Transforming Your Story: A Path to Healing After Abortion Wendy Giancola, 2018-09-27 Following an abortion, many women may be confused by their emotional and behavioral responses, such as regret, anger, depression, shame, loss, or loneliness. They may have relationship or intimacy problems and have difficulty giving and receiving forgiveness. Transforming Your Story: A Path to Healing after Abortion is an abortion recovery resource created for use in small facilitated groups to provide healing support. It can also be beneficial for those who are seeking healing individually with support from a friend, mentor, or helping professional. In this book, stories from the Bible provide an avenue for women to explore their own stories and process their conflicting emotions one step at a time. Personal questions delve into the heart and mind, spiritual tools and symbolic actions are suggested to engage the body and mind, and prayer is encouraged to open the heart and spirit to hope and peace. Accounts by women who have found healing from a past abortion foster a sense of community and provide encouragement. By hiking this path to recovery, a woman can transform her painful story of confusion into a story of hope and healing.

Transforming Organizations Jacques Chlopczyk, Christine Erlach, 2019-05-11 Achieving true change and innovation depends on our ability to re-imagine and re-author the futures we want our organizations to have – and to open new perspectives and new ways of thinking, being and doing in the process. Narrative approaches and storytelling are powerful tools that can help us create a new future for branding and marketing, change, leadership, organizational learning and development. Gathering contributions by scholars and practitioners from various disciplines, this book provides a unique overview of an emerging field of practice in organizations and communities. Rooted in a narrative conceptual framework, the respective papers describe a broad range of trans-disciplinary applications, tools and methods for effectively working with stories.

Story Thinking John Lewis, 2019-08-08 This book is about the major organizational challenges related to the Fourth Industrial Revolution (4IR), and ways for visionary leaders to begin addressing them now by rethinking traditional views of change, learning, and leadership. This is not another book about the gloom and doom associated with predicted job losses due to robots and artificial intelligence (AI). Instead, this is a solutions-based book that provides a new way of thinking about the organization, called Story Thinking. The first industrial revolution was based on steam and mechanical production. The second revolution was based on electricity and assembly lines. The third revolution was based on computing and online workflow. All three of these technological advancements completely changed the underlying approaches towards business. But the next revolution will be even more profound. The fourth revolution is primarily based on intelligence and digital connectivity. This will move us beyond building a workforce around the technology-the workforce will also be competing with the technology. Successful organizations will need to do more than just adopt smarter tools-they will need to adopt smarter ways of thinking beyond current memorized prescriptive change models. Within the second industrial revolution, we became accustomed to saying that everything happens within a process-and the framework of process became our mental model of work. Now, in the fourth industrial revolution, we will need to understand that the framework of story must

become our mental model of work. Storytelling is based on a sensemaking pattern for how we should talk-but Story Thinking is based on this sensemaking pattern for how we should work.

Your Spacious Self Stephanie Bennett Vogt, 2023-09-12 A revised and expanded edition of Your Spacious Self. Author and space-clearing expert Stephanie Bennett Vogt invites readers to clear their homes and restore their spirits by releasing the clutter that prevents them from experiencing who they really are. It's a jungle...in here! Behind our stress, clutter, and confusion is an infinitely spacious place one might call stillness or joy. This is our natural state of being, but we usually don't experience it, because we are caught in a web of material

possessions, desires, and fears. Our clutter, writes Vogt, a longtime space clearing expert, becomes like another member of the family that we feed, house, and lug around. She shows us that it's not our stuff, but the holding on to it that creates a force field of stuck-ness that clouds our perceptions and paralyzes our lives. Clutter is not just the junk spilling out of the closet. It is any thing or thought that prevents us from experiencing who we truly are. Clearing is not a tedious exercise of throwing away, but a gentle journey of letting go - one small step, drawer, or moment at a time. With all-new nourishing lessons in slowing down, simplifying, and self-care, *Your Spacious Self* shows you how to clear your home, quiet the mind, and restore your spirit, in ways that feel good and last a lifetime. Included are daily tips and meditations, a weekly worksheet, and guidelines for starting and maintaining a clearing support group--perfect for book groups and support groups. This updated and 10th anniversary edition replaces the previously published edition (9780981877181).

Narrative Change Hans Hansen, 2020-07-28 Texas prosecutors are powerful: in cases where they seek capital punishment, the defendant is sentenced to death over ninety percent of the time. When management professor Hans Hansen joined Texas's newly formed death penalty defense team to rethink their approach, they faced almost insurmountable odds. Yet while Hansen was working with the office, they won seventy of seventy-one cases by changing the narrative for death penalty defense. To date, they have succeeded in preventing well over one hundred executions--demonstrating the importance of changing the narrative to change our world. In this book, Hansen offers readers a powerful model for creating significant organizational, social, and institutional change. He unpacks the lessons of the fight to change capital punishment in Texas--juxtaposing life-and-death decisions with the efforts to achieve a cultural shift at Uber. Hansen reveals how narratives shape our everyday lives and how we can construct new narratives to enact positive change. This narrative change model can be used to transform corporate cultures, improve public services, encourage innovation, craft a brand, or even develop your own leadership. *Narrative Change* provides an unparalleled window into an innovative model of change while telling powerful stories of a fight against injustice. It reminds us that what matters most for any organization, community, or person is the story we tell about ourselves--and the most effective way to shake things up is by changing the story.

Story Weaving Peter M. Morgan, 1986 Morgan shows how to use storytelling as a tool to evoke experiences and sustain community in the congregation.

