Tradition as Truth and Communication Pascal Boyer,1990-03-30 Tradition is a central concept in the social sciences, but it is commonly treated as unproblematic. Dr. Boyer insists that social anthropology requires a theory of tradition, its constitution and transmission. He treats tradition as a type of interaction which results in the repetition of certain communicative events, and therefore as a form of social action. Tradition as Truth and Communication deals particularly with oral communication and focuses on the privileged role of licensed speakers and the ritual contexts in which certain aspects of tradition are characteristically transmitted. Drawing on cognitive psychology, Dr. Boyer proposes a set of general hypotheses to be tested by ethnographic field research. He has opened up an important new field for investigation within social anthropology.

Traditional Teachings ,

Rituals and Traditional Events in the Modern World Jennifer Laing,Warwick Frost,2014-10-30 Many events have evolved over centuries, drawing on local customs and conditions. However, as the world becomes increasingly globalised, traditional events and the identities they support are increasingly being challenged and rituals may be lost. Reacting against this trend towards homogeneity, communities strive to preserve and even recreate their traditional events, which may require rituals to be resurrected or reinvented for a new audience. The aim of this book is to explore the role of traditional events and rituals in the modern world. The 16 chapters cover a range of case studies of the performance of ritual through events, including their historical antecedents and development over time, as well as their role in society, link with identities both seemingly fixed and fluid and their continued relevance. The cases examined are not museum pieces, but rather vibrant festivals and events that continue to persist. Drawing on the power of history and cultural tradition, they are manifestations of heritage, existing in three temporalities: celebrating the past, occurring in the present and aiming to continue into and influence the future. Iconic events including Chinese New Year, Hogmanay and the New Orleans Mardi Gras are examined and examples are drawn from a diverse range of countries such as South Korea, China, Laos, the United States, Scotland, Italy, India and Haiti. This volume provides a deep understanding upon the role of tradition and ritual within events, from a global perspective and will be valuable reading for students, researchers and academics interested in events, heritage and culture.

Origin and Traditional History of the Wyandotts, and Sketches of Other Indian Tribes of North America (Classic Reprint) Peter Dooyentate Clarke,2017-09-16 Excerpt from Origin and Traditional History of the Wyandotts, and Sketches of Other Indian Tribes of North America Ask the red man, in his primeval nature, to what part of the world (besides this continent), can he trace his ancestors, or whether he believes, when told by the white man, that he sprung from some of the lost or scattered tribes of Israel, and he will return you this answer: the Great and Good Spirit made us, and placed us here. To the educated Indian, this history may suddenly appear like some phantom from the past, and who may find fault with it. To such, I would say, well then, why don't you write a history of your nation, yourself? About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Protecting Traditional Knowledge Daniel F. Robinson,Ahmed Abdel-Latif,Pedro Roffe,2017-07-14 This is the first comprehensive review of the Intergovernmental Committee (IGC) of the World Intellectual Property Organization (WIPO) established in 2000. It provides an in-depth consideration of the key thematic areas within WIPO discussions – genetic resources (GRs), traditional knowledge (TK) and traditional cultural expressions (TCEs) through the perspectives of a broad range of experts and stakeholders, including indigenous peoples and local communities. It also looks at how these areas have been treated in a number of forums and settings (including national systems and experiences, and also in trade agreements) and the interface with WIPO discussions. Furthermore, the book analyses the process and the negotiation dynamics since the IGC received a mandate from WIPO members, in 2009, to undertake formal text-based negotiations towards legal instruments for the protection of GR, TK and TCEs. While there has been some progress in these negotiations, important disagreements persist. If these are to be resolved, the adoption of these legal instruments would be a significant development towards resolving key gaps in the modern intellectual property system. In this regard, the book considers the future of the IGC and suggests options which could contribute towards achieving a consensual outcome.

Traditional, National, and International Law and Indigenous Communities Marianne O. Nielsen,Karen Jarratt-Snider,2020-05-05 This volume of the Indigenous Justice series explores the global effects of marginalizing Indigenous law. The essays in this book argue that European-based law has been used to force Indigenous peoples to assimilate, has politically disenfranchised Indigenous communities, and has destroyed traditional Indigenous social institutions. European-based law not only has been used as a tool to infringe upon Indigenous human rights, it also has been used throughout global history to justify environmental injustices, treaty breaking, and massacres. The research in this volume focuses on the resurgence of traditional law, tribal-state relations in the United States, laws that have impacted Native American women, laws that have failed to protect Indigenous sacred sites, the effect of international conventions on domestic laws, and the role of community justice organizations in operationalizing international law. While all of these issues are rooted in colonization, Indigenous peoples are using their own solutions to demonstrate the resilience, persistence, and innovation of their communities. With chapters focusing on the use and misuse of law as it pertains to

Indigenous peoples in North America, Latin America, Canada, Australia, and New Zealand, this book offers a wide scope of global injustice. Despite proof of oppressive legal practices concerning Indigenous peoples worldwide, this book also provides hope for amelioration of colonial consequences.

Traditional Foods Are Your Best Medicine Ron Schmid,1997-04-01 This book traces the cause of many chronic health problems to our modern diet and shows how a return to traditional foods can improve one's well-being. Modern medicine now recognizes that the present-day Western diet is responsible for many of today's chronic illnesses. Nutritionists and anthropologists have noted the decline in health that accompanies indigenous peoples' transition from traditional to modern diets. In *Traditional Foods Are Your Best Medicine*, Ron Schmid explains how a return to a traditional diet can help you reduce your risk of heart attack by 50 percent; fight allergies, chronic fatigue, arthritis, skin problems, and headaches; recover from colds and flu in a day or two; and increase your life-expectancy. Chapters focusing on the major food groups, common diets, and health goals enable you to tailor a diet to your special needs. New edition, previously titled *Native Nutrition*.

Beyond Intellectual Property Darrell Addison Posey,Graham Dutfield,1996 Cultural property, aboriginal people, ethnobiology, legal status, laws. *Modernization of Traditional Food Processes and Products* Anna McElhatton,Mustapha Missbah El Idrissi,2016-02-22 This volume of the Trilogy of Traditional Foods, part of the ISEKI Food Series, describes important aspects of the production of foods and beverages from all over the globe. The intention of this volume is to provide readers with an appreciation of how products were initially made, and which factors have shaped their development over time. Some modern products have remained local, while others are commodities that appear in peoples’ cabinets all over the world. *Modernization of Traditional Food Processes and Products* is divided into two sections. The first section focuses on products originating in Europe, while the second section is a collection of products from the rest of the world. The volume is intended for both the practicing food professional and the interested reader.

Traditional Oral Epic John Miles Foley,1993-10-28 Until now, the emphasis in studies of oral traditional works has been placed on addressing the correspondences among traditions--shared structures of formula, theme, and story-pattern. Professor Foley argues that to give the vast and complex body of oral literature its due, we must first come to terms with the endemic heterogeneity of traditional oral epics, with their individual histories, genres, and documents, as well as both the synchronic and diachronic aspects of their poetics. This book explores the incongruencies among traditions and focuses on the qualities specific to certain oral and oral-derived works.
