*Initiations and Interactions* Teresa A. Cardon, 2007 Research suggests an early start is the key to a successful intervention for children diagnosed with an autism spectrum disorder. What many don't know is that research also shows that for most early intervention programs to be effective, they must involve a child's primary caregivers, especially when it comes to such an all-pervasive area as communication. This book does not advocate that parents steer clear of therapists and specialists. Instead, it attempts to put more control in the parents' hands. Without adding to parents' already busy schedules, Teresa Cardon, a speech language pathologist and author of best-selling *Let's Talk Emotions* (see page 33), discusses the importance of creating a communication environment in the home. Simple everyday tools include deliberate use of books, toys, visual schedules, and labeling, among others.

*Infancy* Lisa M. Oakes, Vanessa Lobue, Marianella Casasola, 2023-09-08 Lisa M. Oakes, Vanessa Lobue, and Marianella Casasola's *Infancy: The Development of the Whole Child* unites historically important and cutting-edge theories and research to illustrate the development of the whole child from birth to age three. Topically organized and written in a conversational tone, the text illustrates the interconnected nature of development through links within its bio-psycho-social coverage. Through its inclusive approach, students see individual similarities and differences in development as a function of factors such as culture, language experience, parenting style, and socioeconomic status. Stories from the authors' own experiences with infants highlight connections between research and parenting, social policy, and everyday contexts, effectively bringing the topics to life for students.
