Urban Space as Heritage in Late Colonial Cuba Paul Niell, 2015-05-15

According to national legend, Havana, Cuba, was founded under the shade of a ceiba tree whose branches sheltered the island's first Catholic mass and meeting of the town council (cabildo) in 1519. The founding site was first memorialized in 1754 by the erection of a baroque monument in Havana's central Plaza de Armas, which was reconfigured in 1828 by the addition of a neoclassical work, El Templete. Viewing the transformation of the Plaza de Armas from the new perspective of heritage studies, this book investigates how late colonial Cuban society narrated Havana's founding to valorize Spanish imperial power and used the monuments to underpin a local sense of place and cultural authenticity, civic achievement, and social order. Paul Niell analyzes how Cubans produced heritage at the site of the symbolic ceiba tree by endowing the collective urban space of the plaza with a cultural authority that used the past to validate various place identities in the present. Niell's close examination of the extant forms of the 1754 and 1828 civic monuments, which include academic history paintings, neoclassical architecture, and idealized sculpture in tandem with period documents and printed texts, reveals a dissonance of heritage—in other words, a lack of agreement as to the works' significance and use. He considers the implications of this dissonance with respect to a wide array of interests in late colonial Havana, showing how heritage as a dominant cultural discourse was used to manage and even disinherit certain sectors of the colonial population.

Experiment in Literacy Jane M. Rausch, 2012-08-21 In his recent thesis, *Radio Sutatenza y Accin Cultural Popular (ACPO): Los Medios de Comunicacin para la Educacin del Campesino Colombiano*, (Bogot: Universidad de los Andes, 2009) Jos Arturo Rojas Martnez offers a comprehensive summary of the efforts of Radio Sutatenza, the radio network begun in 1947 by padre Jos Joaquin Salcedo, to create escuelas radiofnicas (radio schools) for the purpose of teaching illiterate adult campesinos (peasants) throughout Colombia not only how to read and write, but also how to better their living conditions and those of their communities. Within twenty years, the project which Rojas Martnez describes as the most important radio experiment of the Catholic Church, grew to include more than 20,000 individual radio schools with an enrollment of some 160,000 to 220,000 students. Consolidated within the Catholic Church in 1949 as Accin Cultural Popular (ACPO), the schools were reinforced by a widely read weekly newspaper, *El Campesino* (1958-1989), and the publication of cartillas (primers) and books to reinforce the lessons provided via the radio. The program reached its height in the 1970s, but by the 1980s, insurmountable problems began to appear. Disagreements between church authorities, competition from commercial radio stations, conflicts between the leftist revolutionaries, and withdrawal of funding by the national government forced the leaders of ACPO to sell the Sutatenza stations to the radio channel CARACOL. By the 1990s the program had disappeared, but not before it had changed the lives of thousands of campesinos throughout Colombia. Because throughout the world educators hailed Radio Sutatenza during the 1950s and 1960s as a unique and practical way to teach illiterate adults, its methods were closely studied and copied by other countries in Latin America and Africa. The published bibliography concerning the institute is immense, yet, as Jos Arturo Rojas concludes, many aspects of ACPO and the Radio Sutatenza experience remain to be investigated. (p.94). One such aspect is the impact the radio schools had on the inhabitants of one Colombian frontier region—the Llanos Orientales. The Llanos Orientales or eastern tropical plains, are vast grasslands, that stretch eastward from the towering Eastern Andean Cordillera to continue on into Venezuela. Bisected by tree-lined, fast-flowing tributaries that join the Orinoco River, the region comprises 220,000 square miles or 30% of Colombia's territory, but until the mid twentieth century, it was largely a lightly-populated frontier, isolated

from the Andean heartland by the barrier posed by the mountain range. In addition to the problem of communication (only one unreliable road linked Bogotá to the town of Villavicencio, the gateway to the Llanos), the harsh climate (nine months of heavy rain. three months of drought) and the prevalence of endemic tropical diseases deterred most would-be colonists from settling there. Nevertheless, by 1951 the population had reached 115,124 divided among four political entities: the three national territories of the Intendencia del Meta, the Comisaras Especiales of Arauca and Vichada; and Casanare, a province of the Department of Boyacá. Since mountains do not necessarily posed insurmountable barriers to radio waves, it seems reasonable to expect that the arrival of Radio Sutatenza helped break down the traditional isolation of the people in the Llanos. The purpose of this book is to test this proposition by analyzing the impact ACPO and Radio Sutatenza had on the inhabitants of the most prosperous of the Llanos territories, the Intendencia del Meta which became the Departamento del Meta in 1959. Chapter One provides a general overview of organization and operation of Radio Sutatenza and ACPO from 1947 to 1974. Chapter Two briefly reviews the history of Meta and discusses the unique conditions that made it receptive to radio-promoted literacy. Chapter Thr

Advances in Titicaca Basin Archaeology-2 Abigail R. Levine, Alexei Vranich, 2013-12-31 This volume, the second in a series of studies on the archaeology of the Titicaca Basin, serves as an excellent springboard for broader discussions of the roles of ritual, authority, coercion, and the intensification of resources and trade for the development of archaic states worldwide. Over the last hundred years, scholars have painstakingly pieced together fragments of the incredible cultural history of the Titicaca Basin, an area that encompasses over 50,000 km², achieving a basic understanding of settlement patterns and chronology. While large-scale surveys will need to continue and areas will need to be revisited to further refine chronologies and knowledge of site-formation processes, the maturation of the field now allows archaeologists to fruitfully invest energy in single locations and specialized topics.

