Childhood by Design Megan Brandow-Faller, 2018-04-19 Informed by the analytical practices of the interdisciplinary 'material turn' and social historical studies of childhood, *Childhood By Design: Toys and the Material Culture of Childhood* offers new approaches to the material world of childhood and design culture for children. This volume situates toys and design culture for children within broader narratives on history, art, design and the decorative arts, where toy design has traditionally been viewed as an aberration from more serious pursuits. The essays included treat toys not merely as unproblematic reflections of socio-cultural constructions of childhood but consider how design culture actively shaped, commodified and materialized shifting discursive constellations surrounding childhood and children. Focusing on the new array of material objects designed in response to the modern 'invention' of childhood-what we might refer to as objects for a childhood by design- *Childhood by Design* explores dynamic tensions between theory and practice, discursive constructions and lived experience as embodied in the material culture of childhood. Contributions from and between a variety of disciplinary perspectives (including history, art history, material cultural studies, decorative arts, design history, and childhood studies) are represented – critically linking historical discourses of childhood with close study of material objects and design culture. Chronologically, the volume spans the 18th century, which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children's use; through the 19th-century expansion of factory-based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household; towards the intersection of early 20th-century child-centered pedagogy and modernist approaches to nursery and furniture design; through the changing consumption and sales practices of the postwar period marketing directly to children through television, film and other digital media; and into the present, where the line between the material culture of childhood and adulthood is increasingly blurred.

The Playful Entrepreneur Mark Dodgson, David Gann, 2018-01-01 A compelling account of how incorporating play into work can help us overcome the uncertainty and turbulence that surrounds work. How can we learn to deal with uncertainty at work? The answer, as Dodgson and Gann eloquently portray in this pathfinding book, is to learn from the adaptive behaviors of entrepreneurs. Play, the authors show, is a crucial component of this. It encourages exploration, experimentation, and curiosity while it also challenges established practices and orthodoxies. It facilitates change in people and organizations. Drawing on in-depth interviews with entrepreneurs and innovators, this book explains why we should incorporate play into work, what play looks like, and how to encourage playfulness in individuals and organizations. Dodgson and Gann identify four key behaviors that endorse,

encourage, and guide play: grace, craft, fortitude, and ambition, and provide a blueprint for an alternative way of working that fosters resilience and encourages innovation and growth in difficult times.

Toy Design Chris van Uffelen, 2010 Toys, fulfilling as they do one of mankind's most basic needs, have existed for as long as we have. From the earliest times both adults and children have used toys to simulate reality or simply to pass time. Renowned designers, artists and architects have always tried their hand at creating toys: from Frank Lloyd Wright's work with Fröbel's building blocks to Josef Hartwig's Bauhaus chess set that is still produced today. Gerrit Rietveld, Pablo Picasso, Marcel Breuer and Andy Warhol also designed toys. However, most often it was craftsmen and -women - such as the seamstress Margarete Steiff (Steiff teddy bears), the carpenters Christiansen (Lego), or the cabinet-maker Hans Beck (Playmobil) - who designed the most successful and enduring toys. Toys for small children are often distinguished by a high level of abstraction (babies' toys, for example, typically have fluid contours, simplified detail drawings and primary colors), although timeless designer toys such as those produced by Naef cross all age limits and can even be found on executive desks. This volume in the Designseries presents both contemporary designer toys and classic toys that are still on the market.

They demonstrate the multidisciplinary approaches to study cognition in young children that include application of cognitive, neuroscience, and developmental paradigms in typically developing youngsters, as well as those affected by clinical conditions, such as traumatic brain injury, exposure to low levels of lead in the environment, and prematurity. Although much work remains to be done, these study results are illustrative of the dynamic work in this exciting development period.

The British Toy Business Kenneth D. Brown, 1996-01-01 At its height British toymaking was a significant industry, with famous names such as Britains and Meccano known throughout the world. While in essence a specialised form of small-scale engineering, its products and market have always been unique, reflecting the current priorities of both parents and children. Yet, while individual toys and marques have been catalogued extensively, no previous history of toymaking as a whole exists. The British Toy Business provides a fascinating example of the development of a specific industry. Many early early toys were home-made. From the eighteenth century, with its growing recognition of children as something other than small adults, date the beginnings of specialised toys, usually produced by small workshops and sold by street-sellers. The nineteenth century, with its industrial growth and middle-class prosperity, saw an expansion of toymaking. The 1960s and 1970s were the most successful years of British toymaking, with companies like Lesney making record profits. Yet British toy makers failed to solve a number of fundamental problems. Following an unexpected sudden downturn in sales at a time of high interest rates, the major names in British toy making, Lesney, Airfix, Mettoy and Dunbee Combex Marx, all collapsed between 1979 and 1985, leaving the business to be dominated largely by importers.
