New Paradigm in Decision Science and Management Srikanta Patnaik,Andrew W. H. Ip,Madjid Tavana,Vipul Jain,2019-09-20 This book discusses an emerging area in computer science, IT and management, i.e., decision sciences and management. It includes studies that employ various computing techniques like machine learning to generate insights from huge amounts of available data; and which explore decision-making for cross-platforms that contain heterogeneous data associated with complex assets; leadership; and team coordination. It also reveals the advantages of using decision sciences with management-oriented problems. The book includes a selection of the best papers presented at the International Conference on Decision Science and Management 2018 (ICDSM 2018), held at the Interscience Institute of Management and Technology (IIMT), Bhubaneswar, India.

Strategies for e-Business Tawfik Jelassi,Francisco J. Martínez-López,2020-06-28 This is the fourth edition of a unique textbook that provides extensive coverage of the evolution, the current state, and the practice of e-business strategies. It provides a solid introduction to understanding e-business and e-commerce by combining fundamental concepts and application models with practice-based case studies. An ideal classroom companion for business schools, the authors use their extensive knowledge to show how corporate strategy can imbibe and thrive by adopting vibrant e-business frameworks with proper tools. Students will gain a thorough knowledge of developing electronic and mobile commerce strategies and the methods to deal with these issues and challenges.

Managerial Economics James R. McGuigan,R. Charles Moyer,Frederick H. deB. Harris,2005 With its emphasis on real world, manager-oriented applications, this text shows students how managers apply theories and techniques to analyse and solve real-world business problems.

Information Systems Design and Intelligent Applications Suresh Chandra Satapathy,Vikrant Bhateja,Radhakhrishna Somanah,Xin-She Yang,Roman Senkerik,2019-01-04 The book gathers a collection of high-quality peer-reviewed research papers presented at the International Conference on Information System Design and Intelligent Applications (INDIA 2018), which was held at the Universite des Mascareignes, Mauritius from July 19 to 21, 2018. It covers a wide range of topics in computer science and information technology, from image processing, database applications and data mining, to grid and cloud computing, bioinformatics and many more. The intelligent tools discussed, e.g. swarm intelligence, artificial intelligence, evolutionary algorithms, and bio-inspired algorithms, are currently being applied to solve challenging problems in various domains.

The Sponsored Life Leslie Savan,2010-06-17 How does a blatant lying in TV commercials—like Joe Isuzu's manic claims—create public trust in a product or a company? How does a company associated with a disaster, Exxon or Du Pont for example, restore its reputation? What is the real story behind the rendering of the now infamous Joe Camel? And what is the deeper meaning of living in an ad, ad, ad world? For a decade, journalist Leslie Savan has been exposing the techniques used by advertisers to push products and pump up corporate images. In the lively essays in this collection, Savan penetrates beneath the slick surfaces of specific ads and marketing campaigns to show how they reflect and shape consumer desires. Savan's interviews with ad agencies and corporate clients—along with her insightful analyses of influential TV sports—reveal how successful advertising works. Ads do more than command attention. They are signposts to the political, cultural, and social trends that infiltrate the individual consumer's psyche. Think of the products associated with corporate mascots—the drum-beating bunny, the cereal-pushing tiger, the doughboy—that have become pop culture icons. Think cool. Think of the clothing manufacturer that uses multiracial imagery. Think progressive. Buy their worldview, buy their product. When virtually every product can be associate with some positive self-image, we are subtly refashioned into the advertiser's concept of a good citizen. Like it or not, we lead the sponsored life.

E-business and E-commerce Management Dave Chaffey,2007 Aimed at students, this work covers various aspects of e-business - focusing on sales and marketing, as well as detailing procurement, supply chains, and the legal and security considerations. It contains a range of features to help you learn effectively including margin definitions, international case studies, activities and web links.

Science Of Speech Dada Bhagwan,2021-04-01 Those seeking to lead a spiritual life may naturally become inspired to live in peace and non violence. To learn spiritual practices to develop these values, one may turn to spiritual teachers, to different types of religion, or to different types of yoga. But beginning to cultivate spiritual awareness is not always as simple as it seems — especially in family relationships, in unhealthy relationships, or while dealing with difficult people. Daily interactions such as these may feel like the very definition of conflict! In the book "Science Of Speech", Gnani Purush (embodiment of Self knowledge) Dada Bhagwan offers key understanding about non violent communication, along with conflict resolution skills and conflict management strategies. His spiritual teaching on how to resolve conflict - or to avoid it altogether - is offered in the context of common and everyday relationship challenges. Among the myriad of spiritual books available today, "Science Of Speech" is a unique resource. Whether wondering how to become more spiritual, or simply how to deal with negative people and difficult people, this book will prove invaluable.

