Address Variation in Sociocultural Context Agnese Bresin, 2021-02-15 This study looks at the sociocultural context of five Italian regions and at the situational context of restaurant encounters (a sub-type of service encounters) to examine address variation in spoken Italian—with a focus on singular address pronouns tu, voi and lei. It offers a thorough examination of distance and power dynamics between waiters and customers in a wide range of restaurant types. This book marks the introduction of Italian to the field of regional pragmatic variation and it will be of interest to linguists, Italianists and researchers more broadly working on service encounters. The author offers a new dimension to the understanding of social interaction and language use in contemporary Italy, uncovering cultural and linguistic differences between even adjacent geographical areas within a modern European nation state.

New Challenges in Applied Intelligence Technologies Radoslaw Katarzyniak, 2008-06-17 To build intelligent systems that can cope with real world problems we need to - develop computational mechanisms able to deal with very large amounts of data, generate complex plans, schedules, and resource allocation strategies, re-plan their actions in real time, provide user friendly communication for human-device interactions, and perform complex optimization problems. In each of these tasks intelligence technologies play an important role, providing designers and creators with effective and adequate computational models. The field of intelligence technologies covers a variety of computational approaches that are often suggested and inspired by biological systems, exhibiting functional richness and flexibility of their natural behavior. This class of technologies consists of such important approaches as data mining algorithms, neural networks, genetic algorithms, fuzzy and multi-valued logics, rough sets, agent-oriented computation, often integrated into complex hybrid solutions. Intelligence technologies are used to build machines that can act and think like living systems, solve problems in an autonomous way, develop rich private knowledge bases and produce results not foreseen and programmed in a direct way by designers and creators.

Islamic Fashion and Anti-Fashion Emma Tarlo, Annelies Moors, 2013-08-15 Introducing innovative new research from international scholars working on Islamic fashion and its critics, *Islamic Fashion and Anti-Fashion* provides a global perspective on muslim dress practices. The book takes a broad geographic sweep, bringing together the sartorial experiences of Muslims in locations as diverse as Paris, the Canadian Prairie, Swedish and Italian bath houses and former socialist countries of Eastern Europe. What new Islamic dress practices and anxieties are emerging in these different locations? How far are they shaped by local circumstances, migration histories, particular religious traditions, multicultural interfaces and transnational links? To what extent do developments in and debates about Islamic dress cut across such local specificities, encouraging new channels of communication and exchange? With original contributions from the fields of anthropology, fashion studies, media studies, religious studies, history, geography and cultural studies, *Islamic Fashion and Anti-Fashion* will be of interest to students and scholars working in these fields as well as to general readers interested in the public presence

of Islam in Europe and America.

Modern Sport - The Global Obsession Boria Majumdar, Fan Hong, 2013-09-13 Sport has become more than a simple physical expression or game- it now pervades all societies at all levels and has become bound up in nationalism, entertainment, patriotism and culture. Now a global obsession, sport has infiltrated into all areas of modern life and despite noble ideals that sport stands above politics, religion, class, gender and ideology, the reality is often very different. These essays by leading academics and rising new talent consider the phenomenon of modern sport and its massive influence over global society. Together, this collection is also a tribute to the pioneering and inspirational work of Professor J.A. Mangan on the political, religious, class and gender-based aspects of modern sport, from academics greatly influenced by him and his writing. This book was previously published as a special issue of The International Journal of the History of Sport.

Cases in Marketing Management Kenneth E. Clow, Donald Baack, 2011-03-28 This comprehensive collection of 38 cases selected from Ivey Publishing helps students understand the complex issues that marketing professionals deal with on a regular basis. The cases were chosen to help students apply conceptual, strategic thinking to issues in marketing management, as well as provide them with more practical operational ideas and methods. Cases were chosen from around the world, from small and large corporations, and include household names such as Twitter, Best Buy, Ruth's Chris, and Kraft Foods. The majority of the cases are very recent (from 2009 or later). Each chapter begins with an introductory review of the topic area prior to the set of cases, and questions are included after each case to help students to think critically about the material. Cases in Marketing Management is edited by Kenneth E. Clow and Donald Baack, and follows the structure and goals of their textbook Marketing Management: A Customer-Oriented Approach. It can also be used as a stand-alone text, or as a supplement to any other marketing management textbook, for instructors who want to more clearly connect theory and practice to actual cases.

Computational Intelligence in Sports Iztok Fister,Iztok Fister Jr.,Dušan Fister,2018-12-17 This book presents recent research on computational intelligence (CI) algorithms in the field of sport. In the modern age, information technologies have greatly reduced the need for human effort in the carrying out of many daily tasks. These technologies have radically influenced the lives of humans, and the information society in general. Unfortunately, these advances have brought with them certain negative effects, including the encouragement of sedentary lifestyles and the attendant health problems such as obesity that these engender. Other modern maladies, chiefly cardiovascular disease, diabetes, and cancer, have also been on the increase. Today, sports are virtually the only activity that still connects modern humans to their original lifestyle, which was based on physical motion. This book tears familiarizing sports scientists with the foundations of computational intelligence, while at the same time presenting the problems that have arisen in the training domain to computer scientists. Lastly, the book proposes the use of an Artificial Sports Trainer designed to enhance the training of modern athletes who cannot afford the considerable expense of hiring a human personal trainer. This intelligent system can monitor performance and design and direct appropriate future training, thus promoting both healthy lifestyles and competitive success in athletes.

Sport In Consumer Culture John Horne,2017-09-16 This book offers a distinctive introduction to understanding the position of sport in consumer society. Drawing on recent developments in sociological theory and research, particularly in relation to debates about culture and consumption, the book examines how sport - as both recreational practice and commercial spectacle - has become more central to the capitalist 'economies of signs and space'. Containing up-to-date research findings and identifying key issues in the study and politics of sport in consumer culture, this is essential reading for all students seeking to broaden their understanding of sport in society.

