Colours in the Steel K. J. Parker,2013-05-07 *SPECIAL INTRODUCTORY PRICE* An epic novel of blood, betrayal, and intrigue. . . Perimadeia is the famed Triple City and the mercantile capital of the known world. Behind its allegedly impregnable walls, everything is available-including information that will allow its enemies to plan one of the most devastating sieges of all time. The man called upon to defend Perimadeia is Bardas Loredan, a fencer-at-law, weary of his work and the world. For Loredan is one of the surviving members of Maxen's Pitchfork, the legendary band of soldiers who waged war on the Plains tribes, rendering an attack on Perimadeia impossible. Until now, that is. But Loredan has problems of his own. In a city where court cases are settled by lawyers arguing with swords not words, enemies are all too easily made. And by winning one particular case, Loredan has unwittingly become the target of a young woman bent on revenge. The last thing he needs is the responsibility of saving a city.

Steel Phoenix Christopher G. L. Hall,1997 Steel Phoenix recounts the downfall of 'Big Steel' in America and the emergence of a new steel industry from the ashes of the old. Hall reveals how the death of the traditional steel industry devastated cities such as Pittsburgh, Cleveland and Youngstown. Hall then proceeds to examine how pioneering entrepreneurs and engineers rebuilt the industry by recycling large supplies of scrap steel, giving way to a 'minimill' industry which ultimately saved what was left of old Big Steel mills. The story of an industry's surprising rebirth and restoration, Steel Phoenix is a riveting analysis and a necessary resource for any student of American business and history.

High Steel Jim Rasenberger,2009-10-13 A powerful first-hand account of the many generations and ethnic groups of men who have built America's skyscrapers. From the early days of steel construction in Chicago, through the great boom years of New York city ironwork, and up through the present, High Steel follows the trajectory of careers inextricably linked to both great accomplishment and catastrophic disaster. The personal stories reveal the lives of ironworkers and the dangers they face as they walk across the windswept, swaying summits of tomorrow's skyscrapers, balanced on steel girders sometimes only six inches wide. Rasenberger explores both the greatest accomplishments of ironwork—the vaulting bridges and towers that define America's skyline—and the deadliest disasters, such as the Quebec Bridge Collapse of 1907, when 75 ironworkers, including 33 Mohawk Indians, fell to their deaths. High Steel is an accessible, thrilling, and vertiginous portrait of the lives of some of our most brave yet unrecognized men.
