Computer Vision: Specialized Processors for Real-Time Image Analysis Eduard Montseny,Joan Frau,1994-08-23 Computer vision falls short of human vision in two respects: execution time and intelligent interpretation. This book addresses the question of execution time. It is based on a workshop on specialized processors for real-time image analysis, held as part of the activities of an ESPRIT Basic Research Action, the Working Group on Vision. The aim of the book is to examine the state of the art in vision-oriented computers. Two approaches are distinguished: multiprocessor systems and fine-grain massively parallel computers. The development of fine-grain machines has become more important over the last decade, but one of the main conclusions of the workshop is that this does not imply the replacement of multiprocessor machines. The book is divided into four parts. Part 1 introduces different architectures for vision: associative and pyramid processors as examples of fine-grain machines and a workstation with bus-oriented network topology as an example of a multiprocessor system. Parts 2 and 3 deal with the design and development of dedicated and specialized architectures. Part 4 is mainly devoted to applications, including road segmentation, mobile robot guidance and navigation, reconstruction and identification of 3D objects, and motion estimation.

**Interactive Problem Solving Using Logo** Heinz-Dieter Boecker,Hal Eden,Gerhard Fischer,2014-05-22 This book is unique in that its stress is not on the mastery of a programming language, but on the importance and value of interactive problem solving. The authors focus on several specific interest worlds: mathematics, computer science, artificial intelligence, linguistics, and games; however, their approach can serve as a model that may be applied easily to other fields as well. Those who are interested in symbolic computing will find that Interactive Problem Solving Using LOGO provides a gentle introduction from which one may move on to other, more advanced computational frameworks or more formal analysis. What is of primary importance, however, is the text's ability -- through its presentation of rich, open-ended problems -- to effectively cultivate crucial cognitive skills.

*Specialized Discourses and Their Readerships* David Banks,Emilia Di Martino,2019-07-05 This volume studies the relationship between the writers of specialized text and their readers in a broad range of settings, including research, popularization and education. It offers younger researchers an insight into the targeting process, helping them consider the impact their work can have, and showing them how to achieve greater exposure. Further, it offers an invaluable reflective instrument for beginning and experienced researchers, drawing on a veritable treasure trove of their colleagues' experience. As such, it represents a way for researchers and students in linguistics and related disciplines to access issues from a different, insider perspective. Reader targeting has become a very sophisticated process, with authors often addressing their potential readers even in video. Compared to other forms of writing, academic writing stands out because authors are, in the majority of cases, also consumers of the same type of products, which makes them excellent "targeters."

Ecology and Morphology of Copepods Frank D. Ferrari,Brian P. Bradley,2013-04-18 Ecology and Morphology of Copepods is organized under the following general topics: Behavior, Feeding, Genetics, Horizontal Variations, Morphology, Phylogeny, Reproduction, Seasonal Changes, Vertical Distribution, plus two special sessions on copepods of the genus *Acartia* and cyclopoid/mosquito interactions. The Maxilliped Lecture, given by Dr. Arthur G. Humes of Boston University, clearly established the importance of copepods to the earth's organic diversity. The book consists of selected research articles from the different sections. The articles published here reflect the diverse research interests of copepodologists today, and are distinguished by their high quality. Their impact will ensure that this volume is consulted by a wide range of research biologists.

*Languages and Compilers for Parallel Computing* Gheorghe Almási,Calin Cascaval,Peng Wu,2007-06-11 This book constitutes the thoroughly refereed post-proceedings of the 19th International Workshop on Languages and Compilers for Parallel Computing, LCPC 2006, held in New Orleans, LA, USA in November 2006. The 24 revised full papers presented together with two keynote talks cover programming models, code generation, parallelism, compilation techniques, data structures, register allocation, and memory management.

