Policy Analysis in France Halpern, Charlotte,Hassenteufel, Patrick,Philippe Zittoun,2018-01-03 Understanding policy analysis in France requires first a thorough exploration of the distinction usually made in French academic and practitioner debates between policy studies and policy analysis--essentially the difference between studies of policy and studies designed for the use of policy. This book begins there, then delves into questions of how and by whom knowledge of policies is produced within and outside the French state, showing that while the tension between the two types of study is real, the continued exchange of ideas between them has led to an enrichment of both spheres. The book thus lays the foundation for a more systematic understanding of policy analysis in France.

Parties at War Andrew Thorpe,2009-01-08 Political parties formed the cornerstone of the liberal democracy for which Britain claimed it was fighting in the Second World War. However, that conflict represented the most sustained challenge to the British party system during the twentieth century. War forced the suspension of normal electoral politics, and exerted considerable extra demands on the time and loyalties of party activists and organizers. This all posed a serious challenge to the Conservative, Labour and Liberal parties. Parties at War uses an unusually broad and deep range of records of the main political parties to explore how they responded to the challenge of war. Extensive use of the local as well as the national-level papers of the major parties offers a fuller picture than ever previously attempted. Andrew Thorpe focuses on what parties actually did, at both local and national levels, to sustain their organization during the war. He assesses the varying impacts of war, not just on each of the parties, but also over time, and between the different regions and areas of Britain. Thorpe demonstrates how wartime struggles over organization had significance not just for the election of the first majority Labour government in 1945, but also for the longer-term development of 'party' in modern British politics.

Stalin and the Lubianka David R. Shearer,Vladimir Khaustov,2014-11-28 This fascinating documentary history is the first English-language exploration of Joseph Stalin's relationship with, and manipulation of, the Soviet political police. The story follows the changing functions, organization, and fortunes of the political police and security organs from the early 1920s until Stalin's death in 1953, and it provides documented detail about how Stalin used these organs to achieve and maintain undisputed power. Although written as a narrative, it includes translations of more than 170 documents from Soviet archives.

Competition Law in Japan Hiroshi Yamada,Ryohei Takai,Kaoru Harada,Katsutoshi Kataoka,2020-11-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in Japan covers every aspect of the subject-the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Japan will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.
