Sorted Books Nina Katchadourian, 2013-02-08 A witty and thought-provoking collection of visual poems constructed from stacks of books. Delighting in the look and feel of books, conceptual artist Nina Katchadourian's playful photographic series proves that books' covers—or more specifically, their spines—can speak volumes. Over the past two decades, Katchadourian has perused libraries across the globe, selecting, stacking, and photographing groupings of two, three, four, or five books so that their titles can be read as sentences, creating whimsical narratives from the text found there. Thought-provoking, clever, and at times laugh-out-loud funny (one cluster of titles from the Akron Museum of Art's research library consists of: Primitive Art /Just Imagine/Picasso/Raised by Wolves), *Sorted Books* is an enthralling collection of visual poems full of wry wit and bookish smarts. Praise for *Sorted Books* "Katchadourian's project . . . takes on a weight beyond its initial novelty. It's a love letter to books, book collecting and the act of reading." —San Francisco Chronicle "As a longtime fan of [Katchadourian's] long-running *Sorted Books* project I'm thrilled for the release of *Sorted Books*—a collection spanning nearly two decades of her witty and wise minimalist mediations on life by way of ingeniously arranged book spines. . . . In an era drowned in periodic death tolls for the future of the physical book, her project stands as a celebration of the spirit embedded in the magnificent materiality of the printed page." —Brain Pickings "Katchadourian's stacks possess an understated sophistication; they are true to the intimate nature of books and yet reveal their dramatic features and unexpected potential." —Publishers Weekly

Let the Lord Sort Them Maurice Chammah, 2022-01-18 NEW YORK TIMES EDITORS' CHOICE • A deeply reported, searingly honest portrait of the death penalty in Texas—and what it tells us about crime and punishment in America “If you’re one of those people who despair that nothing changes, and dream that something can, this is a story of how it does.”—Anand Giridharadas, The New York Times Book Review WINNER OF THE J. ANTHONY LUKAS AWARD In 1972, the United States Supreme Court made a surprising ruling: the country’s death penalty system violated the Constitution. The backlash was swift, especially in Texas, where executions were considered part of the cultural fabric, and a dark history of lynching was masked by gauzy visions of a tough-on-crime frontier. When executions resumed, Texas quickly became the nationwide leader in carrying out the punishment. Then, amid a larger wave of criminal justice reform, came the death penalty’s decline, a trend so durable that even in Texas the punishment appears again close to extinction. In Let the Lord Sort Them, Maurice Chammah charts the rise and fall of capital punishment through the eyes of those it touched. We meet Elsa Alcala, the orphaned daughter of a Mexican American family who found her calling as a prosecutor in the nation’s death penalty capital, before becoming a judge on the state’s highest court. We meet Danalynn Recer, a lawyer who became obsessively devoted to unearthing the life stories of men who committed terrible crimes, and fought for mercy in courtrooms across the state. We meet death row prisoners—many of them once-famous figures like

Henry Lee Lucas, Gary Graham, and Karla Faye Tucker—along with their families and the families of their victims. And we meet the executioners, who struggle openly with what society has asked them to do. In tracing these interconnected lives against the rise of mass incarceration in Texas and the country as a whole, Chammah explores what the persistence of the death penalty tells us about forgiveness and retribution, fairness and justice, history and myth. Written with intimacy and grace, *Let the Lord Sort Them* is the definitive portrait of a particularly American institution.

Sorting Things Out Geoffrey C. Bowker, Susan Leigh Star, 2000-08-25 A revealing and surprising look at how classification systems can shape both worldviews and social interactions. What do a seventeenth-century mortality table (whose causes of death include fainted in a bath, frightened, and itch); the identification of South Africans during apartheid as European, Asian, colored, or black; and the separation of machine- from hand-washables have in common? All are examples of classification—the scaffolding of information infrastructures. In *Sorting Things Out*, Geoffrey C. Bowker and Susan Leigh Star explore the role of categories and standards in shaping the modern world. In a clear and lively style, they investigate a variety of classification systems, including the International Classification of Diseases, the Nursing Interventions Classification, race classification under apartheid in South Africa, and the classification of viruses and of tuberculosis. The authors emphasize the role of invisibility in the process by which classification orders human interaction. They examine how categories are made and kept invisible, and how people can change this invisibility when necessary. They also explore systems of classification as part of the built information environment. Much as an urban historian would review highway permits and zoning decisions to tell a city's story, the authors review archives of classification design to understand how decisions have been made. *Sorting Things Out* has a moral agenda, for each standard and category valorizes some point of view and silences another. Standards and classifications produce advantage or suffering. Jobs are made and lost; some regions benefit at the expense of others. How these

choices are made and how we think about that process are at the moral and political core of this work. The book is an important empirical source for understanding the building of information infrastructures.

