Socioecological Transitions and Global Change Marina Fischer-Kowalski, Helmut Haberl, 2007

'In an important contribution to sustainability science, Fischer-Kowalski and Haberl extend the frontiers of contemporary socio-ecological research to articulate a theory of material, energy and land-use transitions across multiple scales based on detailed empirical studies in Europe and Asia. The insights it presents on agrarian-industrial transitions are crucial to understand the potential impact of emerging nations like India and China on global change.' - Aromar Revi, India China Institute, The New School University, US 'This volume represents the culmination of several years of empirical research and refinement of the social metabolism approach. That approach is one of the most exciting and illuminating innovations in the fields of human ecology, industrial ecology, and environmental history. Here the team from Vienna's Institute of Social Ecology shows masterfully how the insights of social metabolism shed light on transitions to high-energy society in Austria, in Britain, and in the world at large.' - J.R. McNeill, Georgetown University, US This significant new book analyses fundamental changes in society-nature interaction: the socioeconomic use of materials, energy and land. The volume presents a number of case studies addressing transitions from an agrarian to an industrial socioecological regime, analysed within the materials and energy flow accounting (MEFA) framework. It is argued that by concentrating on the biophysical dimensions of change in the course of industrialization, social development issues can be explicitly linked to changes in the natural environment. From the historical transition in Europe, to current transitions in developing countries, the book offers a broad and comprehensive analysis of transition processes across scales, from local to national. The comparison of historical and current assessments allows a theory of the underlying patterns of the agrarian-industrial transition to emerge. On this basis, future trends and possible pathways towards (or indeed further departures from) sustainability are discussed. Empirical in character and cautious in its assumptions, this insightful book provides rich and in-depth material for further studies in socioecological research. It will be essential reading for students and researchers of ecological economics, industrial ecology, human ecology, environmental sociology, environmental history, geography as well as land, energy and development studies.

The Boy Who Harnessed the Wind William Kamkwamba, Bryan Mealer, 2015-02-05 Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

The Price and Welfare Effects of The Value-Added Tax: Evidence from Mexico Rodrigo

Mariscal, Alejandro M. Werner, 2018-11-08 In this paper we analyze the incidence of the VAT and its effects on the income distribution. To identify these effects, we rely on two tax reforms undertaken in Mexico that increased the VAT rate for a group of cities and left the rest unaffected. We compare the inflation rate of the affected cities with the exempted cities before and after the law changed. We find that the effect on prices is limited and conclude that the burden of the tax is indeed shared between producers and consumers. Regarding welfare, we find that the VAT is progressive in both absolute and relative terms to the overall expenditure. Finally, we show that an identical change in the VAT

rate when inflation is high and persistent doubles its pass-through to inflation and its welfare loss for the average household.

Propaganda in the Information Age Alan MacLeod, 2019-04-24 *Propaganda in the Information Age* is a collaborative volume which updates Herman and Chomsky's propaganda model for the twenty-first-century media landscape and makes the case for the continuing relevance of their original ideas. It includes an exclusive interview with Noam Chomsky himself. 2018 marks 30 years since the publication of Edward Herman and Noam Chomsky's ground-breaking book *Manufacturing Consent*, which lifted the veil over how the mass media operate. The book's model presented five filters which all potentially newsworthy events must pass through before they reach our TV screens, smartphones or newspapers. In *Propaganda in the Information Age*, many of the world's leading media scholars, analysts and journalists use this model to explore the modern media world, covering some of the most pressing contemporary topics such as fake news, Cambridge Analytica, the Syrian Civil War and Russiagate. The collection also acknowledges that in an increasingly globalized world, our media is increasingly globalized as well, with chapters exploring both Indian and African media. For students of Media Studies, Journalism, Communication and Sociology, *Propaganda in the Information Age* offers a fascinating introduction to the propaganda model and how it can be applied to our understanding not only of how media functions in corporate America, but across the world in the twenty-first century.

Global Discontents Noam Chomsky, David Barsamian, 2017-12-05 In wide-ranging discussions with David Barsamian, his longtime interlocutor, Noam Chomsky asks us to 'consider the world we are leaving to our grandchildren': one imperiled by climate change and the growing potential for nuclear war. If the current system is incapable of dealing with these threats, he argues, it's up to us to radically change it--Amazon.com.

Vibrancy in Stone Bảo Tàng điêu khắc Chăm Đà Nẵng, 2018 This catalogue assembles sumptuous photographs of the world's leading collection of Cham sculpture, along with the most recent insights of Vietnamese and international scholars. The Champa culture thrived in magnificent temples, sculpture, dance and music along the central and southern coast of today's Vietnam from the 5th to the 15th centuries. A focused exploration here uncovers this brilliant yet almost lost culture to newcomers as well as experts. To mark its centenary, the Da Nang Museum of Cham Sculpture has been expanded and refurbished to appropriately house the world's leading collection of Cham art. The museum staff, supported by the Southeast Asia art programme of the School of Oriental and African

Studies (SoaS), London University, funded by the Alphawood Foundation, worked in concert with researchers from around the world to present these masterpieces.

LSD, My Problem Child Albert Hofmann, 2017-09-27 This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.