Buen Gusto and Classicism in the Visual Cultures of Latin America, 1780-1910 Paul B. Niell, Stacie G. Widdifield, 2013-12-15 The promotion of classicism in the visual arts in late eighteenth and nineteenth-century Latin America and the need to "revive" buen gusto (good taste) are the themes of this collection of essays. The contributors provide new insights into neoclassicism and buen gusto as cultural, not just visual, phenomena in the late colonial and early national periods and promote new approaches to the study of Latin American art history and visual culture. The essays examine neoclassical visual culture from assorted perspectives. They consider how classicism was imposed, promoted, adapted, negotiated, and contested in myriad social, political, economic, cultural, and temporal situations. Case studies show such motivations as the desire to impose imperial authority, to fashion the nationalist self, and to form and maintain new social and cultural ideologies. The adaptation of classicism and buen gusto in the Americas was further shaped by local factors, including the realities of place and the influence of established visual and material traditions.

Political Landscapes of Capital Cities Jessica Joyce Christie, Jelena Bogdanovic, Eulogio Guzmán, 2016-08-08 Political Landscapes of Capital Cities investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments of capital cities. In this spatially inclusive, socially dynamic interpretation, an interdisciplinary group of authors including archaeologists, anthropologists, and art historians uses the methodology put forth in Adam T. Smith's *The Political Landscape: Constellations of Authority in Early Complex Politics* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority. Political Landscapes of

Capital Cities blends the historical, political, and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis, hinging on the methodological tools of not only architectural and urban design but also cultural, historiographical, and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal ideals in the spaces of their capitals, ultimately confirming that political authority is profoundly spatial. Redcoated Ploughboys Richard Feltoe, 2012-03-03 2013 Heritage Toronto Award – Shortlisted *Redcoated Ploughboys* brings the story of the Battalion of Incorporated Militia of Upper Canada to life, revealing a fascinating lost chapter in military history. In 1812, the future of British North America hung in the balance as the United States declared war with the avowed goal of conquering the Canadas and removing British influence from the continent forever. In response, a corps of men, drawn from every walk of life and social stratum of Upper Canada, stepped forward to defend their fledgling colony by volunteering to serve in the Battalion of Incorporated Militia of Upper Canada. After undergoing rigorous training, and fighting with distinction in numerous skirmishes and battles, it earned the prestigious battle honour Niagara. The regiment was disbanded at the conclusion of the war, and with the passage of time, its dedicated service and efforts have faded into the dust of histories written about the War of 1812. *Redcoated Ploughboys* brings the story of this regiment, and the men who served in it, back to life, revealing a fascinating lost chapter in Canada's early military history.

Architectural Conservation in Europe and the Americas John H. Stubbs, Emily G. Makaš, 2011-05-04 "From such well-known and long-vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Brasília, the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for."—New York Review of Books "...an astonishing feat of research, compilation and synthesis."—Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas. *Architectural Conservation in Europe and the Americas* serves as a convenient resource for professionals, students, and anyone interested in the field. Following the acclaimed *Time Honored*, this book presents contemporary practice on a country-by-country and region-by-region basis, facilitating comparative analysis of similarities and differences. The book stresses solutions in architectural heritage protection and the contexts in which they were developed.

Religious Statues and Personhood Amy Whitehead,2013-09-12 Objects such as statues and icons have long been problematic in the study of religion, especially in European Christianities. Through examining two groups, the contemporary Pagan Glastonbury Goddess religion in the Southwest of England and a cult of the Virgin Mary in Andalusia, Spain, Amy Whitehead asserts that objects can be more than representational or symbolic. In the context of increasing academic interest in materiality in religions and cultures, she shows how statues, or 'things', are not always interacted with as if they are inert material against which we typically define ourselves as 'modern' humans. Bringing two distinct cultures and religions into tension, animism and 'the fetish' are used as ways in which to think about how humans interact with religious statues in Western Europe and beyond. Both theoretical and descriptive, the book illustrates how religions and cultural practices can be re-examined as performances that necessarily involve not only human persons, but also objects.

Bramante's Tempietto, the Roman Renaissance, and the Spanish Crown Jack Freiberg,2014-11-10 The Tempietto, the embodiment of the Renaissance mastery of classical architecture and its Christian reinvention, was also the pre-eminent commission of the Catholic kings, Ferdinand of Aragon and Isabel of Castile, in papal Rome. This groundbreaking book situates Bramante's time-honored memorial dedicated to Saint Peter and the origins of the Roman Catholic Church at the center of a coordinated program of the arts exalting Spain's leadership in the quest for Christian hegemony. The innovations in form and iconography that made the Tempietto an authoritative model for Western architecture were fortified in legacy monuments created by the popes in Rome and the kings in Spain from the later Renaissance to the present day. New photographs expressly taken for this study capture comprehensive views and focused details of this exemplar of Renaissance art and statecraft.
