Production Management and Business Development Bohuslava Mihal’ ov’ ,Petra Szaryszov’ ,Lenka’ tofov’ ,Michal Pru’ insk’ ,Barbora Gontkovi’ ov’ ,2018-12-07 Trends in economic development rely on increasing human knowledge, which stimulate the development of new, sophisticated technologies. With their utilization production is raised and the intent is to decrease natural resources consumption and protect and save our life environment as much as we can. At the same time, increasing pressure is observed both from competition and customers. The way to be competitive is by improving manufacturing and services offered to the customer. These are the major challenges of contemporary enterprises. Organizations are improving their activities and management processes. This is necessary to manage the seemingly intensifying competitive markets successfully. Enterprises apply business-optimizing solutions to meet new challenges and conditions. This way ensuring effective development for long-term competitiveness in a global environment. This is necessary for the implementation of qualitative changes in the industrial policy. Process Control and Production Management (MTS 2018) is a collection of research papers from an international authorship. The authors present case studies and empirical research, which illustrates the progressive trends in business process management and the drive to increase enterprise sustainability development.

Strategic Sport Management Michal Varmus,Milan Kubina,Roman Ad’ mik,2021-03-21 Sport, and in particular the sporting environment, has undergone significant changes in recent decades. The social significance and commercialization of sport; the use of new technologies and organizational structures; and the involvement of various stakeholders matter more today than ever before. This book addresses the key influence of stakeholders in particular on the activities of sports organizations, taking into account certain territorial differences around the world, but also within Europe. The authors explain the key characteristics of the management of sports organizations as opposed to other organizations. These include the strategic management and setting of long-term goals such as sporting success, sustainable funding, youth training, and community building. The authors present a strategic model for these goals and stakeholders in the context of sport, together with research-based case studies in which the critical factors in the strategic management of successful and unsuccessful sports organizations are identified.

Gaming Guide - Gambling in Europe Nicolae Sfetcu,2016-11-09 Since the emergence of the internet in the 1990s, an increasing number of gambling services have come available on-line or through other new remote communications technologies. The rapid technological advancements, commercial initiatives, and market penetration of such commerce have made this sector of the gambling services industries extremely dynamic and potentially transformative in the years ahead. Demand for gambling services in the early 21 century and for the past half-century in the European Union – as well as in most other parts of the world – has been and is expanding rapidly, for a number of reasons. The commercial and government owned gaming industries of the European Union are organized under a wide variety of ownership regimes and market structures. Ownership and market structures are affected by numerous factors, including Member State laws and regulations; restrictions on product types, characteristics, points of sale, availability, and marketing effort; economies of scale; network effects; and impacts of new technologies. The overall gambling market in Europe is growing, both land-based and online. Lotteries and gambling machines remain the biggest sectors in the overall gambling market. While not all EU Member States have a legal definition of the concepts of “games of chance” and of “gambling”, in most jurisdictions a game of chance is defined as a game that offers an opportunity to compete for prizes, where success depends completely or predominantly on coincidence or an unknown future result and cannot be influenced by the player. At least one of the players loses his or her stake. The first important element characterising a game of chance is that of stake money or monetary value. The second essential characteristic of a game of chance is the element of chance. Success or loss must depend completely or predominantly on coincidence and not on abilities and knowledge. Success is considered to depend in any case on coincidence, if the relevant aspect is the occurrence of an uncertain event. The section Gambling in Europe includes several independent adaptations of the corresponding European Commission works, free to use and freely available via the EU website with © European Union, and translation of the European Commission works with © Nico9lae Sfetcu, the author of this book. Most of the work are published by the European Union during 2004 - 2008, so it is possible to be outdated.
