Hurricane! Arnaldo Ricciulli,2009-03 On 2012, Daniel Mayhew, a brilliant weather researcher, works with Kelly Delaney, totally dedicated to protecting the environment, to build Sub-Zero, a hurricane suppression system. When Kelly's theories about a category 6 hurricane are proven true, Sub-Zero is pressed into service. Unknown to either of them, General Stefano Lowe, part of a shadowy group known as the Lucky Thirteen, is out to stop them. As Daniel and Kelly fight to disperse the storm, Kelly's family asks her to come home. They're convinced the world is entering the End of Times. Meanwhile, Daniel's father, ignoring the signs of a storm approaching, goes sailing. General Stefano Lowe is electrocuted trying to sabotage the system, and the Sub-Zero system successfully disperses the storm. Later, Daniel's father is found alive! Taking him to the hospital, Kelly and Daniel realize that they have a future together even as another storm starts to build. Book Review: What would you do to prevent death and destruction from a huge storm or hurricane? Imagine being able to create a system that could dissipate a storm and make sure it never reached hurricane force. Daniel Mayhew invented something called Sub-Zero that could do just that. He presented it to the National Hurricane Center and it was approved by most of the members. But, there is a group called the Lucky 13 that would not relish its success and will do anything to discredit him and make sure the project never gets off the ground. Daniel finds hurricanes exciting, exhilarating even though he understands their dangers. Creating the Sub-Zero, which could prevent the loss of property, lives and destruction would save billions of dollars to anywhere these hurricanes or devastating storms hit. Kelly Delaney, who also works for the Hurricane Center, understands the threat to global warming and develops her own theory and presents it. She is concerned that category 6 hurricane storms will eventually be a thing of the present and suggests that the government buy up all of the coastal land and allow it to return to nature. However, both plans are unpopular and without government support there would be little chance either would be successful. When Daniel is successful in getting the government to fund his program the group called the Lucky 13 has to find a way to discredit him and the program too. As these unscrupulous people convince Daniel's father that he stole his money for his own purposes and not for what it was intended and then falsified papers making it seem that the project was over budget, it appeared the end had finally come even before this project could be implemented. Daniel is a weather researcher with many wild ideas about stopping hurricanes before they make landfall. Kelly's predictions about category 6 storms are related to deaf ears. But, what would happen if a storm of this magnitude was brewing and no one did anything to prepare for it or believed it was going to happen? Well, you would have a group of wealthy men whose only goal is to make money off of the destruction, deaths and devastation caused by these storms. The more damage, the deaths, the more destruction the more money their construction and oil companies would make during the reconstruction process. Arnaldo Ricciulli takes the reader on a dangerous ride through many storms and one impending storm that could destroy the world. A book about global warming, a topic that is relevant and important. Caring about the environment is important and Daniel and Kelly team up to stop the storm and teach the children of the state of Florida about hurricane safety in a well-crafted program they both create in order to teach children how dangerous hurricanes can be. Will Daniel ever get to implement his project? Will it work to decrease the density, volume and size of this catastrophic storm? How will this change Daniel's father's poor perception of him and Kelly's about

The Ultimate Storm Allen Sipos,2008-09 Having read books like: The Weather Makers: How Man Is Changing the Climate and What It Means for Life on Earth by Tim Flannery, An Inconvenient Truth by Al Gore, and The Coming Global Superstorm by Art Bell and Whitley Strieber, I let my imagination roam. Not only was I aghast as to what was happening now, but at what catastrophe will happen in the near future. We can only foretell the worst. The one thing you can be assured of is that the conditions will only get worse and the feedback will compound itself. My book talks about global warming, greenhouse gasses, and the increase of CO2 in the atmosphere. We must do something NOW!

Wild Storm Richard Castle, 2014-05-13 Derrick Storm, the guy the CIA calls on when it wants something investigated domestically, is thirty-three thousand feet in the air, returning from a rock climbing vacation in the Swiss Alps, when the plane spirals into a nose-dive. Storm uses his climbing gear to tether himself to the wing and heroically save the plane and all the people on board. Sadly, Storm is not available to come to the aid of the three other planes that have crashed under similar circumstances, killing everyone on board. Interestingly, many of the victims are powerful people in politics, business and religious groups. The always elusive Jedidiah Jones, leader of the National Clandestine Service that has no name, calls on Storm to investigate. Storm determines that an unknown extremist has secured enough of the rare earth element promethium to create a laser with the power to shoot down planes from the ground. The problem swiftly becomes a global one as four more planes crash in the Arabia Desert. Details, intuition and courage lead Storm to Monaco, Panama City and Egypt as he meets beautiful women, rides angry camels and rescues innocent victims in his valiant effort to track down the maniacal mind behind the terrorism.

Biscay Gary E. Brown,2017-05-25 In this true story of the sea, I describe the events of six days in October when my wife and I fought to survive aboard our dismantled, engineless yacht with no means of communication with the outside world. I write frankly about what we did right and what we did wrong and there's plenty for the reader to ponder and discuss. Since these events, equipment, especially electronics, have changed beyond recognition but one thing remains constant: The Sea.
