Spiral to the Stars Laura Harjo, 2019-06-25 All communities are teeming with energy, spirit, and knowledge, and *Spiral to the Stars* taps into and activates this dynamism to discuss Indigenous community planning from a Mvskoke perspective. This book poses questions about what community is, how to reclaim community, and how to embark on the process of envisioning what and where the community can be. Geographer Laura Harjo demonstrates that Mvskoke communities have what they need to dream, imagine, speculate, and activate the wishes of ancestors, contemporary kin, and future relatives—all in a present temporality—which is Indigenous futurity. Organized around four methodologies—radical sovereignty, community knowledge, collective power, and emergence geographies—*Spiral to the Stars* provides a path that departs from traditional community-making strategies, which are often extensions of the settler state. Readers are provided a set of methodologies to build genuine community relationships, knowledge, power, and spaces for themselves. Communities don't have to wait on experts because this book helps them activate their own possibilities and expertise. A detailed final chapter provides participatory tools that can be used in workshop settings or one on one. This book offers a critical and concrete map for community making that leverages Indigenous way-finding tools. Mvskoke narratives thread throughout the text, vividly demonstrating that theories come from lived and felt experiences. This is a must-have book for community organizers, radical pedagogists, and anyone wishing to empower and advocate for their community.

Stars! Stars! Stars! Bob Barner, 2012-04-06 In this lively book, award-winning author-artist Bob Barner takes readers on a ride through outer space to visit distant planets and dazzling stars. The simple rhyming

text and colorful torn-paper collage illustrations make this book perfect for the very youngest readers, and the Meet the Planets and Meet the Galaxy sections, both bursting with facts, will engage older readers as well. Stars! Stars! Stars! will rocket aspiring stargazers right out of this world!

The Fault in Our Stars John Green, 2012-01-10 The beloved, #1 global bestseller by John Green, author of *The Anthropocene Reviewed* and *Turtles All the Way Down* “John Green is one of the best writers alive.” –E. Lockhart, #1 bestselling author of *We Were Liars* “The greatest romance story of this decade.” –Entertainment Weekly #1 New York Times Bestseller • #1 Wall Street Journal Bestseller • #1 USA Today Bestseller • #1 International Bestseller Despite the tumor-shrinking medical miracle that has bought her a few years, Hazel has never been anything but terminal, her final chapter inscribed upon diagnosis. But when a gorgeous plot twist named Augustus Waters suddenly appears at Cancer Kid Support Group, Hazel’s story is about to be completely rewritten. From John Green, #1 bestselling author of *The Anthropocene Reviewed* and *Turtles All the Way Down*, *The Fault in Our Stars* is insightful, bold, irreverent, and raw. It brilliantly explores the funny, thrilling, and tragic business of being alive and in love.

What Do We Know about Stars and Galaxies? John Farndon, 2011 This volume describes the properties and facts about stars and galaxies.

How Long Do Stars Last? Emily Hudd, 2019-08 This book uncovers just how long stars last. Learn fascinating facts about their lifecycle. Read this book to find out more about the science behind the cycle.

The Stars Simon Newcomb, 1902

Seeing Stars James Muirden, 1998 Focuses on the stars as they are born, live, and die while also including descriptions of the sun, comets, shooting stars, and constellations.

The Formation of Stars Steven W. Stahler, Francesco Palla, 2008-07-11 This book is a comprehensive treatment of star formation, one of the most active fields of modern astronomy. The reader is guided through the subject in a logically compelling manner. Starting from a general description of stars and interstellar clouds, the authors delineate the earliest phases of stellar evolution. They discuss formation activity not only in the Milky Way, but also in other galaxies, both now and in the remote past. Theory and observation are thoroughly integrated, with the aid of numerous figures and images. In summary, this volume is an invaluable resource, both as a text for physics and astronomy graduate students, and as a reference for professional scientists.

