Fitzgerald's Storm Joseph B. MacInnis, 1998 The Edmund Fitzgerald was the Titanic of the Great Lakes, seven city blocks long and thought to be invincible. One November night she disappeared from Lake Superior so quickly crewmen were unable to make a distress call. Many years later, a team led by Dr. Joseph MacInnis looked for

answers. From interviews, transcripts, and his own dives, Dr. MacInnes has crafted a tale that is gripping and poignant. Re-creating the ship's voyage, he describes the ship, the men, and the events leading up to November 10, 1975.

Soon after departure, highly important submarine plans for the US navy are stolen. The Last Log of the Titanic David G. Brown, 2000-11-05 Nearly nine decades after the event, the sinking of the Titanic continues to command more attention than any other twentieth-century catastrophe. Yet most of what is commonly believed about that fateful night in 1912 is, at best, a body of myth and legend nurtured by the ship's owners and surviving officers and kept alive by generations of authors and moviemakers. That, at least, is the thesis presented in this compellingly bold, thoroughly plausible contrarian reconstruction of the last hours of the pride of the White Star Line. The new but no-less harrowing Titanic story that Captain David G. Brown unfolds is one involving a tragic chain of errors on the part of the well-meaning crew, the pernicious influence of the ship's haughty owner, who was aboard for the maiden trip, and a fatal overconfidence in the infallibility of early twentieth-century technology. Among the most startling facts to emerge are that the Titanic did not collide with an iceberg but instead ran aground on a submerged ice shelf, resulting in damage

not to the ship's sides but to the bottom of her hull. First Officer Murdoch never gave the infamous CRASH STOP (reverse engines) order; rather, he ordered ALL STOP, allowing him to execute a nearly successful S-curve maneuver around the berg. The iceberg did not materialize unheralded from an ice-free sea; the Titanic was likely steaming at 22 1/2 knots through scattered ice, with no extra lookouts posted, for two hours or more before the fatal encounter. Visibility was not poor that night, and the only signs of haze or distortion were those produced by the ice field itself as the Titanic approached. Most startling of all, however, is evidence that the ship might have stayed afloat long enough to permit the rescue of all passengers and crew if Captain Smith, at the behest of his employer, Bruce Ismay, had not given the order to resume steaming. Offering a radically new interpretation of the facts surrounding the most famous shipwreck in history, *The Last Log of the Titanic* is certain to ignite a storm of controversy.

The Search for the Self in Statius' >Thebaid< Jean-Michel Hulls,2021-07-19 The aim of this project is to provide a sustained analysis of the concept of 'self' in Statius' Thebaid. It is this project's contention that the poem is profoundly interested in ideas of identity and selfhood. The poem stages itself as a metapoetic exploration of the difficulties for a belated epicist in finding a place in the literary canon; it shows the impossibility of squaring large-scale epic poetics with small-scale, finely-wrought Callimacheanism; it reflects the violent disjunction between Statius' authorial pose as a poet without power and the extreme violence of his poetics; it opens up the intricacies of constructing original, coherent characters out of intertextual, exemplary models. The central tenet of the project is that Statius in the Thebaid stages his own 'death', but does so that his poem may live. This book is intended for an academic audience including undergraduate and graduate students as well as specialists in the field. Although the project will be of primary importance to readers of Flavian literature, it will also be of interest to those who study intertextuality and characterisation in Roman literature more generally, selfhood and identity in Roman literature and culture and

the reception of Roman literature.

The Wreck of the Portland J. North Conway, 2019-07-01
The SS Portland was a solid and luxurious ship, and its loss in 1898 in a violent storm with some 200 people aboard was later remembered as “New England’s Titanic.” The Portland was one of New England’s largest and most luxurious paddle steamers, and after nine years’ solid performance, she had earned a reputation as a safe and dependable vessel. In November 1898, a perfect storm formed off the New England coast. Conditions would produce a blizzard with 100 miles per hour winds and 60-foot waves that pummeled the coast. At the time there was no radio communication between ships and shore, no sonar to navigate by, and no vastly sophisticated weather forecasting capacity. The luxurious SS Portland, a sidewheel steamer furnished with chandeliers, red velvet carpets and fine china, was carrying more than 200 passengers from Boston to Portland, Maine, over Thanksgiving weekend when it ran headlong into a monstrous, violent gale off Cade Cod. It was never seen again. All passengers and crew were lost at sea. More than half the crew on board were African Americans from Portland. Their deaths decimated the Maine African American community. Before the storm abated it became one of the worst ever recorded in New England waters. The storm, now known as “The Portland Gale,” killed 400 people along the coast and sent more than 200 ships to the bottom, including the doomed Portland. To this day it is not known exactly how many passengers were aboard or even who many of them were. The only passenger list was aboard the vessel. As a result of this tragedy, ships would thereafter leave a passenger manifest ashore. The disaster has been blamed on the hubris of the captain of the Portland, Hollis Blanchard, who decided to leave the safety

of Boston Harbor despite knowing that a severe storm was hurtling up the coast. Blanchard, a long-time mariner, had been passed over for a promotion for a younger captain. He decided he wanted to show the steamship company that they had made a mistake by getting the Portland safely into port ahead of the imminent storm. Author J. North Conway has created here a personal, visceral account of the sinking and the times and the people involved, with stories to bring readers onto the Portland that day: Here is Eben Heuston, the chief steward onboard the ill-fated ship. More than half of the crew of the ship were African Americans. Hueston was an African American who lived in the Portland community of Munjoy Hill and was a member of the Abyssinian Church. After the sinking of the Portland the African American community disappeared and the church closed. And Emily Cobb a nineteen year old singer from Portland's First Parish Church who was scheduled to give her first recital at the church on that Sunday. And Hope Thomas who came to Boston to shop for Christmas and because she decided to exchange some shoes she purchased missed taking the ill-fated Portland. Because of the lack of communications from Maine to Cape Cod, it was days before anyone was able to get word about the fate of the ship or survivors. Author J. North Conway has painstakingly recreated the events, using first-hand sources and testimonies to weave a dramatic, can't-put-it-down narrative in the tradition of Erik Larson's *Isaac's Storm* and Walter Lord's enduring classic, *A Night to Remember*. He brings the tragedy to life with contemporaneous accounts the Coast Guard, from Boston newspapers such as the *Globe*, *Herald*, and *Journal*, and from *The New York Times* and the *Brooklyn DailyEagle*.

