagined it—until a week later when a body is found. Now Georgia and Sid will both need to keep their heads as they stick their necks out and play sleuth to catch the conscience of a killer...
