To get up and running quickly and to learn to create the best-looking presentations--the ones that stand out in terms of content and visual appeal--readers need Microsoft Office PowerPoint 2007 for Windows: Visual QuickStart Guide. PowerPoint presenter extraordinaire Tom Negrino steps readers through the redesigned user interface and highlights the tools readers will use as they create their presentations. Trusted teacher Tom Negrino gives step-by-step instruction on using all the new features in PowerPoint 2007, such as using the dynamic SmartArt Diagrams, custom layouts, applying attractive new themes (change them in just one click!), and how to manipulate and work with your text, tables, charts, and other presentation elements in much richer ways than ever before. Readers learn about writing their presentation, gathering images and sound files, choosing a design, working with text, and adding graphics and slide effects and transitions. *Advanced Microsoft Office PowerPoint 2007* Wayne Kao, Jeff Huang, 2007-12-27 This is the only book that will help an intermediate PowerPoint user improve their skills to an advanced level. In doing so, they can benefit both professionally and personally. This is not a comprehensive book that will bore you with every detail of PowerPoint, but a guide to specific actions you can take to create the ultimate presentation. The book covers the powerful formatting engine new to PowerPoint 2007, and how it can be used for applying soft shadows, reflection, and glows to make a presentation look attractive. It also covers PowerPoint's new 3D engine. The book goes into deep technical detail about the Office 2007 theme engine and how color schemes, effect schemes, and font schemes work; as well as the new PowerPoint XML file format, showing you how to edit PowerPoint files without using PowerPoint at all. The authors walk through programming a macro and explain how to format shapes, diagrams, charts, text, tables with gradient and picture fills and different kinds of lines (e.g. a beveled compound line with a diamond arrowhead). Also covered are those all important slide show shortcuts that few people know about like -- seeing your private notes while presenting on a projector, starting the slide show from the current slide without fumbling through the user interface, and how to black out the slide show screen with one key press.