Pervasive Advertising Jörg Müller,Florian Alt,Daniel Michelis,2011-09-21 This book looks at the future of advertising from the perspective of pervasive computing. Pervasive computing encompasses the integration of computers into everyday devices, like the covering of surfaces with interactive displays and networked mobile phones. Advertising is the communication of sponsored messages to inform, convince, and persuade to buy. We believe that our future cities will be digital, giving us instant access to any information we need everywhere, like at bus stops, on the sidewalk, inside the subway and in shopping malls. We will be able to play with and change the appearance of our cities effortlessly, like making flowers grow along a building wall or changing the colour of the street we are in. Like the internet as we know it, this digitalization will be paid for by adverts, which unobtrusively provide us suggestions for nearby restaurants or cafés. If any content annoys us, we will be able to effortlessly say so and change it with simple gestures, and content providers and advertisers will know what we like and be able to act accordingly. This book presents the technological foundations to make this vision a reality.

Ellis' British Railway Engineering Encyclopaedia (4th Edition) Iain Ellis,2019-11 The fourth edition of the industry-renowned Encyclopaedia. Fully revised, expanded and enhanced by over a hundred pages. This is the only cross-discipline reference and is fast becoming an industry standard.

A Design Space for Pervasive Advertising on Public Displays Florian Alt,2013-03-01 Today, people living in cities see up to 5000 ads per day, many on public displays. More and more of these public displays are networked and equipped with sensors, making them part of a global infrastructure that is currently emerging. Such displays provide the opportunity to create a benefit for society in the form of immersive experiences and relevant content. In this way, they can overcome the display blindness that evolved over the years. Two main reasons prevent this vision from coming true: first, public displays are stuck with traditional advertising as the driving business model. Second, no common ground exists for researchers or advertisers that outline important challenges. The main contribution of this thesis is presenting a design space for advertising on public displays that identifies important challenges - mainly from an HCI perspective. The results are envisioned to provide a basis for future research and for practitioners to shape future advertisements on public displays in a positive way.

Proceedings of 2nd International Conference on Micro-Electronics, Electromagnetics and Telecommunications Suresh Chandra Satapathy,Vikrant Bhateja,P. Satish Rama Chowdary,V.V.S.S. Sameer Chakravarthy,Jaume Anguera,2017-09-06 The book is a collection of best papers presented in the Second International Conference on Microelectronics Electromagnetics and Telecommunication (ICMEET 2016), an international colloquium, which aims to bring together academic scientists, researchers and research scholars to discuss the recent developments and future trends in the fields of microelectronics, electromagnetics and telecommunication. Microelectronics research investigates semiconductor materials and device physics for developing electronic devices and integrated circuits with data/energy efficient performance in terms of speed, power consumption, and functionality. The book discusses various topics like analog, digital and mixed signal circuits, bio-medical circuits and systems, RF circuit design, microwave and millimeter wave circuits, green circuits and systems, analog and digital signal processing, nano electronics and giga scale systems, VLSI circuits and systems, SoC and NoC, MEMS and NEMS, VLSI digital signal processing, wireless communications, cognitive radio, and data communication.

Managing Risk in Projects David Hillson,2017-05-15 Projects are risky undertakings, and modern approaches to managing projects recognise the central need to manage the risk as an integral part of the project management discipline. Managing Risk in Projects places risk management in its proper context in the world of project management and beyond, and emphasises the central concepts that are essential in order to understand why and how risk management should be implemented on all projects of all types and sizes, in all industries and in all countries. The generic approach detailed by David Hillson is consistent with current international best practice and guidelines (including 'A Guide to the Project Management Body of Knowledge' (PMBoK) and the 'Project Risk Management Practice Standard' from PMI, the 'APM Body of Knowledge' and 'Project Risk Analysis & Management (PRAM) Guide' from APM, 'Management of Risk: Guidance for Practitioners' from OGC, and the forthcoming risk standard from ISO) but David also introduces key developments in the risk management field, ensuring readers are aware of recent thinking, focusing on their relevance to practical application. Throughout, the goal is to offer a concise description of current best practice in project risk management whilst introducing the latest relevant developments, to enable project managers, project sponsors and others responsible for managing risk in projects to do just that - effectively.

A Cross-Cultural Reference of Business Practices in a New Korea Eun Young Kim Valdez,1996-05-07 Korea has been going through major changes since 1992, including a civilian government, opening of financial markets, restructuring of chaebols, changing roles of women, and new relations with North Korea. There have also been cultural changes which reflect on the Korean way of doing business and of living. The knowledge and skills for coping with these changes need to be mastered by those who want to interact with Koreans. The need for interpersonal relationships and good communication should be emphasized. Case studies and examples are used to illustrate effective transcultural management and communications. This is a reference to understanding changing cultures and business practices in Korea for scholars, and a comprehensive guide to Korean business practice, protocol, and communications styles for professionals. Western professionals doing business in Korea will find this material important in their business operations, communications, and interpersonal relations with Koreans. Other Asian business professionals will find the work useful in providing an insight to both the Western and Korean cultures. Scholars and students in Asian studies, Korean studies, and international business areas will find beneficial information.
