Between the Titans Riko Radojcic,2020-09-09 This is a story of a regular immigrant engineer, encumbered with the fears and experiences from his old country, fending off large corporate entities pressuring him to sell a patent. And a story of employees of these large corporate entities graduating from the carrot to the stick approach. He feels that he cannot sell a patent for moral and sentimental reasons. They feel that they have to push the boundaries in order to achieve a win. The collision between the different personalities, with their conflicting intentions and worldviews, results in a series of unforeseen and unintended consequences that follow the interactions from California to Montenegro and back. A murder in Montenegro brings the story to a head ... Theme Standard management practice is to encourage team spirit and employee loyalty to the company. However, this often breeds the us-versus-them mentality, which could tempt some employees to go beyond the usual norms in order to ensure a victory for their corporate family. The temptation may be especially acute when the stakes are high: such as a corporate life or death situation. In such circumstances, some employees could be tempted to use unethical, immoral, or even illegal means to score a win for their team. The high-profile legal war between Apple and Qualcomm that has dominated the tech-industry headlines between 2017 and 2019 serves as a backdrop for this fictional story. It was a situation with many billions of dollars at stake: an environment suitable for exploring the psychology of perfectly good people losing their moral compasses in order to achieve a corporate win. And it was also a case that emphasized the very important role that Intellectual Property plays in high-tech industry, and by extension, in modern life so dependent on devices like the ubiquitous smartphones.

All For Her Emma Ashe,2021-02-05 Smart-mouthed wedding planner, Britton Tillman needs a break before she breaks something—or someone: like her latest bridezilla. She's looking for a distraction and joining An Indecent Apposal seems like just the ticket. An app that will match her with her soulmate? Sounds fishy. But an app that also matches her with gorgeous billionaire, West Stephens? Sounds pretty perfect. Too bad this delicious distraction comes with a bridezilla-sized complication. West knows he shouldn't believe in love. After all, he watched his parents' marriage implode. He knows how ugly relationships can be and messing with his sister's wedding planner? Not a good idea. But after one look, one taste of Britton, he knows she's The One. Too bad Brit doesn't agree. But West has a plan. There's only one catch to An Indecent Apposal: you have to share your most secret fantasies. Now he knows everything she desires and he's more than willing to use them all to win her heart. *An Indecent Apposal is a spicy new romantic series filled with hot, dirty billionaire alphas and the beautiful, curvy girls who tame them. Perfect for a quick bedtime read or a quicker reader blush, you'll love the sexy love story, All For Her, a secret romance. One of the best new short reads of the year!

Better With You Emma Ashe,2020-12-29 When curvy baker, Vivi Angelo, joins An Indecent Apposal, she has one thing on her mind: getting rid of her virginity—which shouldn't have required resorting to a possibly magical dating app, but hey things happen. Or didn't happen in the case of Vivi's long term boyfriend. Anyway, when she's matched with billionaire Tanner Stephens, she figures this could be just the, uh, help she's needed. He's gorgeous. He finds her sarcasm funny. He also thinks she's a con artist. Tanner doesn't believe in love. He does, however, believe some people would do anything to derail his company's latest deal, and when he finds out his brother and sister have suddenly found love through the same bogus-sounding dating app, he's convinced they're being scammed. So he joins An Indecent Apposal to prove it. The only problem? His match is everything he's ever wanted. Vivi's confident, curvy, the only person who talks back to him—and Tanner can't enough of her. It has to be part of the scam, right? Surely he isn't...falling for her? Tanner knows he'll have to confess his secrets, but he isn't counting on his curvy baker having a secret of her own. Now they'll both have to let down their guards and bare their souls before it's too late. *An Indecent Apposal is a spicy new romantic series filled with hot, dirty billionaire alphas and the beautiful, curvy girls who tame them. Perfect for a quick bedtime read or a quicker reader blush, you'll love the sexy love story, Better With You, a steamy virgin romance. One of the best new short reads of the year!

Putting Logic in its Place David Christensen,2004-11-04 What role, if any, does formal logic play in characterizing epistemically rational belief? Traditionally, belief is seen in a binary way - either one believes a proposition, or one doesn't. Given this picture, it is attractive to impose certain deductive constraints on rational belief: that one's beliefs be logically consistent, and that one believe the logical consequences of one's beliefs. A less popular picture sees belief as a graded phenomenon. This picture (explored more by decision-theorists and philosophers of science than by mainstream epistemologists) invites the use of probabilistic coherence to constrain rational belief. But this latter project has often involved defining graded beliefs in terms of preferences, which may seem to change the subject away from epistemic rationality. Putting Logic in its Place explores the relations between these two ways of seeing beliefs. It argues that the binary conception, although it fits nicely with much of our commonsense thought and talk about belief, cannot in the end support the traditional deductive constraints on rational belief. Binary beliefs that obeyed these constraints could not answer to anything like our intuitive notion of epistemic rationality, and would end up having to be divorced from central aspects of our cognitive, practical, and emotional lives. But this does not mean that logic plays no role in rationality. Probabilistic coherence should be viewed as using standard logic to constrain rational graded belief. This probabilistic constraint helps explain the appeal of the traditional deductive constraints, and even underlies the force of rationally persuasive deductive arguments. Graded belief cannot be defined in terms of preferences. But probabilistic coherence may be defended without positing definitional connections between beliefs and preferences. Like the traditional deductive constraints, coherence is a logical ideal that humans cannot fully attain. Nevertheless, it furnishes a compelling way of understanding a key dimension of epistemic rationality.

Charlie Chaplin and A Woman of Paris Wes D. Gehring,2021-01-12 Charlie Chaplin's A Woman of Paris (1923) was a groundbreaking film which was neither a simple recycling of Peggy Hopkins Joyce's story, nor quickly forgotten. Through heavily-documented period research, this book lands several bombshells, including Paris is deeply rooted in Chaplin's previous films and his relationship with Edna Purviance, Paris was not rejected by heartland America, Chaplin did romantic research (especially with Pola Negri), and Paris' many ongoing influences have never been fully appreciated. These are just a few of the mistakes about Paris.
