Metaphor in Specialist Discourse J. Berenike Herrmann,Tony Berber Sardinha,2015-12-15 Metaphor in Specialist Discourse presents multiple perspectives on metaphor use in specialist and popularized discourse contexts. Using genre and register as starting parameters for deeper exploration, and pushing the boundaries further to open up new areas and possibilities, ten independent articles investigate metaphor use across a range of specialist domains of discourse, such as biology research articles, psychological counseling, soccer commentaries, workflow communication, and penal policy documents. Framed by two theoretical chapters, the book is a contribution to the study of metaphor use in distinct discourse settings that will be of value to linguists and metaphor scholars of different persuasions, graduate students of linguistics and related disciplines, and practitioners of specialized areas with an interest in (verbal or gestural) language use in their areas of expertise. It shows that aspects of discourse variation are the beginning of, not an afterthought to, accurate empirical metaphor studies.

The Heart Specialist Claire Holden Rothman,2011-06-07 “Based on the life of one of Canada’s pioneering female physicians, [this] novel paints an arresting portrait of an indomitable yet vulnerable young woman” (Booklist). Set in Quebec near the beginning of the twentieth century, The Heart Specialist is the epic story of Agnes White, a lonely orphaned girl fascinated by the “wrong” things—microscopes, dissections, and anatomy instead of more ladylike interests. When Agnes is young, her father, a French-Canadian doctor living in Montreal, is charged with the murder of his handicapped sister. Although he is eventually acquitted, his reputation is ruined, and he flees, abandoning Agnes and her pregnant mother. Less than a year later, her mother dies of consumption, leaving Agnes and her baby sister, Laure, on their own. From this tumultuous childhood, the story follows Agnes as she grows up yearning to track her father down—and to follow in his footsteps as a doctor, even though medical schools in Canada don’t yet admit women. She eventually finds a niche for herself as the curator of the McGill University pathology museum. But even as her professional star begins to rise, her life is solitary and her happiness remains incomplete. A world-renowned expert on the human heart, she still struggles to understand her own. Inspired by the career of Maude Abbott, one of Canada’s first female physicians, The Heart Specialist is a story about the mysterious, painful journey into selfhood, and a “brilliant first novel” (Publishers Weekly, starred review).

A Uro-Oncology Nurse Specialist’s Reflection on her Practice Journey Beverley Anderson,2022-03-22 This book provides a unique insight and background of a uro-oncology nurse’s career from a personal and professional perspective, one that encapsulates the ever changing dynamics in the nursing profession over 40 years - 1970’s to current, 2022. In writing this book, the objective is to devise a beneficial point of reference, one that is conducive to enlightening individuals within the healthcare profession and the wider context, on the art of reflection and acknowledging its benefits in terms of exploring their feelings and understanding their meaning. Reflection is a highly beneficial tool. In this context, the process enables the author to reflect constructively on her nursing career and practice, to highlight the positive as well as the negative aspects within that practice, and illustrate how the experiences gained have contributed to her development, personally and professionally, throughout that journey. Reflection includes deliberate reflection on experience, emotions, actions and responses and acknowledging how essential these have been to informing the author’s existing knowledge base and in ensuring a higher level of learning and understanding. In the continued quest to deliver optimal healthcare, the objective of reflection is in enabling healthcare individuals e.g. nursing students, newly qualified nurses or those considering change of nursing speciality, to better understand their patients from a holistic standpoint (physical, psychological, psycho-social, spiritual, cultural and economic) and ultimately, improving the individual patient’s overall experience – cancer or otherwise, as well as improving and enhancing practice outcomes. The importance of reflection and its contribution to increasing the healthcare professional’s self-awareness – emotional, personal and professional, is also well underlined. Various Modules and Case Studies within the book are used to explain and highlight key issues, and to enhance content and visual acuity.
