Time Lapse John Harper, 2011-07-15 TIME LAPSE: COLLAPSE is one of a three book series that tells the story of Duncan Duggard, a 14-year-old boy who lives with his grandparents in a small town in Michigan. A sensitive boy, Duncan is often bullied at school and sometimes experiences strange stoppages of time. After Duncan's grandparents give him a beautiful silver amulet necklace as a birthday gift, Duncan is visited by the ghost of his late mother, who tells him that time itself is in danger of collapsing and that only he is the only one with the power to stop this catastrophe. Heeding his mother's call, Duncan sets out on a series of amazing adventures that change both him and the world around him.

Raising Ollie Tom Rademacher, 2021-10-12 The account of one radically new school year for a Teacher of the Year and for his nonbinary, art-obsessed, brilliant child Seven-year-old Ollie was researching local advanced school programs—because every second grader does that, right? Ollie, who used to hate weekends because they meant no school, was crying on the way to school almost every day. Sure, there were the slings and arrows of bullies and bad teachers, but, maybe worse, Ollie, a funny, anxious, smart kid with a thing for choir and an eye for graphic art, was gravely underchallenged and also struggling with identity and how to live totally as themselves. Ollie begged to switch to a new school with “kids like me,” where they wouldn't feel so alone, or so bored, and so they made the change. *Raising Ollie* is dad Tom Rademacher's story (really, many stories) of that eventful and sometimes painful school year, parenting Ollie and relearning every day what it means to be a father and teacher. As Ollie—who is nonbinary and uses they/them pronouns, and prefers art to athletics, vegetables to cake, and animals to most humans—flourishes in their new school, Rademacher is making an eye-opening adjustment to a new school of his own, one that's whiter and more suburban than anywhere he has previously taught, with a history of racial tension that he tries to address and navigate. While Ollie is learning to code, 3D model, animate, speak Japanese, and finally feel comfortable at school, Rademacher increasingly sees how his own educational struggles, anxieties, and childhood upbringing are reflected in his teaching, writing, and parenting, as well as in Ollie's experience. And with this story of one anything-but-academic year of inquiry and wonder, doubt and revelation, he shows us how raising a kid changes everything—and how much raising a kid like Ollie can teach us about who we are and what we're doing in the world.

Secrets of the Oracle Database Norbert Debes, 2010-08-03 *Secrets of the Oracle Database* is the definitive guide to undocumented and partially-documented features of the Oracle Database server. Covering useful but little-known features from Oracle Database 9 through Oracle Database 11, this book will improve your efficiency as an Oracle database administrator or developer. Norbert Debes shines the light of day on features that help you master more difficult administrative, tuning, and troubleshooting tasks than you ever thought possible. Finally, in one place, you have at your fingertips knowledge that previously had to be acquired through years of experience and word of mouth through knowing the right people. What Norbert writes is accurate, well-tested, well-illustrated by clear examples, and sure to improve your ability to make an impact on your day-to-day work with Oracle.

ECAI 2006 G. Brewka, S. Coradeschi, A. Perini, 2006-08-10 In the summer of 1956, John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence. During the last 50 years, AI has seen a tremendous development and is now a well-established scientific discipline all over the world. Also in Europe AI is in excellent shape, as witnessed by the large number of high quality papers in this publication. In comparison with ECAI 2004, there's a strong increase in the relative number of submissions from Distributed AI / Agents and Cognitive Modelling. Knowledge Representation & Reasoning is traditionally strong in Europe and remains the biggest area of ECAI-06. One reason the figures for Case-Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS.

Science in Primary Schools: Examining the Practices of Effective Teachers Angela Fitzgerald, 2012-10-19 If the status and quality of science education in schools is to improve, efforts need to be made to better understand the classroom practices of effective science teachers. Teachers are key players in a re-imagining of science education. This book explores how two primary school teachers, identified as effective practitioners, approached science teaching and learning over a unit of work. In recording the teaching and learning experiences in their classrooms, the author highlights how the two teachers adopted different approaches, drawing on their particular beliefs and knowledge, to support student learning in science in ways that were appropriate to their contexts as well as reflected their different experiences, strengths and backgrounds. Through sharing their stories, this book illustrates, that due to the complex nature of teaching and learning, there is no one way of defining effectiveness. In documenting this research, it is hoped that other teachers and teacher educators will be inspired to think about primary school science education in innovative ways.

