Natural fiber is demanding recognition for its unique and beneficial properties as well as its luxurious look and feel. The wool producers in the US cannot accept current brokerage prices and be sustainable. Producers of all natural fibers need to take ownership of their fiber - from growing the fiber all the way thru to the end product. SGC is key to assisting natural fiber producers in achieving sustainability. As a Master Classer through our system, you are an extremely valuable asset to this growing industry. Indeed, you are the very basis of its success, next to the fleece itself, of course.

Month, an Illustrated Magazine of Literature, Science, and Art ,1868

Copilots for Linguists Tiago Timponi Torrent,Thomas Hoffmann,Arthur Lorenzi Almeida,Mark Turner,2023-12-31 AI can assist the linguist in doing research on the structure of language. This Element illustrates this possibility by showing how a conversational AI based on a Large Language Model (AI LLM chatbot) can assist the Construction Grammarian, and especially the Frame Semanticist. An AI LLM chatbot is a text-generation system trained on vast amounts of text. To generate text, it must be able to find patterns in the data and mimic some linguistic capacity, at least in the eyes of a cooperative human user. The authors do not focus on whether AIs “understand” language. Rather, they investigate whether AI LLM chatbots are useful tools for linguists. They reframe the discussion from what AI LLM chatbots can do with language to what they can do for linguists. They find that a chatty LLM can labor usefully as an eliciting interlocutor, and present precise, scripted routines for prompting conversational LLMs.
