Carlos Ferrándiz Foraster, Ferrandiz

Las terminaciones nerviosas cutáneas y las sensaciones protopáticas y epicríticas Ramón Martínez Pérez,1933

Terminaciones de análisis Jacques-Alain Miller,2018-01-29 Reflexión sobre cómo podemos pensar esta repetición, ya no interpretando las resistencias de lo social contra el psicoanálisis, sino en relación con los analistas, con la comunidad analítica, y su implicación en ello. En este libro Jacques-Alain Miller muestra que el psicoanálisis está vinculado a la libertad de palabra y, a través de ella, a los derechos humanos. Hemos visto últimamente tres historias de tres mujeres: primero, la liberación de Rafah Nached (Siria) y, más recientemente, Mitra Kadivar (Irán) y Raja Ben Slama (Túnez). Esa serie de tres mujeres, y el hecho de que se trate de psicoanalistas, pone de manifiesto lo que Lacan había anticipado: la vinculación del psicoanálisis, no con la libertad, sino con las libertades. No se trata del concepto abstracto, metafísico de libertad, sino de lo que está en juego en la práctica, es decir, si se puede practicar el psicoanálisis, o no, con sus consecuencias. Es ahí donde podemos decir si creemos o no en la democracia.

Textura del sistema nervioso del hombre y de los vertebrados Santiago Ramón y Cajal,1899 Santiago Ramon y Cajal's Textura del Sistema Nervioso del Hombre y de los Vertebrados, issued in Madrid from 1899 to 1904, was a comprehensive analysis of all parts of the nervous system in both man and animals, and the culmination of fifteen years of research. Cajal proved many of the connections between one section of the brain and another, and he illustrated these, as well as the many connections one cell makes with others. He described many nerve cells for the first time and also pointed out the plasticity of nerve cells in the brain, a discovery that has only recently come to be appreciated.

Teachers' Roles in Second Language Learning Bogum Yoon,Hoe Kyeung Kim,2012-09-01 This book is designed to provide practical applications of sociocultural theory with regard to teachers' roles in second language education. By providing specific examples of teachers' roles in the classroom, the book aims to help researchers, teacher educators, and classroom teachers make clear connections between practice and theory in second language learning. All the studies in this edited book are conducted in the PreK-16 classroom setting. Each chapter presents rigorous research analysis within the framework of sociocultural theory and provides rich descriptions of

teachers' roles. The book is intended to be used in teacher education courses. The primary audience of the book is in-service teachers who work with second language learners (SLLs) in their classrooms including ESL/Bilingual classrooms or regular classrooms. Since many SLLs receive instructions both in the ESL/Bilingual classrooms and in the regular classrooms, it is important to discuss teachers' roles in both settings. The secondary audience of the book is teacher educators and researchers who work with pre-service and in-service teachers in teacher education. This book will be an excellent resource for book study groups and practitioners working with professional learning communities.

Manual de fisiología experimental Juan M. Díaz Villar y Martínez,1913

Neurobiología de la visión Urtubia Vicario, César,2004-12-31 El objetivo de este libro es contribuir a la comprensión de los mecanismos bioquímicos y neurofisiológicos de la percepción visual. La mayor parte de los procesos que se presentan han sido descubiertos muy recientemente, y aún quedan por dilucidar muchos aspectos de tan apasionante ámbito de la función perceptiva. Se han intentado exponer en capítulos independientes, aunque unidos entre sí en bloques de varios capítulos, aspectos individuales de estos mecanismos, de forma clara y con profusión de subapartados, para contribuir a una mejor comprensión del tema. Básicamente, puede decirse que el texto se organiza en dos grandes apartados: el proceso visual en la retina y el proceso visual en el cerebro.