Stars Lucy Fischer, Marcia Landy, 2004 From two distinguished academics, this book includes contributions from top scholars such as Richard Dyer, and brings together key writings and new perspectives on stars and stardom in cinema across the world.

Bright Burning Stars A.K. Small, 2019-05-21 “A compulsively readable story. I was breathless and battling tears up until the very last stunning turns onstage and beyond. A dazzling, heart-wrenching debut.” —Nova Ren Suma, #1 New York Times bestselling author of *The Walls Around Us* Would you die for the Prize? Best friends Marine Duval and Kate Sanders have trained since childhood at the Paris Opera Ballet School, where they’ve forged an inseparable bond through shared stories of family tragedies and a powerful love for dance. When the body of a student is found in the dorms just before the start of

their final year, Marine and Kate begin to ask themselves how far they would go for the ultimate prize: to be named the one girl who will join the Opera's prestigious corps de ballet. Would they cheat? Seduce the most talented boy in the school, dubbed the Demigod, hoping his magic will make them shine, too? Would they risk death for it? Neither girl is sure. But then Kate gets closer to the Demigod, even as Marine has begun to capture his heart. And as selection day draws near, the competition—for the Prize, for the Demigod—becomes fiercer, and Marine and Kate realize they have everything to lose, including each other. *Bright Burning Stars* is a stunning, propulsive story about girls at their physical and emotional extremes, the gutting power of first love, and what it means to fight for your dreams.

The Call of the Stars John Robert Kippax, 1914

The Shadow and Night Chris Walley, 2011-01-21 In the first book in the epic *Lamb among the Stars* series, author Chris Walley weaves the worlds of science and the spirit, technology and supernatural into something unique in science fiction. Twelve thousand years into the future, the human race has spread across the galaxy to hundreds of terraformed worlds. The effects of the Fall have been diminished by the Great Intervention, and peace and contentment reign under the gentle rule of the Assembly. But suddenly, almost imperceptibly, things begin to change. On the remotest planet of Farholme, Forester Merral D'Avanos hears one simple . . . lie. Slowly a handful of men and women begin to realize that evil has returned and must be fought. What will this mean for a people to whom war and evil are ancient history? Thus begins the epic that has been described as "If C. S. Lewis and Tolkien had written *Star Wars*." *The Shadow and Night* was previously published in two volumes: *The Shadow at Evening* and *The*

Power of the Night.

The Girl and the Stars Mark Lawrence, 2020-04-21 A stunning new epic fantasy series following a young outcast who must fight with everything she has to survive, set in the same world as **Red Sister**. In the ice, east of the Black Rock, there is a hole into which broken children are thrown. Yaz's people call it the Pit of the Missing and now it is drawing her in as she has always known it would. To resist the cold, to endure the months of night when even the air itself begins to freeze, requires a special breed. Variation is dangerous, difference is fatal. And Yaz is not the same. Yaz's difference tears her from the only life she's ever known, away from her family, from the boy she thought she would spend her days with, and has to carve out a new path for herself in a world whose existence she never suspected. A world full of difference and mystery and danger. Yaz learns that Abeth is older and stranger than she had ever imagined. She learns that her weaknesses are another kind of strength and that the cruel arithmetic of survival that has always governed her people can be challenged.

The Giver of Stars Jojo Moyes, 2019-10-08 #1 NEW YORK TIMES BESTSELLER | A REESE WITHERSPOON X HELLO SUNSHINE BOOK CLUB PICK "A great narrative about personal strength and really captures how books bring communities together." —Reese Witherspoon From the author of *The Last Letter from Your Lover*, now a major motion picture on Netflix, a breathtaking story of five extraordinary women and their remarkable journey through the mountains of Kentucky and beyond in Depression-era America Alice Wright marries handsome American Bennett Van Cleve, hoping to escape her stifling life in England. But small-town Kentucky quickly proves equally claustrophobic, especially

