Card Sorting Donna Spencer,2009-04-01 Card sorting helps us understand how people think about content and categories. Armed with this knowledge, we can group information so that people can better find and understand it. In this book, Donna describes how to plan and run a card sort, then analyse the results and apply the outcomes to your project.

Paper Lion George Plimpton,2016-04-26 The book that made a legend -- and captures America's sport in detail that's never been matched, featuring a foreword by Nicholas Dawidoff and never-before-seen content from the Plimpton Archives. George Plimpton was perhaps best known for Paper Lion, the book that set the bar for participatory sports journalism. With his characteristic wit, Plimpton recounts his experiences in talking his way into training camp with the Detroit Lions, practicing with the team, and taking snaps behind center. His breezy style captures the pressures and tensions rookies confront, the hijinks that pervade when sixty high-strung guys live together in close quarters, and a host of football rites and rituals. One of the funniest and most insightful books ever written on football, Paper Lion is a classic look at the gridiron game and a book The Wall Street Journal calls a continuous feast...The best book ever about football -- or anything!

Grammatical Inference: Algorithms and Applications Pieter Adriaans,Henning Fernau,Menno van Zaanen,2002-09-11 The Sixth International Colloquium on Grammatical Inference (ICGI2002) was held in Amsterdam on September 23-25th, 2002. ICGI2002 was the sixth in a series of successful biennial international conferences on the area of grammatical inference. Previous meetings were held in Essex, U.K.; Alicante, Spain; Montpellier, France; Ames, Iowa, USA; Lisbon, Portugal. This series of meetings seeks to provide a forum for the presentation and discussion of original research on all aspects of grammatical inference. Grammatical inference, the process of inferring grammars from given data, is a field that not only is challenging from a purely scientific standpoint but also finds many applications in real-world problems. Despite the fact that grammatical inference addresses problems in a relatively narrow area, it uses techniques from many domains, and is positioned at the intersection of a number of different disciplines. Researchers in grammatical inference come from fields as diverse as machine learning, theoretical computer science, computational linguistics, pattern recognition, and artificial neural networks. From a practical standpoint, applications in areas like natural language acquisition, computational biology, structural pattern recognition, information retrieval, text processing, data compression and adaptive intelligent agents have either been demonstrated or proposed in the literature. The technical program included the presentation of 23 accepted papers (out of 41 submitted). Moreover, for the first time a software presentation was organized at ICGI. Short descriptions of the corresponding software are included in these proceedings, too.

The papers are organized in topical sections on: Parallel and Distributed Architectures, Software Systems and Programming Models, Distributed and Parallel and Network-based Computing, Big Data and its Applications, Distributed and Parallel Algorithms, Applications of Distributed and Parallel Computing, Service Dependability and Security, IoT and CPS Computing, Performance Modelling and Evaluation.