Transforming a College George Keller,2014-03-11 Publisher description: Forty years ago, North Carolina's Elon College was struggling to attract students and remain solvent. Today Elon has emerged as one of America's most desirable colleges. How did this transformation happen? What can other colleges and universities learn from Elon's remarkable turnaround? Taking a new approach to the study of higher education, George Keller examines the decisions made by Elon's administration, trustees, and faculty to transform a school with a limited endowment into a top regional university. Using Elon as a case study, Keller sheds light on high-stakes competition among America's colleges and universities -- where losers face contraction or closure and winners gain money, talented students, and top faculty.

Jolt Mark Miller,2018-02-20 The death of a child. Life-threatening illness. Plane crashes. Terror attacks. Natural disasters. Some of us never fully recover from unimaginable traumas like these, but some not only survive—they bounce back to thrive and grow. Jolt tells the stories of people transformed by trauma, and the new paths that they pursue. • Molly McDonald was an affluent suburban Detroit mom who faced financial ruin following a diagnosis of breast cancer. She started The Pink Project, which provides transitional financial assistance to low-income breast cancer patients. • Liz and Steve Alderman lost their son in the World Trade Center on 9/11. As a tribute to him, they launched a foundation that builds and operates mental health clinics in post-conflict countries. More than ten years later, the foundation is going strong. • John Gallina and Dale Beatty, both veterans of the Iraq War, suffered traumatic injuries. When they came home, they started Purple Heart Homes, a nonprofit that provides housing solutions for homeless and low-income veterans. • Lucy McBath suffered the horrifying murder of her teenage son in a high-profile white-on-black shooting. Lucy quit her job as a flight attendant and has become a nationally known advocate for gun control. Jolt: Stories of Trauma and Transformation tells the compelling stories of people who have moved beyond trauma to ask, “How can I make my life—and the lives of others—better?”

Old Stories, New Readings Miriam López-Rodríguez,Alfonso Ceballos Muñoz,Inmaculada Pineda-Hernández,2015-02-27 Whether imaginary or based on real events, stories are at the core of any culture. Regardless of their length, their rhetoric strategies, or their style, humans tell stories to each other to express their innermost fears and needs, to establish a point within an argument, or to engage their listeners in a fabricated composition. Stories can also serve other purposes, such as being used for entertainment, for education or for the preservation of certain cultural traits. Storytelling is at the heart of human interaction, and, as such, can foster a dialogic

narrative between the person creating the story and their audience. In literature, this dialogue has been traditionally associated with narrative in general, and with the novel in particular. However, other genres also make use of storytelling, including drama. This volume explores the ways in which American theatre from all eras deals with this: how stories are told onstage, what kinds of stories are recorded in dramatic texts, and how previously neglected realities have gained attention through the American playwright's telling, or retelling, of an event or action. The stories unfolded in American drama follow recent narratology theories, particularly in the sense that there is a greater preference for those so-called small stories over big stories. Despite the increase in the production of this type of texts and the growing interest in them in the field of narratology, small stories are literary episodes that have been granted less critical attention, particularly in the analysis of drama. As such, this volume fills a void in the study of the stories presented on the American stage.

Religious Stories in Transformation: Conflict, Revision and Reception Alberdina Houtman, Tamar Kadari, Marcel Poorthuis, Vered Tohar, 2016-10-18 In this volume, the editors have brought together a rich multidisciplinary collection of papers on the incorporation and adaptation of existing stories in a new context. It presents a vast array of research in mutual interaction between ancient myths, Judaism, Christianity, Islam, and modern secular culture.

Change Your Story, Change Your Life Carl Greer, 2014-05-01 Change Your Story, Change Your Life is a practical self-help guide to personal transformation using traditional shamanic techniques combined with journaling and Carl Greer's method for dialoguing that draws upon Jungian active imagination. The exercises inspire readers to work with insights and energies derived during the use of modalities that tap into the unconscious so that they may consciously choose the changes they would like to make in their lives and begin implementing them.

Retelling the Stories of Our Lives: Everyday Narrative Therapy to Draw Inspiration and Transform Experience David Denborough, 2014-01-06 Powerful ideas from narrative therapy can teach us how to create new life stories and promote change. Our lives and their pathways are not fixed in stone; instead they are shaped by story. The ways in which we understand and share the stories of our lives therefore make all the difference. If we tell stories that emphasize only desolation, then we become weaker. If we tell our stories in ways that make us stronger, we can soothe our losses and ease our sorrows. Learning how to re-envision the stories we tell about ourselves can make an enormous difference in the ways we live our lives. Drawing on wisdoms from the field of narrative therapy, this book is designed to help people rewrite and retell the stories of their lives. The book invites readers to take a new look at their own stories and to find significance in events often neglected, to find sparkling actions that are often discounted, and to find solutions to problems and predicaments in unexpected places. Readers are introduced to key ideas of narrative practice like the externalizing problems - 'the person is not the problem, the problem is the problem' - and the concept of re-memembering one's life. Easy-to-understand examples and exercises demonstrate how these ideas have helped many people overcome intense hardship and will help readers make these techniques their own. The book also outlines practical strategies for reclaiming and celebrating one's experience

in the face of specific challenges such as trauma, abuse, personal failure, grief, and aging. Filled with relatable examples, useful exercises, and informative illustrations, *Retelling the Stories of Our Lives* leads readers on a path to reclaim their past and re-envision their future.
