Storm Blueprints: Patterns for Distributed Real-time Computation P. Taylor Goetz,Brian O'Neill,2014-03-26 A blueprints book with 10 different projects built in 10 different chapters which demonstrate the various use cases of storm for both beginner and intermediate users, grounded in

real-world example applications. Although the book focuses primarily on Java development with Storm, the patterns are more broadly applicable and the tips, techniques, and approaches described in the book apply to architects, developers, and operations. Additionally, the book should provoke and inspire applications of distributed computing to other industries and domains. Hadoop enthusiasts will also find this book a good introduction to Storm, providing a potential migration path from batch processing to the world of real-time analytics.

Stormwater Discharge Management Frank R. Spellman,Joanne Drinan,2003 This comprehensive resource provides engineers, managers, compliance specialists, construction professionals, and

students with the tool they need to understand and comply with the requirements of the Code of Federal Regulations (CFR) Title 40 Part 122 stormwater regulations. Stormwater Discharge Management covers the full spectrum of stormwater issues, including stormwater regulations, NPDES permitting, minimum control measures, activities-based discharges, overflows, stormwater monitoring, stormwater enforcement strategy, and the new Stormwater Phase II Rule, which mandated compliance March 10, 2003. Readers will learn who meets the criteria for compliance under this rule and how compliance can be achieved in construction activity, agricultural activity, and marine activity. To help simplify the process, the authors identify each and every compliance requirement, from examining the different types of stormwater discharge permits to writing an effective Stormwater Pollution Prevention Plan (SWPPP). They also include actual EPA field enforcement practices and best management practices to help readers ensure compliance success. Readers will gain a clearer appreciation for the stormwater regulations by reviewing the objectives of the Clean Water Act, the purpose and requirements of the National Pollutant Discharge Elimination System (NPDES), and the types of

discharges/facilities affected by the laws.

Social Marketing to Protect the Environment Doug McKenzie-Mohr, Nancy R. Lee, Philip Kotler, P. Wesley Schultz, 2011-05-11 Social marketing takes key marketing principles and applies them to campaigns and efforts to influence social action. In *Social Marketing to Protect the Environment*, the focus turns to the environment, and how social marketing can be successful to change environmental behaviour. The text begins with a definition of the Social Marketing Model and includes a discussion of various tools that can be used to develop social marketing strategies. It then moves into sections on Residential-Related Behaviours and Commercial-Related Behaviours. These sections follow a consistent format and: - Describe a variety of environmental issues - Give examples of the numerous

changes in behaviours and/or practices that would contribute to reducing the problem - Provide mini-cases that illustrate the successful use of social marketing principles along with tools to influence this behaviour in similar situations - Review what worked and what could have been improved. A final section provides future directions and recommendations.
