Encyclopedia of Consumption and Waste Carl A. Zimring, William L. Rathje, Consulting Editor, 2012-02-27 Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations, but examining what we throw away today tells a story in real time and becomes an important and useful tool for academic study. Trash is studied by behavioral scientists who use data compiled from the exploration of dumpsters to better understand our modern society and culture. Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis? How do different societies around the world cope with their garbage in these troubled environmental times? How does our trash give insight into our attitudes about gender, class, religion, and art? The Encyclopedia of Consumption and Waste explores the topic across multiple disciplines within the social sciences and ranges further to include business, consumerism, environmentalism, and marketing to comprise an outstanding reference for academic and public libraries.

Souvenir Rolf Potts, 2018-03-08 *Object Lessons* is a series of short, beautifully designed books about the hidden lives of ordinary things. For as long as people have traveled to distant lands, they have brought home objects to certify the journey. More than mere merchandise, these travel souvenirs take on a personal and cultural meaning that goes beyond the object itself. Drawing on several millennia of examples—from the relic-driven quests of early Christians, to the mass-produced tchotchkes that line the shelves of a Disney gift shop—travel writer Rolf Potts delves into a complicated history that explores issues of authenticity, cultural obligation, market forces, human suffering, and self-presentation. Souvenirs are shown for what they really are: not just objects, but personalized forms of folk storytelling that enable people to make sense of the world and their place in it.' *Object*
