About 53 minutes after departure, the flight crew smelled an abnormal odour in the cockpit. They decided to divert to the Halifax International Airport. They were unaware that a fire was spreading above the ceiling in the front area of the aircraft. They would never make it to Halifax, 20 minutes after the first detection of smoke in the cabin the aircraft crashed in the North Atlantic near Peggy's Cove, Nova Scotia, Canada. There were no survivors, 229 people died in the incident.

Changes in the Air Eleonora Rohland,2018-10-19 Hurricanes have been a constant in the history of New Orleans. Since before its settlement as a French colony in the eighteenth century, the land entwined between Lake Pontchartrain and the Mississippi River has been lashed by powerful Gulf storms. Time and again, these hurricanes have wrought immeasurable loss and devastation, spurring reinvention and ingenuity on the part of inhabitants. *Changes in the Air* offers a rich and thoroughly researched history of how hurricanes have shaped and reshaped New Orleans from the colonial era to the present day, focusing on how its residents have adapted to a uniquely unpredictable and destructive environment across more than three centuries.

found at Gunlom Falls in Kakadu National Park, the Northern Territory Police are determined to uncover the truth behind his murder. Tensions are high between the Traditional Owners, government and a global miner, as the dispute over the environmental clean up of Ranger Uranium Mine continues. Meanwhile, is there a cover up of government funds behind a gas fracking mine on aboriginal land and a port too close to cultural sites in Darwin. An indigenous paleo astronomy course field trip in Kakadu, brings together a young Norwegian marine biologist, an astronomer from Edinburgh, and an archaeologist from Sydney. As the disparate group of characters navigate between the worlds of politics and culture, they uncover secrets that could explain the murder.

Southern Storm Samme Chittum, 2018-04-03 The gripping true tale of a devastating plane crash, the investigation into its causes, and the race to prevent similar disasters in the future. On the afternoon of April 4, 1977, Georgia housewife Sadie Burkhalter Hurst looked out her front door to see a frantic stranger running toward her, his clothes ablaze, and behind him the mangled fuselage of a passenger plane that had just crashed in her yard. The plane, a Southern Airways DC-9-31, had been carrying eighty-one passengers and four crew members en route to Atlanta when it entered a massive thunderstorm cell that turned into a dangerous cocktail of rain, hail, and lightning. Forced down onto a highway, the plane cut a swath of devastation through the small town of New Hope, breaking apart and killing bystanders on the ground before coming to rest in Hurst's front yard. Ultimately, only twenty-two people would survive the crash of Flight 242, and urgent questions immediately arose. What caused the pilots to fly into the storm instead of away from it? Could the crash have been prevented? *Southern Storm* addresses these issues and many more, offering a fascinating insider's look at this dramatic disaster and the systemic overhauls that followed it.

From weather observations to atmospheric and climate sciences in Switzerland Saskia Willemse, Markus Furger, 2016-06-02 In 2016 the Swiss Society for Meteorology (Schweizerische Gesellschaft für Meteorologie, SGM) celebrates its 100th anniversary. Compared to other meteorological societies it is not among the oldest ones. Nevertheless, meteorology has gone through such a remarkable evolution in the past 100 years that it is worthwhile to take a look back and recapitulate the developments of both science and SGM – and to reveal their interaction. The idea of this book is to give an overview of what has happened in the field of atmospheric sciences in Switzerland since the first systematic long-term meteorological observations until today.
