Statistics for Business and Economics Thomas Arthur Williams, 2020

Computer Networks Andrew S. Tanenbaum, David J. Wetherall, 2013-07-23 Appropriate for Computer Networking or Introduction to Networking courses at both the undergraduate and graduate level in Computer Science, Electrical Engineering, CIS, MIS, and Business Departments. Tanenbaum takes a structured approach to explaining how networks work from the inside out. He starts with an explanation of the physical layer of networking, computer hardware and transmission systems; then works his way up to network applications. Tanenbaum's in-depth application coverage includes email; the domain name system; the World Wide Web (both client- and server-side); and multimedia (including voice over IP, Internet radio video on demand, video conferencing, and streaming media).

AI Approaches to the Complexity of Legal Systems - Models and Ethical Challenges for Legal Systems, Legal Language and Legal Ontologies, Argumentation and Software Agents Monica Palmirani, Ugo Pagallo, Pompeu Casanovas, Giovanni Sartor, 2012-11-28 The inspiring idea of this workshop series, Artificial Intelligence Approaches to the Complexity of Legal Systems (AICOL), is to develop models of legal knowledge concerning organization, structure, and content in order to promote mutual understanding and communication between different systems and cultures. Complexity and complex systems describe recent developments in AI and law, legal theory, argumentation, the Semantic Web, and multi-agent systems. Multisystem and multilingual ontologies provide an important opportunity to integrate different trends of research in AI and law, including comparative legal studies. Complexity theory, graph theory, game theory, and any other contributions from the mathematical disciplines can help both to formalize the dynamics of legal systems and to capture relations among norms. Cognitive science can help the modeling of legal ontology by taking into account not only the formal features of law but also social behaviour, psychology, and cultural factors. This book is thus meant to support scholars in different areas of science in sharing knowledge and methodological approaches. This volume collects the contributions to the workshop's third edition, which took place as part of the 25th IVR congress of Philosophy of Law and Social Philosophy, held in Frankfurt, Germany, in August 2011. This volume comprises six main parts devoted to each of the six topics addressed in the workshop, namely: models for the legal system ethics and the regulation of ICT, legal knowledge management, legal information for open access, software agent systems in the legal domain, as well as legal language and legal ontology.

Computer Networks Andrew S. Tanenbaum, 2003 Details descriptions of the principles associated with each layer and presents many examples drawn from the Internet and wireless networks.

Santiago's Road Home Alexandra Diaz, 2020-05-05 "With every chapter, readers will be further immersed in Santiago's story as they root for his triumph over injustice." –Booklist (starred review) "With unflinching conviction, Diaz sketches a frank, brief account of refugee youth in an uncaring bureaucratic system." –Kirkus Reviews (starred review) "Harrowing but deeply illuminating." –School Library Journal "Diaz's crucial narrative

shines a disconcerting light on the plight of children in US detention centers along the southern border.”
–Publishers Weekly (starred review) A young boy gets detained by ICE while crossing the border from Mexico to the United States in this timely and unflinching novel by award-winning author Alexandra Diaz. The bed creaks under Santiago’s shivering body. They say a person’s life flashes by before dying. But it’s not his whole life. Just the events that led to this. The important ones, and the ones Santiago would rather forget. The coins in Santiago’s hand are meant for the bus fare back to his abusive abuela’s house. Except he refuses to return; he won’t be missed. His future is uncertain until he meets the kind, maternal María Dolores and her young daughter, Alegría, who help Santiago decide what comes next: He will accompany them to el otro lado, the United States of America. They embark with little, just backpacks with water and a bit of food. To travel together will require trust from all parties, and Santiago is used to going it alone. None of the three travelers realizes that the journey through Mexico to the border is just the beginning of their story.

The Professor Myles Palmer, 2011-03-31 Idealistic, passionate and scientific, Arsène Wenger led the modernisation of English football. A star-maker who identifies and nurtures talent, he also opened the door for foreign coaches like Houllier, Eriksson, Ranieri and Mourinho. He is Arsenal's most successful and longest-serving manager and the only manager in FA Premier League history to go through an entire season without a loss. Now completely revised and updated to include Arsenal's triumphant campaign to the 2006 Champion's League final, Wenger's induction into the English Football Hall of Fame and all the highlights from the 2007/08 season, The Professor tracks the highs and lows of Wenger's decade at Arsenal, his teams, his methods, his successes and failures, and asks what the future holds for the man who reinvented the beautiful game.

