Self-Esteem Across the Lifespan Mary H. Guindon,2009-10-27 As long as clinicians write “increase self-esteem” on treatment plans without knowing precisely what that means, there is a need for information on the construct of self-esteem and how its many components can have an effect on outcomes. This text defines self-esteem, describes its history and evolution, discusses its controversies, and presents information on intervention strategies that can make a difference when it receives clinical attention. Principles and concepts are applied to various clinical concerns faced by clients in each of the five developmental life stages: childhood, adolescence, young adulthood, midlife, and late life. Book chapters discuss a variety of specific issues– such as child trauma and abuse, ADHD, body image and eating disorders, at-risk adolescents, African American youth, sexuality in young adulthood, alcohol and other drugs issues, lesbians and gay men at midlife, career development, intergenerational conflict in Asian Americans, and loss in late life – and offer detailed strategies for the development and enhancement of self-esteem. Also included is an example of an 8-week self-esteem enhancement program.

Sorting Out the Mixed Economy Amy C. Offner,2019-09-17 The untold story of how welfare and development programs in the United States and Latin America produced the instruments of their own destruction In the years after 1945, a flood of U.S. advisors swept into Latin America with dreams of building a new economic order and lifting the Third World out of poverty. These businessmen, economists, community workers, and architects went south with the gospel of the New Deal on their lips, but Latin American realities soon revealed unexpected possibilities within the New Deal itself. In Colombia, Latin Americans and U.S. advisors ended up decentralizing the state, privatizing public functions, and launching austere social welfare programs. By the 1960s, they had remade the country’s housing projects, river valleys, and universities. They had also generated new lessons for the United States itself. When the Johnson administration launched the War on Poverty, U.S. social movements, business associations, and government agencies all promised to repatriate the lessons of development, and they did so by multiplying the uses of austerity and for-profit contracting within their own welfare state. A decade later, ascendant right-wing movements seeking to dismantle the midcentury state did not need to reach for entirely new ideas: they redeployed policies already at hand. In this groundbreaking book, Amy Offner brings readers to Colombia and back, showing the entanglement of American societies and the contradictory promises of midcentury statebuilding. The untold story of how the road from the New Deal to the Great Society ran through Latin America, *Sorting Out the Mixed Economy* also offers a surprising new account of the origins of neoliberalism.

Grassroots Memorials Peter Jan Margry, Cristina Sánchez-Carretero, 2011-08-01 Grassroots memorials have become major areas of focus during times of trauma, danger, and social unrest. These improvised memorial assemblages continue to display new and more dynamic ways of representing collective and individual identities and in doing so reveal the steps that shape the national memories of those who struggle to come to terms with traumatic loss. This volume focuses on the hybrid quality of these temporary memorials as both monuments of mourning and as focal points for protest and expression of discontent. The broad range of case studies in this volume include anti-mafia shrines, Theo van Gogh's memorial, September 11th memorials, March 11th shrines in Madrid, and Carlo Giuliani memorials in Genoa.