DESPERATE CREED Alex Kava, 2019-07-31 A TRAILBLAZER IN THE K-9 FICTION GENRE, Kava creates a “dynamic between Ryder and his canines that reveals a world rarely shared in fiction and perhaps nowhere presented more effectively than in this series.” —Phil Jason, Florida Weekly Award-winning author, Alex Kava pulls readers into the middle of the storm and has them gasping for air even as they turn the next page. —A STORM IS COMING— In Alabama: A deadly outbreak of tornadoes sends K9 handlers, Ryder Creed and Jason Seaver with their scent dogs, Grace and Scout to search for survivors. As storms intensify and Ryder and Jason race against time to save victims, they end up racing to save themselves. —NOT EVERYONE’S STORM IS THE SAME— In Chicago: Francine “Frankie” Russo is irritated when her young co-worker calls at 5:00 am for a video-chat and catches her in only a towel. She’s so annoyed with Tyler Gates that she’s barely paying attention when two men confront him on the street. In a matter of seconds, Frankie witnesses Tyler’s murder. Then the killers pick up the phone. And suddenly, they know what Frankie looks like, who she is, where she works and lives. She knows absolutely nothing about them. But one thing’s for certain—they’re coming for her next. —WHEN THE STORM HITS— Frankie calls the only people she knows can help: her childhood friend, Hannah Washington and Hannah’s business partner, Ryder

Creed. Hannah tells her to “come on home,” and she arranges a meeting for Frankie to meet with FBI agent Maggie O’Dell. Meanwhile in the Florida Panhandle: Creed’s sister, Brodie is dealing with her own storm. She’s realizing that after sixteen years of captivity, surviving was only the first step. With the killers hot on her trail, Frankie races to meet Maggie. But she has no idea that she’s driving straight into the grasp of another killer—a monster storm system. She and Maggie will need Ryder and Jason’s help, but no one is safe from the devastation. And by the time the sky clears, none of them will ever be the same. WHO WILL BE STRONG ENOUGH TO SURVIVE? In *Desperate Creed* Alex Kava, once again, delivers her signature trademark combining “well-developed characters” (*Publishers Weekly*) with “a highly original plot” (*Suspense Magazine*) then packing it with “twists, turns and suspense galore” (*Modern Dog*). “Did I mention the dogs? They and their human partners are simply the heart and soul of everything.” (*Florida Weekly*)

The Big Sort Bill Bishop, 2009-05-11 The award-winning journalist reveals the untold story of why America is so culturally and politically divided in this groundbreaking book. Armed with startling demographic data, Bill Bishop demonstrates how Americans have spent decades sorting themselves into alarmingly homogeneous communities—not by region or by state, but by city and neighborhood. With ever-increasing specificity, we choose the communities and media that are compatible with our lifestyles and beliefs. The result is a country that has become so ideologically inbred that people don't know and can't understand those who live just a few miles away. In *The Big Sort*, Bishop explores how this phenomenon came to be, and its dire implications for our country. He begins with stories about how we live today and then draws on history, economics, and our changing political landscape to create one of the most compelling big-picture accounts of America in recent memory.

Sort It by Weight Nicholas O'Hara,2015-07-15 Weight is an important concept in the elementary math classroom as is learning how to sort and classify objects. This colorful book uses familiar objects to exhibit the differences between the adjectives heavy and light and how objects that match these descriptions can be sorted from one another. After reviewing the concepts, readers can demonstrate their understanding at the conclusion of the book and apply their knowledge to situations outside the classroom, too.

Algorithms in a Nutshell George T. Heineman,Gary Pollice,Stanley Selkow,2008-10-14 Creating robust software requires the use of efficient algorithms, but programmers seldom think about them until a problem occurs. *Algorithms in a Nutshell* describes a large number of existing algorithms for solving a variety of problems, and helps you select and implement the right algorithm for your needs -- with just enough math to let you understand and analyze algorithm performance. With its focus on application, rather than theory, this book provides efficient code solutions in several programming languages that you can easily adapt to a specific project. Each major algorithm is presented in the style of a design pattern that includes information to help you understand why and when the algorithm is appropriate. With this book, you will: Solve a particular coding problem or improve on the performance of an existing solution Quickly locate algorithms that relate to the problems you want to solve, and determine why a particular algorithm is the right one to use Get algorithmic solutions in C, C++, Java, and Ruby with implementation tips Learn the expected performance of an algorithm, and the conditions it needs to perform at its best Discover the impact that similar design

decisions have on different algorithms Learn advanced data structures to improve the efficiency of algorithms With Algorithms in a Nutshell, you'll learn how to improve the performance of key algorithms essential for the success of your software applications.

Bash Cookbook Carl Albing,JP Vossen,Cameron Newham,2007-05-24 The key to mastering any Unix system, especially Linux and Mac OS X, is a thorough knowledge of shell scripting. An Archive of Taste Lauren F. Klein,2020-05-12 A groundbreaking synthesis of food studies, archival theory, and early American literature There is no eating in the archive. This is not only a practical admonition to any would-be researcher but also a methodological challenge, in that there is no eating—or, at least, no food—preserved among the printed records of the early United States. Synthesizing a range of textual artifacts with accounts (both real and imagined) of foods harvested, dishes prepared, and meals consumed, An Archive of Taste reveals how a focus on eating allows us to rethink the nature and significance of aesthetics in early America, as well as of its archive. Lauren

F. Klein considers eating and early American aesthetics together, reframing the philosophical work of food and its meaning for the people who prepare, serve, and consume it. She tells the story of how eating emerged as an aesthetic activity over the course of the eighteenth century and how it subsequently transformed into a means of expressing both allegiance and resistance to the dominant Enlightenment worldview. Klein offers richly layered accounts of the enslaved men and women who cooked the meals of the nation's founders and, in doing so, directly affected the development of our national culture—from Thomas Jefferson's emancipation agreement with his enslaved chef to Malinda Russell's *Domestic Cookbook*, the first African American-authored culinary text. The first book to examine the gustatory origins of aesthetic taste in early American literature, *An Archive of Taste* shows how thinking about eating can help to tell new stories about the range of people who worked to establish a cultural foundation for the United States.