The Football Men Simon Kuper, 2011-05-12 The great footballers and coaches are rarely glimpsed from up close. They shield themselves from the tabloids, hide their personalities behind professionalism, and in the words of the cliché, 'do their talking on the pitch'. This book gets up close to them. The Football Men is not a series of celebrity profiles, and it doesn't attempt to unearth secrets in the players' private lives. Rather, it portrays these men as three-dimensional human beings. It describes their upbringings, the football cultures they grew up in, the way they play, and the baggage that they bring to their relationships at work. This multimillion-pound, multinational world is mostly inhabited by ordinary men. The profiles in this book are sometimes funny, but never breathless or sensational. Some of the profiles in this book are based on interviews; others are the results of time the author spent with that person; sometimes the profile is a story of a country. All are fascinating and shed light on their subject to reveal things you wouldn't expect. From one of the great sports writers of our time this is a penetrating and surprising collection of articles on the figures that have defined the modern sporting world.

3rd Symposium of Ubiquitous Computing and Ambient Intelligence 2008 Juan Manuel Corchado Rodríguez, Dante Tapia, Jose Bravo, 2008-09-16 The Symposium on Ubiquitous Computing and Ambient Intelligence (UCAmI) began as a workshop held in 2003 in San Sebastián (Spain) under the Spanish Artificial Intelligence Conference. This event

gathered 32 attendees and 18 papers were presented. The second edition, already as a Symposium, took place in Granada (Spain) under the first Spanish Computer Science Conference (CEDI). Later, in 2006, a second workshop was celebrated in Ciudad Real and, in 2007; the second Symposium was organized in Zaragoza by the CEDI conference. Now we continue to work on the organization of this event in Salamanca, a beautiful Spanish city. The European Community and the Sixth and Seventh Framework Programs encourage researchers to explore the generic scope of the AmI vision. In fact, some researchers have a crucial role in this vision. Emile Aarts from Philips describes Ambient Intelligence as the integration of technology into our environment, so that people can freely and interactively utilize it. This idea agrees with the proposal of Mark Weiser regarding the Ubiquitous Computing paradigm.

Safe Within These Walls Andra Medea, 2013-11-27 In the wake of school tragedies and the growing concern about creating safe environments for children, teachers, parents, and school personnel, this resource provides practical techniques and guidelines for de-escalating aggression with insight and finesse rather than with force. Andra Medea, an instructor in conflict management and nationally recognized expert, developed the Virtual Tranquilizer, a set of non-contact de-escalation techniques used by psychiatric staff, school administrators, and even court personnel. In this readily accessible book, she explains how to manage aggression from tantrums to mental health

issues and school shootings, using anecdotes, research-informed techniques, and, at times, humor. Readers will find the concrete tools they need to create a positive climate in which they recognize signs of building aggression and use practical techniques to head it off: demonstrating that the best way to handle violence is to keep it from happening in the first place.

Principles of Engineering Economy Eugene Lodewick Grant, William Grant Ireson, Richard S. Leavenworth, 1982 The Eighth Edition of the standard engineering economy text and reference explains the principles and techniques needed for making decisions about the acquisition and retirement of capital goods by industry and government, as well as alternative types of financing and other applications. Arranged in four parts: basic concepts, principles, and mathematics; procedures and methods for evaluating alternatives; techniques for handling special situations; and special applications. Introduces the use of computers and spreadsheets in evaluating engineering alternatives. Includes up-to-date coverage of federal tax legislation, extensive discussions and problems dealing with personal finance, and material on handling multiple alternatives by rate of return and benefit/cost ratio methods. Contains numerous examples and 476 problems, many entirely new. Accompanied by a complete solutions manual for the instructor.

Everyware Adam Greenfield, 2010-03-10 Ubiquitous computing--almost imperceptible, but everywhere around us--is rapidly becoming a reality. How will it change us? how can we shape its emergence? Smart buildings, smart furniture, smart clothing... even smart bathtubs. networked street signs and self-describing soda cans. Gestural interfaces like those seen in Minority Report. The RFID tags now embedded in everything from credit cards to the family pet. All of these are facets of the ubiquitous computing author Adam Greenfield calls everywhere. In a series of brief, thoughtful meditations, Greenfield explains how everywhere is already reshaping our lives, transforming our understanding of the cities we live in, the communities we belong to--and the way we see ourselves. What are people saying about the book? Adam Greenfield is intense, engaged, intelligent and caring. I pay attention to him. I counsel you to do the same. --HOWARD RHEINGOLD, AUTHOR, SMART MOBS: THE NEXT SOCIAL REVOLUTION A gracefully written, fascinating, and deeply wise book on one of the most powerful ideas of the digital age--and the obstacles we must overcome before we can make ubiquitous computing a reality.--STEVE SILBERMAN, EDITOR, WIRED MAGAZINE Adam is a visionary. he has true compassion and respect for ordinary users like me who are struggling to use and understand the new technology being thrust on us at overwhelming speed.--REBECCA MACKINNON, BERKMAN CENTER FOR INTERNET AND SOCIETY, HARVARD UNIVERSITY Everywhere is an AIGA Design Press book, published under Peachpit's New Riders imprint in partnership with AIGA.