Weather: Spaces, Mobilities and Affects Kaya

Barry, Maria Borovnik, Tim Edensor, 2020-12-17 This book

delves into the everyday spaces, diverse mobilities and affective potency of weather. It presents cutting-edge research into the multiplicity of weather phenomena and analyses the lived experiences of humans in conjunction with contemporary issues, notably climate change. The book considers how everyday experiences of weather in the mundane lives of people are linked to broader changes in weather patterns and climate change. Heat, dust, ice, snow, precipitation, sunlight, clouds, tides and fog are states of weather that impact on the ways in which humans become intertwined with landscapes. Our experiences with weather are diverse and ever-changing, and engaging with weather entangles humans with mobilities, materials and landscapes. This book thus explores affective and sensory resonances, drawing upon a variety of theoretical, empirical and creative material to investigate how weather is perceived in different social and cultural contexts. Key themes focus on the mobilities generated by weather, the affective and sensual potency of weather, and the diverse cultural forms and practices that exemplify how weather is historically, geographically and artistically represented. Offering a social and cultural understanding of weather events, this book contributes to a growing literature on weather across various disciplines, including human geography and cultural geography, and will thus appeal to students and scholars of geography, sociology, humanities, cultural studies and the arts.

The Heartland Kristin L. Hoganson, 2019-04-23 A history of a quintessentially American place--the rural and small town heartland--that uncovers deep yet hidden currents of connection with the world. When Kristin L. Hoganson arrived in Champaign, Illinois, after teaching at Harvard, studying at Yale, and living in the D.C. metro area with various stints overseas, she expected to find her new home, well, isolated. Even provincial. After all, she had landed in the American heartland, a place where the nation's identity exists in its pristine form. Or so we have been taught to believe. Struck by the gap between reputation and reality, she determined to get to the bottom of history and myth. The deeper she dug into the making of the modern heartland, the wider her story became as she realized that she'd uncovered an unheralded crossroads of people, commerce, and ideas. But the really interesting thing, Hoganson found, was that over the course of American history, even as the region's connections with the rest of the planet became increasingly dense and intricate, the idea of the rural Midwest as a steadfast heartland became a stronger and more stubbornly immovable myth. In enshrining a symbolic heart, the American people have repressed the kinds of stories that Hoganson tells, of sweeping breadth and depth and soul. In *The Heartland*, Kristin L. Hoganson drills deep into the center of the country, only to find a global story in the resulting core sample. Deftly navigating the disconnect between history and myth, she tracks both the backstory of this region and the evolution of the idea of an unalloyed heart at the center

of the land. A provocative and highly original work of historical scholarship, *The Heartland* speaks volumes about pressing preoccupations, among them identity and community, immigration and trade, and security and global power. And food. To read it is to be inoculated against using the word heartland unironically ever again.

One Three One Julian Cope, 2014-06-17 Welcome to Sardinia: my hell, my home, my prison, my meditation these past sixteen years. What a place to die. But that's precisely why I was back. When drugged-up Time Traveller and '80s musical burnout Rock Section and his fellow English hooligans get kidnapped during Italia '90, there are ruinous implications. But now Rock has returned to Sardinia one final time to settle some scores and uncover the truth. Judgement, consequences, hoodwinking on a grand scale, Gnosticism versus agnosticism... 131 is a Gnostic whodunit that pursues readers' memories of all previous fiction into a peat bog and impales them with seven-foot-long pikes.

The Sinking of the Titanic and Other Shipwrecks David West, Anita Ganeri, 2011-12-15 Shares stories of shipwrecks, including the Titanic, the Mary Rose, and the Monitor.

Olympic Titanic Britannic Simon Mills, 2022-10-13 The Titanic. The Britannic. The Olympic. They are some of the most famous ships in history, but for the wrong reasons. The Olympic Class liners were conceived as the largest, grandest ships ever to set sail. Of the three ships built, the first only lost the record for being the largest because she

was beaten by the second, and they were both beaten by the third. The class was meant to secure the White Star Line's reputation as the greatest shipping company on earth. Instead, with the loss of both the Titanic and the Britannic in their first year of service, it guaranteed White Star's infamy. This unique book tells the extraordinary story of these three extraordinary ships from the bottom up, starting with their conception and construction (and later their modification) and following their very different careers. Behind the technical details of these magnificent ships lies a tragic human story - not just of the lives lost aboard the Titanic and Britannic, but of the designers pushing the limits beyond what was actually possible, engineers unable to prepare for every twist of fate, and ship owners and crew who truly believed a ship could be unsinkable. This fascinating story is told with rare photographs, new computer-generated recreations of the ships, and unique wreck images that explore how well the ships were designed and built. Simon Mills offers unparalleled access to shipbuilders Harland & Wolff's specification book for the Olympic Class, including original blueprints and - being made widely available for the first time - large fold-out technical drawings showing how these extensive plans were meant to be seen.