living alongside her overbearing father-in-law. So when a call goes out for a team of women to deliver books as part of Eleanor Roosevelt's new traveling library, Alice signs on enthusiastically. The leader, and soon Alice's greatest ally, is Margery, a smart-talking, self-sufficient woman who's never asked a man's permission for anything. They will be joined by three other singular women who become known as the Packhorse Librarians of Kentucky. What happens to them--and to the men they love--becomes an unforgettable drama of loyalty, justice, humanity, and passion. These heroic women refuse to be cowed by men or by convention. And though they face all kinds of dangers in a landscape that is at times breathtakingly beautiful, at others brutal, they're committed to their job: bringing books to people who have never had any, arming them with facts that will change their lives. Based on a true story rooted in America's past, *The Giver of Stars* is unparalleled in its scope and epic in its storytelling. Funny, heartbreaking, enthralling, it is destined to become a modern classic--a richly rewarding novel of women's friendship, of true love, and of what happens when we reach beyond our grasp for the great beyond.

How Many Stars in the Sky? Lenny Hort, 1997-01-20 Mama's away one night, and her son can't sleep. He tries to relax by counting stars, but the more of them he sees, the more determined he is to count every single one. Then the boy finds that Daddy can't sleep either. Together, the two of them set off on an unforgettable all-night journey of discovery.

Big Book of Stars and Planets Emily Bone, 2014-01-01

Stars Joan Marie Galat, 2020-09 Book introduces the reader to stars--

The Science of the Stars Edward Walter Maunder, 2015-12-06 The plan of the present series requires

each volume to be complete in about eighty small pages. But no adequate account of the achievements of astronomy can possibly be given within limits so narrow, for so small a space would not suffice for a mere catalogue of the results which have been obtained; and in most cases the result alone would be almost meaningless unless some explanation were offered of the way in which it had been reached. All, therefore, that can be done in a work of the present size is to take the student to the starting-point of astronomy, show him the various roads of research which have opened out from it, and give a brief indication of the character and general direction of each. That which distinguishes astronomy from all the other sciences is this: it deals with objects that we cannot touch. The heavenly bodies are beyond our reach; we cannot tamper with them, or subject them to any form of experiment; we cannot bring them into our laboratories to analyse or dissect them. We can only watch them and wait for such indications as their own movements may supply. But we are confined to this earth of ours, and they are so remote; we are so short-lived, and they are so long-enduring; that the difficulty of finding out much about them might well seem insuperable. Yet these difficulties have been so far overcome that astronomy is the most advanced of all the sciences, the one in which our knowledge is the most definite and certain. All science rests on sight and thought, on ordered observation and reasoned deduction; but both sight and thought were earlier trained to the service of astronomy than of the other physical sciences. It is here that the highest value of astronomy lies; in the discipline that it has afforded to man's powers of observation and reflection; and the real triumphs which it has achieved are not the bringing to light of the beauties or the sensational dimensions and distances of the heavenly bodies, but the vanquishing of difficulties which might well have seemed

superhuman. The true spirit of the science can be far better exemplified by the presentation of some of these difficulties, and of the methods by which they have been overcome, than by many volumes of picturesque description or of eloquent rhapsody. There was a time when men knew nothing of astronomy; like every other science it began from zero. But it is not possible to suppose that such a state of things lasted long, we know that there was a time when men had noticed that there were two great lights in the sky—a greater light that shone by day, a lesser light that shone by night—and there were the stars also. And this, the earliest observation of primitive astronomy, is preserved for us, expressed in the simplest possible language, in the first chapter of the first book of the sacred writings handed down to us by the Hebrews.

Stars and Atoms Sir Arthur Stanley Eddington, 1927

Invisible Stars Donna L. Halper, 2001 This artful social history considers our culture's expectations of women and how those expectations changed throughout the twentieth century, how the advent of television changed the landscape of employment opportunities for women in broadcasting, and how both television and radio communicate about gender roles.
