Looking Up Matthew Cappucci,2022-08-02 An energetic and electrifying narrative about all things weather--by one of today's rising meteorological stars. Get in--we're going storm-chasing! Imagine a very cool weather nerd has just pulled up to you and yelled this out the window of his custom-built armored storm-chasing truck. The wind is whipping around, he's munching on Wawa, it's all very chaotic--yet as you look into his grinning face, you feel the greatest surge of adrenaline you have ever felt in your life. Hallelujah: your cavalry is here! Welcome to the brilliance of *Looking Up*, the lively new book from rising meteorology star Matthew Cappucci. He's a meteorologist for The Washington Post, and you might think of him as Doogie Howser meets Bill Paxton from *Twister*, with a dash of Leonardo DiCaprio from *Catch Me If You Can*. A self-proclaimed weather nerd, at the age of fourteen he talked his way into delivering a presentation on waterspouts at the American Meteorological Society's annual broadcast conference by fudging his age on the application and created his own major on weather science while an undergrad at Harvard. Combining reportage and accessible science with personal storytelling and infectious enthusiasm, *Looking Up* is a riveting ride through the state of our weather and a touching story about parents and mentors helping a budding scientist achieve his improbable dreams. Throughout, readers get a tutorial on the basics of weather science and the impact of the climate. As our country's leaders sound the alarm on climate change, few people have as close a view to how serious the situation actually is than those whose job is to follow the weather, which is the daily dose of climate we interact with and experience every day. The weather affects every

aspect of our lives (even our art) as well as our future. The way we think about it requires a whole-life overhaul. Rain or shine, tropical storm or twister, Cappucci is here to help us begin the process. So get in his storm-chasing truck already, will ya?

Hurricane Hunters and Tornado Chasers Gary Jeffrey, Gianluca Garofoalo, 2008-01-15 Sketches featuring three storm chasers presented in graphic novel format accompany information about the history of storm chasing and requirements for the job of storm chaser.

Truck Stop Jesus Buck Storm, 2016-11-01 Oh, for a simpler time! Paradise Jones dreams of the Hollywood glamour days. Clothes, hair, vintage car--you name it, she's got it. She's classic retro, a 21st-century image of her favorite Golden Era stars--Doris, Audrey, Esther, Marilyn. The entertainment rags call Paradise eccentric. The studios rarely call at all. When an altercation with her leering stepfather forces her to flee Los Angeles, Paradise leaves behind everything she loves and longs for. A few hundred miles east, Doc Morales' years of hard work in the minors of Major League Baseball have produced exactly one at bat in the Big Show. A collision at first, a blown knee, and adios dreams. Nothing left to live for but pick-up games and his collection of old movies. Nothing, that is, until beautiful, damaged Paradise Jones crashes into his small, Arizona town. So begins an epic road trip that will change everything. Throw in a couple of oddball bounty hunters, a forgotten movie-star boat captain, a cowboy priest, and a dashboard Jesus that is more than meets the eye, and Paradise and Doc have all the ingredients they need to cook up a fun and quirky slice of Americana pie.

The Great Blizzard of 1978 Butch Richards, 2017-05-07 In January of 1978, a blizzard tore across the Ohio Valley and Great Lake regions. Some call it the Storm of the Century, and others, the White Hurricane. This is a true short story of how an Ohio truck driver survived the storm on I-75 in the state of Ohio, in a blizzard with 50 to 100 mph winds and driving snow. A storm fierce enough to take 51 or more lives in the Ohio area alone. This is what happened to this driver, and all that were with him, with hundreds of vehicles frozen to the highways, unable to move, all counting on each other for survival.

What Stands in a Storm Kim Cross, Kimberly Hisako Cross, 2015-03-10 Immersive reporting and dramatic storytelling from the middle of the horrific superstorm of April 2011, a weather event that killed 348 people--Provided by publisher.

What Stands in a Storm Kim Cross, 2016-03 Enter the eye of the storm in this gripping real-life thriller--A Perfect Storm on land--that chronicles America's biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying

entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it’s a story of survival; for others it’s the story of their last hours. Cross’s immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that’s just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

A Daredevil's Guide to Storm Chasing Amie Jane Leavitt,2013 Describes the activity of storm chasing, including how it's done, the dangers involved, and how it has helped scientists learn about severe weather--

Life is Like a Weather Forecast (A Storm Chaser Looks at Life's Storms) G. Thomas Windsor,2010-12-20 In this book, storm chaser Tom Windsor explores weather forecasting and how it relates to life. He also tells of his experiences chasing some of the largest storms on earth (from a safe distance, most of the time!) Sooner or later we all seem to catch a glimpse of a perfect storm on the horizon. Time to take a second look at one's life forecast and hold on to an umbrella.

The Tornado Scientist Mary Kay Carson,2019-03-19 In this addition to the critically acclaimed Scientist in the Field series, scientist Robin Tanamachi and her team are trying to save countless lives across America’s heartland, chasing one tornado at a time. Robin Tanamachi has been captivated by tornadoes and extreme weather her entire life. When she realized people researched weather for a job, she was hooked. She now studies tornadogenesis, or how tornadoes form, and what causes them to get weaker versus strengthen. For her, driving around in a Doppler radar truck aiming towards storms is a normal day in the office. The data she collects is then modeled and studied on computers—with math, physics, and computer science working hand in hand with meteorology. At the end of the day, knowing exactly how, when, and where these violent storms happen can give more warning time for everyone involved.

Into the Storm Reed Timmer,Andrew Tilin,2010-10-14 An eye-of-the-hurricane view of storm chasing from the star of the Discovery Channel hit series Storm Chasers. Only one in ten chases actually intercept a tornado-unless you're Reed Timmer. The thrill-seeking meteorologist and star of Storm Chasers has followed and faced down more violent tornadoes than anyone. Into the Storm brings readers into the mind of this man and his mission—collecting data on tornadoes and hurricanes that could save lives—in the terrifying, awe-inspiring world of big weather. Into the Storm is also a fascinating look at the science of weather—what causes extreme conditions, its connection to

climate change, and how a tornado gets its stovepipe structure.

Eyes in a Storm Jessica McNew, 2003-05 Discusses the massive tornado of April, 1998 that barreled across central Alabama.