Introduction to Privacy-Preserving Data Publishing Benjamin C.M. Fung,Ke Wang,Ada Wai-Chee Fu,Philip S. Yu,2010-08-02 Gaining access to high-quality data is a vital necessity in knowledge-based decision making. But data in its raw form often contains sensitive information about individuals. Providing solutions to this problem, the methods and tools of privacy-preserving data publishing enable the publication of useful information while protecting data privacy. Introduction to Privacy-Preserving Data Publishing: Concepts and Techniques presents state-of-the-art information sharing and data integration methods that take into account privacy and data mining requirements. The first part of the book discusses the fundamentals of the field. In the second part, the authors present anonymization methods for preserving information utility for specific data mining tasks. The third part examines the privacy issues, privacy models, and anonymization methods for realistic and challenging data publishing scenarios. While the first three parts focus on anonymizing relational data, the last part studies the privacy threats, privacy models, and anonymization methods for complex data, including transaction, trajectory, social network, and textual data. This book not only explores privacy and information utility issues but also efficiency and scalability challenges. In many chapters, the authors highlight efficient and scalable methods and provide an analytical discussion to compare the strengths and weaknesses of different solutions.

**Entrepreneurial Strategies of Professional Service Firms** Andreas B. Günther,2019-02-19 Over the past years, knowledge-intensive industries have gained significant importance as economic factor, giving rise to professional service firms (PSFs) such as law firms, accounting firms, or consultancies. Following this development, the

research interest especially in the strategies pursued by PSFs has grown substantially. However, past research focused mainly on strategies of established, mature PSFs, leaving academics as well as potential entrepreneurs without guidance on what newly founded, entrepreneurial PSFs should pay attention to in order to ensure lasting competitive advantages. Based on an explorative grounded theory analysis of two outstanding commercial law firm spin-offs in Germany, this work advances the research in this field. In addition to a detailed case study report, it offers a comprehensive theoretical framework and argues that PSFs have to employ a set of seven specific entrepreneurial strategies – including for example service delivery, people development, and client acquisition strategies – in order to successfully manage the entrepreneurial phase. In providing examples for the growing PSF industry, the findings on commercial law firm spin-offs also inform entrepreneurship research in other professions

**Restructuring the Professional Organization** David Brock,C. R. Hinings,Michael Powell,2012-09-10 In recent years the professions have undergone radical transformation. With the advent of rapidly changing markets, more sophisticated and demanding clients, deregulation and increased competition, the generalist professional partnerships have given way to larger, more corporate forms of organization, comprising increasingly autonomous specialist business units. This volume critically examines these changes through an examination of the archetypes which characterize accounting, health care and law practitioners. With examples drawn from Australia, Canada, the UK and the USA, Restructuring the Professional Organization will be of interest to all students of organization studies seeking to understand the issues and problems confronting the professions as they move to the new millennium. Topics covered include: \* a review of the models of professional organization \*drivers of change in professional organizations \* internal dynamics of changes in these organizations \* new organizational forms and archetypes.

**Mechanisms for Reliable Distributed Real-Time Operating Systems** J. Duane Northcutt,2014-05-10 Mechanisms for Reliable Distributed Real-Time Operating Systems: The Alpha Kernel deals with the Alpha kernel, a set of mechanisms that support the construction of reliable, modular, decentralized operating systems for real-time control applications. An initial snapshot of the kernel design and implementation is provided. Comprised of seven chapters, this volume begins with a background on the Alpha operating system kernel and its implementation, followed by a description of the programming abstractions created for the Alpha kernel. The third chapter defines the client interface provided by the kernel in support of the given programming abstractions, while the fourth chapter focuses on the functional design of the kernel. The hardware on which the kernel was constructed, as well as the implications of this hardware on the design and implementation of the kernel, is also examined. The final chapter compares Alpha with other relevant operating systems such as Hydra, Cronus, Eden, Argus, Accent, and Locus. This book will appeal to computer scientists, systems designers, and undergraduate and graduate students of computer science.