Your Guide To Reach Innovation Munther Al Dawood,2022-09-16 Why does this book matter? I have spent months thinking about innovation and how to reach it, finding this task challenging to get references that are easy to

understand and practice to make innovation. For many people, there is a lot of misconception about innovation and how to develop it, making this book a valuable resource to guide you to reach innovation and specifically answer the following questions: 1. What is the concept of innovation? Innovation is creative thinking and practical creativity to make novel ideas that bring significant value to customers and companies. Innovation comes in a variety of outcomes as new or improved products, invented or upgraded processes, enhancement of customer experience, marketing activities, or breakthrough technology. Besides, innovation is vital to both customers and businesses as it enhances the value propositions, improves product design and usability, reduces costs, and increases customer experience, yet it leads to business profitability and sustainability. 2. What is the framework of innovation? One of the book's merits is designing a comprehensive framework for innovation, explaining four key subjects of innovation: inputs, processes, outputs, and control. This framework enables readers to understand innovation flows and requirements. Innovation inputs include vision, strategy, leadership, resources, system, and disciplined culture. Innovation processes include inspiration, synthesis, ideating and experimenting, and implementation. Innovation outputs cover three spaces relevant to customers, businesses, and technology. Innovation control involves aligning, monitoring and controlling, quality checks, testing, and assessment. 3. What are the types of innovation? There are many types of innovation, although they all share the same concept of innovation attributed to novelty and value advantages. Innovation comes in different types like lifecycle categories, disruptive, incremental, product, process, business model, configuration, customer experience, and open and closed model of innovation. 4. How do you diffuse a business innovation? The diffusion of technological innovation explains how innovation rollouts in the market. In the technology lifecycle, an innovation product begins as a breakthrough technology developed by techies, then diffused to the market as technology products and applications by early adopters. Then, these technology products are transformed into innovation platforms by the early majority, followed by slowing down the growth rate of revenues and reaching maturity, encouraging late majorities to involve sustainable innovation to improve customer experience and operational excellence. Last, the cycle reaches a maturity where laggards involve in renewal activities of innovation. 5. How can you design a business model for innovation? A business model explains how a firm creates, delivers, and captures values. A business model typically identifies three elements: value creation, transaction, and resources. The book discusses various kinds of business models and proposes criteria for the assessment of business models. The book also draws a new business model for innovation that comprises eight business elements: (1) customer segment, (2) customer-value fit, (3) commercializing, (4) activities, (5) resources, (6) partnership, (7) profitability, and (8) measurement. 6. What are the best practices and models of innovation? The book illustrates (29) best practices and models of innovation like lean start-up thinking, blue ocean strategy, business model Canvas, good-to-great thinking, design thinking, job-to-do thinking, SPRINT, open innovation, and more.

The Rise and Fall of the Ethnic Revival Joshua A. Fishman, Michael H. Gertner, Esther G. Lowy, William G. Milán, 2013-02-06 CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in

all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

The Fashion Forecasters Regina Lee Blaszczyk, Ben Wubs, 2018-03-08 The fashion business has been collecting and analyzing information about colors, fabrics, silhouettes, and styles since the 18th century - activities that have long been shrouded in mystery. The Fashion Forecasters is the first book to reveal the hidden history of color and trend forecasting and to explore its relevance to the fashion business of the past two centuries. It sheds light on trend forecasting in the industrial era, the profession's maturation during the modernist moment of the 20th century, and its continued importance in today's digital fast-fashion culture. Based on in-depth archival research and oral history interviews, The Fashion Forecasters examines the entrepreneurs, service companies, and consultants that have worked behind the scenes to connect designers and retailers to emerging fashion trends in Europe, North America, and Asia. Here you will read about the trend studios, color experts, and international trade fairs that formalized the prediction process in the modern era, and hear the voices of leading contemporary practitioners at international forecasting companies such as the Doneger Group in New York and WGSN in London. Probing the inner workings of the global fashion system, The Fashion Forecasters blends history, biography, and ethnography into a highly readable cultural narrative.

Athletes Pressing Charges Jörg Krieger, 2022-06-09 Athletes Pressing Charges explores the athlete-led protest movement in the Olympic sport of modern pentathlon. The athlete activists protest against the removal of the horse-riding discipline from the sport and blame the sport's governing body, the International Modern Pentathlon Union, for violating good governance principles and mismanagement. By taking the existing power imbalance between sport organizations and athletes as a starting point, this book argues that providing a voice to independent athletes affected by policy changes, is crucial to understand the ongoing issues in the sport. The protest movement is contextualized against the backdrop of increasingly stronger attempts by athletes from semi-professional Olympic sports to make their voices heard in decision-making processes. Therefore, this study has broader significance for the ongoing challenges by athletes and athletes-led organizations on powerful sport

organizations

Troubling American Women Stacilee Ford, 2011-03-01 American women have lived in Hong Kong, and in neighboring Macao, for nearly two centuries. Many were changed by their encounter with Chinese life and British colonialism. Their openness to new experiences set them apart, while their pedagogical impulse gave them a reputation for outspokenness that troubled others. Drawing on memoirs, diaries, newspapers, films, and other texts, Stacilee Ford tells the stories of several American women and explores how, through dramatically changing times, they communicated their notions of national identity and gender. *Troubling American Women* is a lively and provocative study of cross-cultural encounters between the Hong Kong and the US and use of stereotypes of American womanhood in Hong Kong popular culture. Stacilee Ford has lived in Hong Kong for 18 years. She teaches history and American studies at the University of Hong Kong.
