Ignition! John Drury Clark,2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

The Trouble with Dukes Grace Burrowes,2016-12-20 Smart, sexy, and oh-so romantic. ---Mary Balogh, New York Times bestselling author THEY CALL HIM THE DUKE OF MURDER... The gossips whisper that the new Duke of Murdoch is a brute, a murderer, and even worse--a Scot. They say he should never be trusted alone with a woman. But Megan Windham sees in Hamish something different, someone different. No one was fiercer at war than Hamish MacHugh, though now the soldier faces a whole new battlefield: a London Season. To make his sisters happy, he'll take on any challenge--even letting their friend Miss Windham teach him to waltz. Megan isn't the least bit intimidated by his dark reputation, but Hamish senses that she's fighting battles of her own. For her, he'll become the warrior once more, and for her, he might just lose his heart.

Cast Away Naomi Shihab Nye, 2020-02-11 "Nye at her engaging, insightful best." —Kirkus Reviews (starred review) Acclaimed poet and Young People's Poet Laureate Naomi Shihab Nye shines a spotlight on the things we cast away, from plastic water bottles to those less fortunate, in this collection of more than eighty original and never-before-published poems. A deeply moving, sometimes funny, and always provocative poetry collection for all ages. "How much have you thrown away in your lifetime already? Do you ever think about it? Where does this plethora of leavings come from? How long does it take you, even one little you, to fill the can by your desk?" ?Naomi Shihab Nye National Book Award Finalist, Young People's Poet Laureate, and devoted trash-picker-upper Naomi Shihab Nye explores these questions and more in this original collection of poetry that features more than eighty new poems. "I couldn't save the world, but I could pick up trash," she says in her introduction to this stunning volume. With poems about food wrappers, lost mittens, plastic straws, refugee children, trashy talk, the environment, connection, community, responsibility to the planet, politics, immigration, time, junk mail, trash collectors, garbage trucks, all that we carry and all that we discard, this is a rich, engaging,

moving, and sometimes humorous collection for readers ages twelve to adult. Includes ideas for writing, recycling, and reclaiming, and an index.

Head First Java Kathy Sierra, Bert Bates, 2005-02-09 Learning a complex new language is no easy task especially when it's an object-oriented computer programming language like Java. You might think the problem is your brain. It seems to have a mind of its own, a mind that doesn't always want to take in the dry, technical stuff you're forced to study. The fact is your brain craves novelty. It's constantly searching, scanning, waiting for something unusual to happen. After all, that's the way it was built to help you stay alive. It takes all the routine, ordinary, dull stuff and filters it to the background so it won't interfere with your brain's real work--recording things that matter. How does your brain know what matters? It's like the creators of the Head First approach say, suppose you're out for a hike and a tiger jumps in front of you, what happens in your brain? Neurons fire. Emotions crank up. Chemicals surge. That's how your brain knows. And that's how your brain will learn Java. Head First Java combines puzzles, strong visuals, mysteries, and soul-searching interviews with famous Java objects to engage you in many different ways. It's fast, it's fun, and it's effective. And, despite its playful appearance, Head First Java is serious stuff: a complete introduction to object-oriented programming and Java. You'll learn everything from the fundamentals to advanced topics, including threads, network sockets, and distributed programming with RMI. And the new, second edition focuses on Java 5.0, the latest version of the Java language and development platform. Because Java 5.0 is a major update to the platform, with deep, code-level changes, even more careful study and implementation is required. So learning the Head First way is more important than ever. If you've read a Head First book, you know what to expect--a visually rich format designed for the way your brain works. If you haven't, you're in for a treat. You'll see why people say it's unlike any other Java book you've ever read. By exploiting how your brain works, Head First Java compresses the time it takes to learn and retain--complex information. Its unique approach not only shows you what you need to know about Java syntax, it teaches you to think like a Java programmer. If you want to be bored, buy some other book. But if you want to understand Java, this book's for you.
