IBM DS8870 Easy Tier Heat Map Transfer Bert Dufrasne, Artur Borowicz, IBM Redbooks, 2015-06-23 This IBM® Redpaper™ publication describes the

concepts, functions, and practical usage of IBM Easy Tier® Heat Map Transfer (HMT). IBM System Storage® DS8000® Easy Tier is designed to automate data placement throughout the storage system disks pool. Easy Tier generates a heat map. It is a workload activity metric for each extent in a logical volume. With Easy Tier HMT, it is possible to transfer the heat map from a mirrored primary site and reapply it periodically at secondary and tertiary sites by using the Easy Tier Heat Map Transfer Utility (HMTU). This capability helps maintain storage performance after a failover to a remote site. With DS8870 Release 7.5, the heat map transfer supports Metro Global Mirror (MGM) replication topology in addition to Metro Mirror/Global Copy/Global Mirror (MM/GC/GM) functions. This paper is for those professionals who want to understand the Easy Tier HMT concept and its underlying design. It also provides guidance and practical illustrations about the operation of the HMTU. For more information about the general concept of Easy Tier, see IBM DS8000 Easy Tier, REDP-4667. For more information about Easy Tier Server and Easy Tier Application, see the following publications: IBM System Storage DS8000 Easy Tier Server, REDP-5013 DS8870 Easy Tier Application, REDP-5014

Policy Making at the Second Tier of Local Government in Europe Xavier Bertrana, Björn Egner, Hubert Heinelt, 2015-09-07 Debates about multi-level governance have led to a profound

restructuring of regional and local government. The second level of local government is under review in most European countries, with the aim to strengthen the institutional capacity of municipalities or to develop appropriate institutional structures for governing fragmented urban areas. This book provides a thematic and cross-national analysis of the key actors in local government that form the crucial components of effective and democratic policy making. Focussing on the second tier of local government, it examines new empirical data on councillors from this level of government in 15 European countries and integrates important variables such as party politics, notions of democracy, finance, multi-level settings. Divided into five parts, it addresses: Attitudes of county/provincial councillors towards administrative and territorial reforms; Their role perceptions and role behaviour; Their political orientation; Actor constellations and governance arrangements; Political socialization and recruitment, professionalization and career patterns of county/provincial councillors. This book will be of interest to students and scholars of local government, urban studies, regional studies, political science, sociology and geography.
