Traditional Games in South America Veerle van Mele,Roland Renson,1992

Indigenous, Traditional, and Folk Sports Mariann Vaczi,Alan Bairner,2023-10-06 This is the first book to focus on indigenous, traditional, and folk sports and sporting cultures. It examines the significance of sporting cultures that have survived the emergence and diffusion of western sports and have carved out a unique position not only in spite of modernity but also in response to it. Presenting case studies from around the world, including from Europe, Asia, Africa, and the Americas, this book draws on multidisciplinary work from sociology, anthropology, history, cultural studies, and political science, exploring key themes in the social sciences including nationalism, identity, decolonisation, and gender. From Turkish oil wrestling, kabaddi in South Asia, Iroquois lacrosse, to wushu and sumo in East Asia and various European traditional sports, these sporting practices continue to capture the indigenous imagination on the margins of the western hegemonic sport complex. Situated in the fissures between the local, the national, and the global; between the archaic and the modern; and between ritual and record, they inhabit a liminal space of transformation as they assume new cultural and political meanings, offering important perspectives on the complexities and contradictions of modernity. The volume's decolonial perspective lies in its promotion of indigenous and subaltern worldviews through their traditional movement cultures on the margins of the western hegemonic sport complex. This is a fascinating reading for anybody with an interest in sport, nationalism, Indigenous studies, heritage and folklore studies, anthropology, social and cultural history, or globalisation.

The Indigenous Games of the People of the Coastal Region of Kenya Mwangi Peter Wanderi,2011 Since the time of the early Greek, Egyptian and Chinese civilizations, games are depicted as having played a significant role in the lives of the people, similarly, games of different kinds have been a vital hallmark of people's culture in Kenya, and everywhere else in Africa, for hundreds of years. The focus of this research project is to identify the traditional games of the people from the Kenyan coastal region and describe how they were conducted as well as the socio-cultural setting within which they were performed, and to establish the significance of these activities in enhancing the acquisition and learning of verbal information, cognitive strategies, attitudes, and motor skills by the participants in specific and their significance to the community in general. The study also suggests ways in which traditional games could be adopted into the contemporary educational curriculum as well as for mass sports participation.

Sports around the World [4 volumes] John Nauright,2012-04-06 This multivolume set is much more than a collection of essays on sports and sporting cultures from around the world: it also details how and why sports are played wherever they exist, and examines key charismatic athletes from around the world who have transcended their sports. Sports Around the World: History, Culture, and Practice provides a unique, global overview of sports and sports cultures. Unlike most works of this type, this book provides both essays that examine general topics, such as globalization and sport, international relations and sport, and tourism and sport, as well as essays on sports history, culture, and practice in world regions—for example, Latin America and the Caribbean, the Middle East and North Africa, Europe, and Oceania—in order to provide a more global perspective. These essays are followed by entries on specific sports, world athletes, stadiums and arenas, famous games and matches, and major controversies. Spanning topics as varied as modern professional cycling to the fictional movie Rocky to the deadly ball game of the ancient Mayans, the first three volumes contain overview essays and entries for specific sports that have been and are currently practiced around the world. The fourth volume provides a compendium of information on the winners of major sporting competitions from around the world. Readers will gain invaluable insights into how sports have been enjoyed throughout all of human culture, and more fully comprehend their cultural contexts. The entries provide suggestions for further reading on each topic—helpful to general readers, students with school projects, university students and academics alike. Additionally, the four-volume Sports Around the World spotlights key charismatic athletes who have changed a sport or become more than just an outstanding player.

The Viking Tradition Susan J. Bandy,2003 In 1902, Martha Berry founded the Industrial School for Boys to educate the children of the Southern Appalachian Mountains, and in 1909 the school admitted women. The institution grew from a mountain industrial school to a two-year college in its first twenty-four years, became a four-year college in 1930, and has since become one of the leading liberal arts colleges in the South. This volume portrays, in word and image, the role of sports at Berry College throughout its 100-year history. Situating athletics within the social and cultural life of the college, the book includes both intramural and intercollegiate sport, and traces the evolution of the Viking tradition as it both parallels and reflects the development of sport in the United States. The story begins with the recreational and leisure activities of the early years of the school and traces the continuation of the sporting spirit from the days of the Silver and the Blue through the post-war Blue Jacket tradition, and ends with the Viking years of the last four decades. Of notable interest in the book is the development of the women's sports program, which has brought four national titles to the college; the importance of soccer to the college; the well-rounded intercollegiate program, which currently fields teams in seven sports; and an excellent intramural program.
