**Solar Storm** Allan Morey,2019-08-01 The Sun is a major component in the existence of life on Earth. Could it also bring about the end? Energy often shoots coronal mass ejections into space. A massive CME on course for Earth could cause a solar storm with devastating results! This high-interest title explores how the world could end from a solar storm, from electrical shutdowns to disastrous food shortages. Fun facts add fascinating bonus information while the look back feature provides a glimpse into a past solar storm. Find out the science behind solar storms and what we can do to save ourselves in this world-ending title!

*Sun Storm* Marlow Kelly,2017-08-11 Dr. Marie Wilson is a scientist on the verge of a breakthrough. She has come to Montana on the eve of a blizzard to prove her small, portable solar panel can generate electricity even in the harshest environment. But when four men invade her remote cabin with plans to kill her, she knows she's in trouble. Ex-Special Forces soldier, David Quinn, has had enough of danger and death. All he wants is to be left alone on his Montana acreage to pursue his dream of being a beekeeper. But when his old mentor convinces him to help retrieve a stolen solar panel, he thinks it will be a simple job. But the moment he sets eyes on Marie, he knows their assignment is all kinds of wrong. Together, they escape. Chased by a businessman with unlimited resources, a gunman and a corrupt police force, they are thrust into the frozen Montana landscape. Can a cynical soldier and a naive scientist learn about love and trust in order to survive?

Solar Flares Whitley Strieber,2012-12-11 There is a force out there that could destroy our world in minutes. . . . Solar flares—brief bursts of radiation from our sun—have always existed and have never been particularly dangerous. Nature hasn’t changed. But we have. By making our world so dependent on electricity delivered by huge, unprotected power grids we have inadvertently placed humanity at terrible risk. As bestselling author Whitley Strieber explores in this urgent new work, a powerful solar flare could demolish our electrical delivery system, wiping away centuries of civilization in minutes and drastically changing our world. Such a scenario is altogether plausible—and it is the single most dangerous single thing that could happen to our civilization, more dangerous than the most massive earthquake or volcano, more dangerous than climate change, more dangerous even than nuclear war. What is worse, solar flares of a now-dangerous intensity are not all that uncommon; and not only that, our electrical and electronic infrastructure is becoming so extensive, and thus so fragile, that smaller and smaller solar flares can pose more and more serious hazards. Due to the astonishing unwillingness of power companies to cooperate, good programs that would make us safer, and that are supported by both political parties, have been routinely prevented from being enacted. In Solar Flares: What You Need to Know, Strieber reveals the dangers behind solar flares, tracks the disastrous damage they could cause, surveys what they would do to our world in the here-and-now, and explains what nations and individuals must do to prepare for them.

He's ready to celebrate the first year of his new marriage as he adjusts to an empty nest and a new stage in life. But the sun had other plans and sent a coronal mass ejection as an anniversary present. Awakened before dawn one morning in mid-December by northern lights that blanket the sky—in central Illinois—Jay's world changes in the blink of an eye. Flying a planeload of passengers to Hawaii, his wife Kate experiences the CME in a whole other light and must fight to stay alive every step of the way. Leah, Jay's daughter, witnesses the impact through the eyes of a student far from home. Jay must decide to stay and wait for news of his wife or leave before things get worse to find his daughter. The problem is, with no electricity, he doesn't know how bad it is...anywhere. Will he set out to rescue his daughter and make a harrowing journey through a post-apocalyptic wasteland only to find the power is still on, two states away? In a world where electricity is a thing of the past, can there be any hope for the future? After all, it's not a matter of if a CME will strike the earth, but when.

*Solar Storms* Linda Hogan,1997-02-26 From Pulitzer Prize finalist Linda Hogan, Solar Storms tells the moving, “luminous” (Publishers Weekly) story of Angela Jenson, a troubled Native American girl coming of age in the foster system in Oklahoma, who decides to reunite with her family. At seventeen, Angela returns to the place where she was raised—a stunning island town that lies at the border of Canada and Minnesota—where she finds that an eager developer is planning a hydroelectric dam that will leave sacred land flooded and abandoned. Joining up with three other concerned residents, Angela fights the project, reconnecting with her ancestral roots as she does so. Harrowing, lyrical, and boldly incisive, Solar Storms is a powerful examination of the clashes between cultures and traumatic repercussions that have shaped American history.

One Sun Storm Endi Bogue Hartigan, 2008 Winner of the 2008 Colorado Prize for Poetry Published by the Center for Literary Publishing at Colorado State University Endi Bogue Hartigan's poems are enveloping: one is immersed in experiences of ice drifts, orange peels, and the striving toward a clarity (Let us be clear, one poem reiterates) that crystallizes and then evaporates. Subjects and objects are beautifully combined and confused through repetitions both musical and mysterious; each separate thing helps to form the existence of another. A reader is drawn into a process of thinking - a kind of sifting and sorting - ambitious for the large world that is always beyond one's grasp. One Sun Storm is not a mere collection, but a total project in which each poem is part of the whole. The passing by of the pieces of this created world engenders gratitude and awe. - Martha Ronk, final judge and author of Vertigo, In a Landscape of Having to Repeat, and Why/Why Not
