The History of Aircraft Gas Turbine Engine Development in the United States James St. Peter, 1999 This absorbing, anecdotal history of gas turbine aircraft engine development in the United States was ten years in the making. It spans over 50 years of scientific discovery, corporate intrigue, and insight into the minds of the inventors, the sponsors, and the manufacturers. It conveys the danger of world war and the tension of the Cold War. Approximately 600 pages, it includes 19 chapters and 68 engine addenda, plus hundreds of photographs and figures, a comprehensive index, engine specifications, and performance ratings.

Stories Of Inventors Russell Doubleday, 2023-09-17 The one thing that prevents an unlimited use of the telephone is the expensive wires and the still more expensive work of putting them underground or stringing them overhead. So the capping of the climax of the wonders of the telephone would be wireless telephony, each instrument being so attuned that the undulations would respond only to the corresponding instrument. This is one of the problems that inventors are even now working upon, and it may be that wireless telephones will be in actual operation not many years after this appears in print....FROM THE BOOKS.

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks, with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures, but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology, and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science, and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort, and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries, dealing with both scientific and philosophical issues, to the extent that this work does. xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa.

The History of Russian Literature on Film Marina Korneeva, David Gillespie, 2023-12-28 Unlike most previous studies of literature and film, which tend to privilege particular authors, texts, or literary periods, David Gillespie and Marina Korneeva consider the multiple functions of filmed Russian literature as a cinematic subject in its own right—one reflecting the specific political and aesthetic priorities of different national and historical cinemas. In this first and only comprehensive study of cinema's various engagements of Russian literature focusing on the large period 1895-2015, *The History of Russian Literature on Film* highlights the ways these adaptations emerged from and continue to shape the social, artistic, and commercial aspects of film history.

The Book of Archives and Other Stories from the Mora Valley, New Mexico A. Gabriel Meléndez, 2017-04-20 In the shadow of the Sangre de Cristo Mountains, New Mexico's Mora Valley harbors the ghosts of history: troubadours and

soldiers, Plains Indians and settlers, families fleeing and finding home. There, more than a century ago, villagers collect scraps of paper documenting the valley's history and their identity—military records, travelers' diaries, newspaper articles, poetry, and more—and bind them into a leather portfolio known as "The Book of Archives." When a bomb blast during the Mexican-American War scatters the book's contents to the wind, the memory of the accounts lives on instead in the minds of Mora residents. Poets and storytellers pass down the valley's traditions into the twentieth century, from one generation to the next. In this pathbreaking dual-language volume, author A. Gabriel Meléndez joins their ranks, continuing the retelling of Mora Valley's tales for our time. A native of Mora with *el don de la palabra*, the divine gift of words, Meléndez mines historical sources and his own imagination to reconstruct the valley's story, first in English and then in Spanish. He strings together humorous, tragic, and quotidian vignettes about historical events and unlikely occurrences, creating a vivid portrait of Mora, both in cultural memory and present reality. Local gossip and family legend intertwine with Spanish-language ballads and the poetry of New Mexico's most famous dueling troubadours, Old Man Vilmas and the poet García. Drawing on New Mexican storytelling tradition, Meléndez weaves a colorful dual-language representation of a place whose irresistible characters and unforgettable events, and the inescapable truths they embody, still resonate today.

A New History of Spanish Literature Richard E. Chandler, Kessel Schwartz, 1991-09-01 First published in 1961, *A New History of Spanish Literature* has been a much-used resource for generations of students. The book has now been completely revised and updated to include extensive discussion of Spanish literature of the past thirty years. Richard E. Chandler and Kessel Schwartz, both longtime students of the literature, write authoritatively about every Spanish literary work of consequence. From the earliest extant writings through the literature of the 1980s, they draw on the latest scholarship. Unlike most literary histories, this one treats each genre fully in its own section, thus making it easy for the reader to follow the development of poetry, the drama, the novel, other prose fiction, and nonfiction prose. Students of the first edition have found this method particularly useful. However, this approach does not preclude study of the literature by period. A full index easily enables the reader to find all references to any individual author or book. Another noteworthy feature of the book, and one omitted from many books of this kind, is the comprehensive attention the authors accord nonfiction prose, including, for example, essays, philosophy, literary criticism, politics, and historiography. Encyclopedic in scope yet concise and eminently readable, the revised edition of *A New History of Spanish Literature* bids fair to be the standard reference well into the next century.

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2008-03-12 Here, at last, is the massively updated and augmented second edition of this landmark encyclopedia. It contains approximately 1000 entries dealing in depth with the history of the scientific, technological and medical accomplishments of cultures outside of the United States and Europe. The entries consist of fully updated articles together with hundreds of entirely new topics. This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non-Western Science, such as rationality, objectivity, and method. You'll also find material on religion and science, East and West, and magic and science.

Emb-312 Tucano Joao Paulo Zeitoun Moralez, 2017-07-19 Harpia Publishing is proud to announce the launch of a new title for 2017, *EMB-312 Tucano: Brazil's turboprop success story*, set to become the definitive English-language

reference work on this revolutionary Latin American aerospace product. Written by an expert in the field, this book recounts the story of Embraer's EMB-312 turboprop trainer, the first aircraft in its class to offer a cockpit and controls equivalent to its fighter contemporaries, as well enough power to match the high-speed maneuvers of comparable jet trainers. Drawing upon a cadre of authors who are experts in their field, Carrier Aviation in the 21st Century continues Harpia's reputation for providing unprecedented detail and extensive technical specifications, as well as detailing the structure of all the air arms and the individual units that currently embark on board carriers. Illustrations include specially commissioned artworks and diagrams to help illustrate how carrier air power remains an essential element of modern warfare.

The Death of Luigi Trastulli and Other Stories Alessandro Portelli, 1991-01-01 Insightful, elegantly written analyses of oral narratives by a literary scholar with a deep understanding of the politics of history and historical practice; The Death of Luigi Trastulli is arguably the most cited essay about oral history narratives.

Emb-314 Super Tucano João Paulo Zeitoun Moralez, 2018-09-19 The Embraer Super Tucano is tough enough to support operations from unprepared runways and in temperatures of 36C and 100% humidity. Flying independently of ground support, it can take off from short and narrow runways to provide support to ground forces. The aircraft integrates a fourth-generation cockpit with some of the most modern technology including datalink, 'hands on throttle and stick' (HOTAS) controls, a head-up display, and night and thermal vision sensors. The crew can deliver up to 1,500kg of conventional and guided weaponry and are provided with ballistic protection. Most other aircraft in its class were developed as advanced trainers before being converted for combat missions. The origins of the single-turboprop EMB-314 Super Tucano are as a robust attack aircraft capable of performing highly varied types of missions, sustaining weeks of continuous operation with high availability. It is almost completely redesigned compared to its predecessor, the EMB-312 Tucano. The two 0.5-in (12.7-mm) machine guns installed in the wings are complemented by a variety of 130 types of armament carried on five external points under the wings and fuselage. With more than 250 examples produced, the Super Tucano performs missions including armed reconnaissance, escort, counterinsurgency and even air defense. It is used by Brazil and 11 other countries and is manufactured under licence in the United States. Afghanistan, Brazil, Colombia, the Dominican Republic and Mauritania have all made operational use of the Super Tucano. The US may become the next operator of the turboprop, with a requirement for as many as 300 new light close air support aircraft.