The New Astronomy Book Danny Faulkner, 2014-10-01 The universe is an amazing declaration of the glory and power of God! Beautiful and breathtaking in its scale, the vast expanse of the universe is one that we struggle to study, understand, or even comprehend in terms of its purpose and size. Now take an incredible look at the mysteries and marvels of space in *The New Astronomy Book*! Discover the best ways to observe the heavens, along with up-to-date astronomical data and concepts. Learn about the dynamics of planets, stars, galaxies, and models for the cosmology of the universe. What we know and are still trying to discover about planets, moons, and comets within our own solar system. If you watch the stars at night, you will see how they change. This speaks to the enormity and intricacy of design in the universe. While the stars appear timeless, they instead reflect an all-powerful Creator who speaks of them in the Bible. Many ancient pagan cultures taught that the changing stars caused the seasons to change, but unlike these pagan teachings, the Book of Job gives credit to God for both changing stars and seasons (Job 38:31-33). When Job looked at Orion, he saw about what we see today, even though he may have lived as much as 4,000 years ago.

Intimate Enemies Igal Halfin, 2007 *Intimate Enemies* examines the transformation of Bolshevik Party ideology, language, and power relations during the crucial period leading up to Stalin's seizure of power. Igal Halfin uncovers this evolution in the language of Bolshevism. This language defined the methods for judging true party loyalty-in what Halfin describes as an examination of the 'hermeneutics of the soul,' and became the basis for prosecuting the Party's enemies, particularly the "intimate enemies" within the Party itself.

Sixth International Conference on Cognitive Modeling - ICCM - 2004 Marsha C. Overview Timelapse Benjamin Grant,Timothy Dougherty,2020-10-13 A stunning and unique collection of satellite images of Earth that offer an unexpected look at humanity, derived from the wildly popular Daily Overview Instagram project. Inspired by the “Overview Effect”—a sensation that astronauts experience when given the opportunity to look down and view the Earth as a whole—the breathtaking, high definition satellite photographs in OVERVIEW offer a new way to look at the landscape that we have shaped. More than 200 images of industry, agriculture, architecture, and nature highlight incredible patterns while also revealing a deeper story about human impact. This extraordinary photographic journey around our planet captures the sense of wonder gained from a new, aerial vantage point and creates a perspective of Earth as it has never been seen before.

Cinematography Mailing List - High Definition - January 2001 to November 2004 Geoff Boyle,2005-02-01 This book consists of edited conversations between DP's, Gaffer's, their crew and equipment suppliers. In common with the other CML books it doesn't have the same structure as a normal film reference book. It covers discussions on High Definition between January 2001 and November 2004. The discussions have occasionally been edited for clarity and brevity. They will sometimes ramble a little but that's the nature of a conversation and some interesting information comes out in the process! Our aim is to promote the free exchange of ideas among fellow professionals, the cinematographer, their camera crew, manufacturer's, rental houses and related businesses. Kodak, Arri, Aaton, Panavision, Otto Nemenz, Clairmont, Optex, VFG, Schneider, Tiffen, Fuji, Panasonic, Thomson, K5600, BandPro, Lighttools, Cooke, Plus8, SLF, Atlab Kinetta and Fujinon are among the companies represented.

CONCUR '90 ,1990 This volume gives the proceedings of the conference CONCUR '90. This is the first conference organized by ESPRIT Basic Research Action 3006, CONCUR (Theories of Concurrency: Unification and Extension), started in September 1989. The principal aims of the action are to explore the relationships among the different approaches to algebraic concurrency theory, and to develop a formalism applicable to a wide range of case studies. The articles in this volume describe the state of the art in concurrency, the theory of communicating concurrent (or distributed) systems.-PUBLISHER'S WEBSITE.
