What Stands in a Storm Kim Cross,2016-03 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America’s biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it’s a story of survival; for others it’s the story of their last hours. Cross’s immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that’s just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

**Over the Storm of Life** J. O. Y. Aladetan,2016-02-12 Many have surrendered to the lies that the devil tells them while going through challenges. They have given up their destiny and lost focus on eternity as they face the storms of life. Many have cursed themselves, abandoned their vision, and renounced God during their trials of faith, becoming atheists, sorcerers, and occultists and completely turning away from God. Is anything too difficult for God to do? No. Over the Storm of Life was written to inform, to inspire, to bless, and to transform lives and strengthen faith. Faith is called the spiritual horsepower that God has wonderfully and marvelously planted in all human DNA. We can exercise dominion power, like Him and like Jesus Christ, over every storm in our lives. This book is a revelation of the secret armor of God against every storm that tries to contend with the will of God in human lives, showing God’s faithfulness and trustworthiness from eternity past to eternity without end. God will never fail in whatever He wills and promises to do, even when physical circumstances and situations suggest otherwise. Success begins where failure ends! Failure and tribulation are the ladders to move you to the next level when you activate the spiritual horsepower of faith. Trust God’s Word and His covenant promises. Don’t settle for the rat race. Strive for God’s inheritance.

**The Whirlwind World of Hurricanes with Max Axiom, Super Scientist** Katherine E. Krohn,2011 In graphic novel format, follows the fictional adventures of Max Axiom as he explores the science and history behind hurricanes.

When the Sky Breaks Simon Winchester,2017-01-31 New York Times bestselling author Simon Winchester looks at which way the wind blows in this exciting book about giant storms. Simon Winchester is an avid weather watcher. He’s scanned the skies in Oklahoma, waiting for the ominous “finger” of a tornado to touch the Earth. He’s hunkered down in Hong Kong when typhoon warning signals went up. He’s visited the world’s hottest and wettest places, reported on fierce whirlpools, and sailed around South Africa looking for freak winds and waves. He knows about the worst weather in the world. A master nonfiction storyteller, Winchester looks at how, when, where, and why hurricanes, typhoons, cyclones, and tornadoes start brewing, how they build, and what happens when these giant storms hit. His lively narrative also includes an historical look at how we learned about weather systems and where we’re headed because of climate change. Stunning photographs illustrate the power of these giant storms.

The Planet in Peril series answers these questions and many more, looking at three case studies of recent natural disasters to see what happened, how people coped in the aftermath, and how governments, charities and aid agencies work together to rebuild devastated communities.

**Superstorm** Kathryn Miles,2014-10-16 The first complete moment-by-moment account of the largest Atlantic storm system ever recorded—a hurricane like no other The sky was lit by a full moon on October 29, 2012, but nobody on the eastern seaboard of the United States could see it. Everything had been consumed by cloud. The storm’s immensity caught the attention of scientists on the International Space Station. Even from there, it seemed almost limitless: 1.8 million square feet of tightly coiled bands so huge they filled the windows of the Station. It was the largest storm anyone had ever seen. Initially a tropical storm, Sandy had grown into a hybrid monster. It charged across open ocean, picking up strength with every step, baffling meteorologists and scientists, officials and emergency managers, even the traditional maritime wisdom of sailors and seamen: What exactly was this thing? By the time anyone decided, it was too late. And then the storm made landfall. Sandy was not just enormous, it was also unprecedented. As a result, the entire nation was left flat-footed. The National Oceanic and Atmospheric Administration couldn’t issue reliable warnings; the Coast Guard didn’t know what to do. In Superstorm, journalist Kathryn Miles takes readers inside the maelstrom, detailing the stories of dedicated professionals at the National Hurricane Center and National Weather Service. The characters include a forecaster who risked his job to sound the alarm in New Jersey, the crew of the ill-fated tall ship Bounty, Mayor Bloomberg, Governor Christie, and countless coastal residents whose homes—and lives—were torn apart and then left to wonder . . . When is the next superstorm coming?
