Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to

improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

**Kids' Stuff** Gary Cross,1999-11-15 To sort out who's who and what's what in the enchanting, vexing world of Barbies(R) and Ninja Turtles(R), Tinkertoys(R) and teddy bears, is to begin to see what's become of childhood in America. It is this changing world, and what it unveils about our values, that Gary Cross explores in *Kids' Stuff*, a revealing look into the meaning of American toys through this century. Early in the 1900s toys reflected parents' ideas about children and their futures. Erector sets introduced boys to a realm of business and technology, while baby dolls anticipated motherhood and building blocks honed the fine motor skills of the youngest children. *Kids' Stuff* chronicles the transformation that occurred as the interests and intentions of parents, children, and the toy industry gradually diverged--starting in the 1930s when toymakers, marketing playthings inspired by popular favorites like Shirley Temple and Buck Rogers, began to appeal directly to the young. TV advertising, blockbuster films like *Star Wars*(R), and Saturday morning cartoons exploited their youthful audience in new and audacious ways. Meanwhile, powerful social and economic forces were transforming the nature of play in American society. Cross offers a richly textured account of a culture in which erector sets and baby dolls are no longer alone in preparing children for the future, and in which the toys that now crowd the racks are as perplexing for parents as they are beguiling for little boys and girls. Whether we want our children to be high achievers in a competitive world or playful and free from the worries of adult life, the toy store confronts us with many choices. What does the endless array of action figures and fashion dolls mean? Are children--or parents--the dupes of the film, television, and toy industries, with their latest fads and fantasies? What does this say about our time, and what does it bode for our future? Tapping a vein of rich cultural history, *Kids' Stuff* exposes the serious business behind a century of playthings.
