**When Beauty Fades** Clement U. Ewulum,2013-06 The book portrays the end result of envy and jealousy in human lives. It gives us an insight on the need to make hay while the sun shines, which implies planning for the future as against the backdrop of planning in the future. The story is a tragedy of two brothers; Wilson and Kenekchukwu and their only sister Nene. The success story of Kenekchukwu after years of struggle, led to his being cut down in his prime by a beloved. Nene's fantasies of her dream husband almost ruined her, but for her counterintuitive move. Wilson, who felt he could cheat on nemesis, paid a grave price with his innocent family.

**How to Talk Dirty and Influence People** Lenny Bruce,2016-08-02 During the course of a career that began in the late 1940s, Lenny Bruce challenged the sanctity of organized religion and other societal and political conventions and widened the boundaries of free speech. His influence on the worlds of comedy, jazz, and satire is incalculable, and How to Talk Dirty and Influence People--now republished to coincide with the 50th anniversary of Lenny Bruce's death--remains a brilliant existential account of his life and the forces that made him the most important and controversial entertainer in history.

**Birkbeck Word Association Norms** Helen Moss, Lianne Older, 1996 This is a reference work containing free association norms for over 2000 words in the English language collected over the last eight years from groups of 40-50 British English speakers aged between 17 and 45. These norms provide the information that, for example, 67% of people give dog as the first word they think of in response to the word cat, that 24% give the word society in response to the word pillar, and given the name Michael, 65% say Jackson, whereas less than 5% say Heseltine or Caine. These norms will be of use to researchers and students in many fields of psychology, especially language and memory, where the degree of association between pairs of words is often an important experimental variable. The main part of the book contains an alphabetical list of all associative responses and their frequency for each of the 2464 stimulus words. In addition, there is an index of stimulus words organised according to semantic category to aid selection of experimental materials. Full methodological details of the collection and compilation of the data are also provided in the introduction.
